

SENATE BUSY ON TARIFF

Revision of Iron and Steel Schedule to Occupy Upper Chamber.

PRESIDENT'S TENURE OF OFFICE

Subcommittee of Judiciary Body Has Been Studying This Question and Report is Likely to Be Made Soon.

WASHINGTON, May 12.—A variety of important measures crowd the congressional program this week.

The discussion of the revision of the iron and steel schedule of the tariff law bids fair to occupy most of the senate's attention, with a possibility of the democrats and progressive republicans getting together and forcing adoption of the Cummins compromise bill early next week.

The house investigating committee resumes activity tomorrow. These include the judiciary committee's inquiry into the charges against Judge Archibald of the commerce court and the agriculture committee's consideration of attacks on federal meat inspection methods.

The proposed act to give effect to the treaty between the United States, Great Britain, Japan and Russia for the protection of the fur seals and sea otter in the north Pacific ocean will be brought up in the senate tomorrow by Senator Lodge with a view to immediate action. The convention was signed last July and the house has already passed the bill to make it operative, the senate foreign relations committee agreeing to it in modified form.

Tenure of President.

The senate judiciary committee tomorrow may favorably report on the proposal to limit the tenure of office of the president of the United States. The subcommittee to study the question expects to submit its conclusions. The advocates of a single term—probably six years—contend they express the belief that the measure will be reported out and pass the senate.

It would not affect the present presidential campaign, for it would mean the admission of an amendment to the constitution to the state legislatures. Under the Works resolution, pending before the committee, the president would hold office for six years, with eligibility to a second term. The committee is also considering a project for advancing the date of the presidential inauguration to a date soon after election.

Senator Clapp of Minnesota, who heads the elections subcommittee to investigate contributions to the presidential campaigns of 1904 and 1908, will not call the committee together until about May 20. He is scheduled to speak in the Ohio campaign in the interest of Colonel Roosevelt all this week.

The artificial appropriation bill and the bill to limit hours of labor on government contract work to eight hours probably will come up in the senate this week, while Panama legislation promises largely to engross the attention of the house.

Scatters Flowers Where Titanic Sank For Dead Husband

NEW YORK, May 12.—Standing on the bridge of the Carnania in mid-ocean last Thursday evening, Mrs. J. H. Loring of New York and London scattered armfuls of flowers on the waters of the Atlantic in memory of her husband, who lost his life on the Titanic when the liner, which reached port today, arrived in latitude 41 N and longitude 81 W, the nearest position where the Titanic sank, Mrs. Loring, attired in deep mourning, was escorted to the bridge by Captain Dow.

Five hundred cabin passengers stood on the decks as Mrs. Loring scattered the flowers on the sea. Men stood with heads bowed and uncovered, while some of the women passengers, touched by the wife's devotion, wept.

When the Mackay-Bennett and the Minia, the steamships despatched to search the scene of the disaster, failed to find the body of Mr. Loring, who was a member of the Liverpool firm of Rose & Vancourt of London, Mrs. Loring decided to make the trip across the Atlantic to pay a last tribute to the memory of her husband.

Severe Windstorm Causes Heavy Loss

CHICAGO, May 12.—A severe rain and wind storm, which swept over Chicago Saturday night and today, indirectly caused the deaths of two men and the injury of several others.

Patrick Murray, 55 years old, and an unidentified man of about 25 years were run down by street cars while blinded by the sweeping rain. Both died at hospitals shortly after they had been struck. Several pedestrians were struck by automobiles or street cars and injured.

The wind, which reached a velocity of forty-four miles an hour, uprooted trees, blew down many signs and tore covers of boats from their moorings along the lake shore.

Captain Charles Carlin and the crew of the life saving station went to the aid of the lumber schooner "Quick Step," which signaled for help a mile off the mouth of the river during the afternoon. Because of the heavy sea, the schooner was unable to make the harbor. The craft was towed into the river by a tug.

Icebergs Are Sighted in Southern Waters

NEW YORK, May 12.—Icebergs in the Atlantic, further south than they have ever been seen before, were reported today by two incoming steamers. The Cunard liner Carnania last Thursday sighted eight monster ice mountains in latitude 29 deg. north, longitude 42 deg. west while the log of the French liner La Savoie recorded bergs in latitude 23 deg. north, longitude 47 deg. west.

