## Men Who Helped to Make America

Of the numerous family of Bmiths, one bearing the equally general name of John was the founder of the Colony of Virginia.

He was one of the Lincolnshire Smiths. and was born in Willoughby in 1759. He was so daring and adventurous during his school days that he planned a flight to sea.

After his father's death he was left in charge of guardians, who, in order to seize his little patrimony, encouraged the boy to run away.

At fifteen he left England, visited France and the low countries, and entered the French army, When the fighting was over in France he joined some other English soldiers of fortune in the armies of Philip the Second and the duke of Alva, fighting in the Netherlands.

His life was a varied one. He became a hermit, and a student of Marcus Aure-Hus and Machiavelli. Then he became a pirate, afterward a traveler in Italy, a landed at what is now Jamestown. He
