veritable army of purple-hatted women has descended upon New York. and throughout the country conditions are more or less the same, judging from the enermous quantity of purple hats that have then and are being shipped. Purple and black promises to be quite as popular a combination as king's blue and black, it being understood that only the most vivid purple combine with black to obtain the fashionable, brilliant effect. Purple and black sound rather funereal, but as a matter of fact it is a very striking color scheme and one that has brilliancy.

It seems quite impossible to write of purple felts without mentioning white shetland veils, as it seems impossible for women to refrain from wearing them. The better trade gives this fad a wide berth, of course, although purple hats, notably those laden with estrich, are still very smart in Mayfair, so to speak.

Velour Hats to be Popular. There are an abundance of velvet hats being shown and an unusual number of velours and plain felts, the latter not being faced but usually draped or in brigand caught in the act of stealing some way softened by the introduction of away a beautiful young malden. silk over the crown.