BODIES OF FOUR TITANIC VICTIMS ARE RECOVERED

HALIFAX, N. S., May 12.—Wireless messages from the steamer Montserrat, which was despatched from Halifax last week to search the sea for victims of the Titanic, reports the recovery of four bodies. Three of these were identified as follows: HAROLD REYNOLDS, steward passenger; C. SMITH, a steward; A. SYRIAN GIRL, about 15 years old; ONE BODY, that of a sailor, was unidentified and buried at sea.

SOUTH OMAHA MAN WHO GETS GOOD PROMOTION.

TAFT WIRES HIS MESSAGE

Urges People of California to Support His Cause.

GIVES HIS FOUR YEARS' RECORD

Declares that Roosevelt Has Not Given Him Square Deal, Though He Appears to Stand on Such a Platform.

WASHINGTON, May 12.—Unable to cross the continent to campaign in California, President Taft today sent by telegraph to the men and women republicans of that state his arguments for support of the presidential primary on Tuesday.

The president's telegram was sent to Colonel Charles M. Hammond, manager of the Taft forces in San Francisco and a brother-in-law of Colonel Roosevelt. It was also sent to P. A. Stanton, the Taft manager at Los Angeles.

In the message President Taft reviewed the achievements of his administration when he asserted that Colonel Roosevelt was not giving him a square deal, but was appealing to class hatred and forcing shenanigans. The telegram in full follows:

Record of Accomplishment.

"In the matter of the tariff, the Panama-Pacific exposition, conservation, the increase in our international and Philippine trade, in the employers' liability act, in the more drastic and complete regulation of interstate commerce, in the postal savings bank bill, in the mining bureau bill for the health and wealth of the miners, in the establishment of a tariff commission, in the change from a deficit of \$26,000,000 to a surplus of \$60,000,000, in the corporation tax, in the children's bureau bill for the health and welfare of children, in the appointment to the children's bureau of Miss Julia C. Lathrop, one of the ablest women of America; in the making of peace treaties with England and France, which have been consummated through the influence of Mr. Roosevelt and his campaign manager, Senator Dixon and the democratic members of the senate; in the effective prosecution of the work of building and completing the Panama canal, I submit a record is formed that entitles this administration to the support of the republican men and women of California and that it is progressive in the highest degree.

Workers' Compensation.

"The last important measure which I have urged is recommended to congress, which has passed the senate and is now pending in the house of representatives, is the workers' compensation bill, which changes altogether the policy of the law with reference to the liability of the employer to the employes on interstate commerce railroads and gives an insurance for every employe against the dangers of his employment by requiring the employers to indemnify the employes against injury received in the employment not brought about by his will and voluntary accident and fixes a reasonable compensation graduated according to regular tables and proportioned to the extent of the injuries and the earning capacity of the employe injured.

SPECIAL STUNTS FOR THE AD MEN'S DINNER TODAY

Some stunts that were left off the program of the fourth annual breakfast dinner and vaudeville of the Ad club, are to be given at the weekly luncheon at the club at the Henshaw hotel this noon.

The Human Heart

The heart is a wonderful double pump, through the action of which the blood stream is kept sweeping round and round through the body at the rate of seven miles an hour. Remember this, that our bodies will not stand the strain of over-work without good, pure blood any more than the engine can run smoothly without oil. After many years of study in the active practice of medicine, Dr. R. V. Pierce found that when the stomach was out of order, the blood impure and there were symptoms of general breakdown, a tonic made of the glyceric extract of certain roots was the best corrective. This he called

Dr. Pierce's Golden Medical Discovery

Being made without alcohol, this "Medical Discovery" helps the stomach to assimilate the food, thereby curing dyspepsia. It is especially adapted to diseases attended with excessive tissue waste, notably in convalescence from various fevers, for this-blooded people and those who are always "outgoing cold."

Insanity Experts Examine Richeson For the Governor

BOSTON, May 12.—The board of insanity experts selected by Governor Foss to examine into the mental condition of Clarence V. T. Richeson, the former Baptist clergyman, who is under sentence of death for the murder of Avis Linnell, subjected Richeson today to the most exhaustive tests known. Their examination occupied almost the entire day.

