For some reason the icemen have not yet offered any satisfactory explanation of how the price of ice delivered to Omaha households happened to be raised by all the ice companies exactly 25 per cent on precisely the same day of the year.

Senator Brown broke away from the insurgents to vote with the regulars for reciprocity, and then he broke gents to vote with the democrats on their wool bill. But will any Nebraska democrats break away from their party on that account to vote the rice fields, so ought the Sacrafor Senator Brown?

Breadth of View.

One of the chief obstacles to the solution of big problems is the lack of breadth of view. Too many people look at every question through a parrow slit which prevents them from seeing more than one side and often more than a part of that side.

A truth, which is not sufficiently recognized and appreciated, is that human vision is at best limited and circumscribed. If we look at the heavens with the naked eye we see certain stars and planets. If we look again through a telescope we see many more objects in the firmament not previously visible. As the lens of the telescope is perfected and becomes stronger we see farther into the reaches of space and make constantly

new discoveries. So with the capacity of man to view and grasp all sorts of subjects. There are folks who can never see farther than their own immediate neighborhood, and there are others state. Those who can view a question number, and those who have ability to grasp a world problem and trace cause and effect for all humanity extending through the years and many generations are, rare, indeed.

One of the needs of the day is greater breadth of view. No one will deny that in this respect our twentieth century will average higher than any preceding era of the world's history and that the main factors in this change have been spreading intelligence, popular education, books, newspapers, travel and improved communication. These factors are still continued progress of mankind.

Reciprocity with Mexico.

It was to have been expected that reciprocity with Mexico would be speedily proposed if the senate passed the Canadian bill, so that Congressman Burleson of Texas can have surprised few with his resolution calling on the president to begin negotiations for a "freer commerce between the two countries." It may not be fair to question whether the resolution springs from the best of faith. Others According to all the signs, King besides the Texas congressman have, procity between the United States and Mexico. James G. Blaine advocated They are talking about killing the Pan-American reciprocity, or, more precisely, reciprocal trade relations. for Blaine's theory of reciprocity did not contemplate free trade.

But reciprocity with Mexico and other South or Central American countries must be considered from somewhat different angles than similar relations with Canada. Canada and the United States are almost identical in the character of their people, their labor and similar in their forms of States have substantially the same It is not surprising that Texas went form of government in theory, but like this: very different in fact; their peoples are totally unlike as to race, temperament, character and standard of living; the workman of the United Hines may be a little slow in coming States, like that of Canada, is an independent, aggressive, highly-skilled and well-paid man, while most of the labor in Mexico is performed by the her cat presumably had the artistic uneducated, dependent and underpaid

> It may be that, in time, complete reciprocity between this highly developed republic and this yet undeveloped one will be brought about, for with American and other foreign capital and influence to exploit resources, foster trade and promote commerce in Mexico an era of expansion is inevitable. The Canadian reciprocity agreement, however, offers little that can be used to this purpose. While there is desire and need for closer relations between Mexico and the United States, it will have to be worked out on lines specially applicable to these two countries.

Rice in California.

Californians are about to go in for rice culture on a large scale. They ought to make a paying business of it. elect no longer ride up to the capitol They have an assortment of climate, on an old gray mare to take the oath soil and other conditions highly of office must not bedim the glory of adapted, it would seem, to such a crop. They have the habit of eating rice already formed. That should be a large factor in favor of the new undertakperiment with or tease or tickle the least, a local market for their products. Rice is devoured-there is no The Chicago Inter Ocean recently other word that will so well describe they contracted the habit from the Chinese or not makes no difference;

But, of course, California, which would raise rice for the country, not merely for California. It would raise rice the way it raises raisins. Rice is a highly nutritious and wholesome article of food and doubtless if more largely produced in this country would be more largely consumed, though we manage, with what we raise in the south and import from the orient, to get away with a good many tons each year. The great San Joaquin valley, which skirts the Sierra Nevadas on the east and the Coast range, almost, on the west, and runs from Stockton away from both regulars and insur- on the north to the Tehachapi on the south, the most completely and proficiently irrigated section in the country, ought to make an ideal place for necessary to give it far-reaching and

mento valley and others. In the

fornia and the far west this plan probably will form a large part.

In addition to all the other essenemployment than to fruit and raisin nicking.

Labor Waste.

On an average of 27,000 workmen in the United States are idle every year as a result of strikes or lockouts. The suffering and misery this entails. great to attempt to estimate. It ought

please, but we will make little real headway toward ideal management it also by rail. until we have eliminated this tremendous element of labor waste. And what are we doing to eliminate it? Strikes or lockouts are just as liable is only in its incubation stage. to occur today as they were ten or twenty years ago, so far as any effective legislation the people have taken to prevent them is concerned.

But Europe's waste in this regard is far greater than ours. According to recent statistics on strikes and lockouts in the old countries, an average for four years shows that in the three countries, Great Britain, France and Austria, about 8,000,000 days' work are lost from these causes. That however, is no valid excuse for ours.

The Trouble Over Morocco.

England's "note of warning" to Germany on the Morocco situation is too clear and firm to be misunderstood. Evidently John Bull feels very strongly the necessity of repressive measures. Yet such advice was to have been expected, for England could no more countenance aggression by Germany than Germany could longer tolerate indifference or vacillation by must be one of the causes of poverty France. All alike have interests in in those countries. Europe's loss, the troubled territory and all alike are bound-insofar as there is any binding effect to it-by the Algeciras treaty. With all the unanimity of sentiment and action between the government and opposition forces as to what England should do and Lord Balfour's vigorous declaration that quaintance or a stranger on hearsay England is not to be wiped off the map evidence they would never think of of Europe, prudence forbids the conaccepting as conclusive for a verdict clusion that friction will ensue beof guilty in a court of justice. Germany is supposed to have tired of the frequent changes in France and awaiting decisions on important questleship to Agadir.

Germany's supposed necessity for territorial expansion, since its interior is compactly developed, is brought into the present controversy and, podoubt, has a place there, but what brought things to a head at this parcondition of affairs in France.

It's almost funny to hear the Water board's great hydraulic engineer, who has engineered such a good sale price for the water company, declaring now that "we ought to lay a main to Florence immediately." When the water company offered to lay the main nearly five years ago this same hydraulic expert declared it was not needed at all, and that the only relief required was to build a storage reservoir in Walnut Hill. That reminds us that the Water board's order commanding the water company to build this storage reservoir instead of a supply main to Florence still stands ia. hydraulic member had then had his way nearly \$500,000 of the taxpayers' money would have been wasted in building an unnecessary reservoir.

Writing to the Commoner in answer to Mr. Bryan's questions, Governor Marshall of Indiana says, "I do not nomination for president. I hold it to be such a position that no man is daughter and son, Ross and George. big enough to run for it." Is this intended for irony or just for sarcasm?

Chicago Inter Ocean How young we are! Saturday there was torn down the old mission church at Bertrand, Ind., the last vestige of a town that flourished in 1837. The old church was the original home of Notre Dame university and was the first brick structure in this part of the country. On the same day Prof. Gogshail of the University of Indiana took the latitude and longitude and located the exact "center of population" of the United States eight miles northeast of the city of Bloomington, Ind.

MAUDLIN WAVE SUBSIDES. Pardon Petition Signers Brought Into a Ridiculous Light.

Des Moines Capito There is a growing suspicion throughou the country that the dear people were worked by the yellow press in the recent hysteria which was industriously developed over the case of Mrs. Nespolitana. the Canadian woman over whom such frantic effort was made to save from the penalty of her crime. The Toronto Star, which knows the facts in the case, makes the following comment: "The stir that has been raised about

Mrs. Neapolitana, who has been sentenced

to death at the Canadian Soo, is largely the work of American journalism. The story which has been wired all over the United States, working people up to sign petitions which are to be forwarded to Ottawa asking that the woman be par doned or imprisoned and not hanged, seems to have been adopted because it would read well and serve the purposes of sensational journalism. It would seem, in fact, that Neapolitana was a better man than his wife was a woman. The story that she killed her husband because he wanted her to live a life of shame will not bear examination. She was beaten by her husman while he was away, and more than once had she offended in this way. In short, her infidelities caused her to be in fear of her husband's anger, and it is not an easy task which yellow journalism sets itself in trying to make a virtuous heroine of such a woman. If she valued her honor, her conduct gives us no hint of it. She betrayed her husband repeatedly and continuously, as the evidence and her own admissions prove, and when her guilt enraged him until he beat her she killed him with an axe as he slept in his dishonored home. Not good material out of which to make a heroine, yet the Ameri can journals have succeeded well." As to whether this woman deserved

death, life imprisonment, a mere jail sentence or just a reprimand at the hands of the court is not especially material to that is that there is nothing in which people like to make themselves ridiculous so well as in the matter of signing netitions

## Jooking Backward This Day in Omaha COMPILED FROM BEE FILES

JULY 30.

Thirty Years Ago-George Heyn, proprietor of the Grand Central photograph gallery, warns the public against two men canvasing the city for copy, pretending they were in his emors and swindlers.

Ellis L. Bierbower, United States marshal, left for Falfs City on official busi-

to Chicago.