The commission includes Dr. Henry Runt Steadman of Brookline, chairman of the board of trustees of the Taunton insane hospital; Dr. George T. Tuttle, superintendent of the McLean insane hospital; and Henry C. Frost, superintendent of the state insane hospital. It is expected their report will be ready for the governor some time before the meeting of the executive council Wednesday.

At the time the governor can ask his council to commute the sentence of Richeson to life imprisonment if the alienists report that the prisoner was insane at the time he committed the crime. If they report that he was sane then, but that he is insane at present, the governor can only ask that the council grant a reprieve until such time as the prisoner is sane, at which time he must be executed. In any event the governor has no voice in whatever action the council takes.

Bankers Stand Ready to Give China Money

PEKING, May 12.—The minister of finance and the bankers representing the six powers, the United States, Great Britain, France, Germany, Russia and Japan, have arranged the terms of a series of advances to the Chinese government totalling \$50,000,000, against treasury bills redeemable within one year by the proceeds of the big loan. There will be supervision over the expenditures jointly by foreign and Chinese auditors.

If the scheme is approved by President Yuan Shi Kai and the national council it will be tantamount to a defeat of Premier Tang Shao Yi, who persists in opposing it.

It is pointed out by those identified with the scheme that the country is a veritable powder magazine and that the unpaid soldiers threaten an outbreak which can only be avoided by payment of their wages.

LONDON, May 12.—A Tien Tsin dispatch says the international troops are patrolling the native quarter of Tien Tsin in view of possibility of a riot.

Missouri Pacific Mail Train Wrecked

ST. LOUIS, Mo., May 12.—Missouri Pacific mail train No. 1, which left here this morning at 9 o'clock, was derailed near Eliah, Mo., sixty miles west. John Lanberry, engineer of Sedalia, Mo., was pinned under his engine and killed.

The derailment is thought to have been caused by the loosening of a rail because of heavy rains. The observation car was the only one which remained on the rails, the engine and other cars rolling down an embankment.

D. Guilbult, fireman, jumped and escaped injury. Several passengers were slightly injured, but none seriously. Lanberry's body was not recovered until late this afternoon.

WEATHER BUREAU SAYS THERE IS DANGER OF FROST

WASHINGTON, May 12.—Indications are that during the coming week fair weather will predominate with temperatures below the seasonal average generally east of the Rocky mountains and near or above the normal on the Pacific slope.

According to the bulletin issued tonight, showers are probable tomorrow in the middle Atlantic and New England states, attending the eastern movement of a disturbance that is now over the Ohio valley. A change to considerably cooler weather, the bulletin continues, "will overspread the region east of the Mississippi valley Monday and Tuesday, and frosts are likely to occur the first part of the week in the Rocky mountain region, the northern plains states, the upper Mississippi valley and the upper lake region, and Tuesday and Wednesday in the lower lake region, the upper Ohio valley and the interior of the north Atlantic states.

The next disturbance to cross the country will appear in the far west Wednesday or Thursday and move to the middle west near the close of the week. It will be preceded by a general rise in temperature and be attended by local showers and thunderstorms."

CREEK INDIAN WOMEN MOURN BURNED CEMETERY

GUTHRIE, Okl., May 12.—The women of the Euchee band of the Creek Indian tribe are in mourning and are undergoing several weeks of weeping because white men who recently purchased the Indian lands destroyed the bones of their ancestors. Since earliest times the Euchees have deposited the bodies of their dead children in hollow trees and fastened boards or bark over the openings. Recently white men bought the Euchee lands in western Creek country and while clearing the land cut down the grave trees and burned them.

WYOMING VISITED BY SNOW

Many Lambs and Shorn Sheep Said to Have Been Killed.

WHEAT SHOWS IMPROVEMENT

Reports from Railroads and from the Nye-Schneider-Fowler Company Show Great Improvement Over a Week Ago.

Railroad reports from the Sheridan division of the Burlington showed from two to four inches of snow and a temperature of below freezing. The Northwestern reported snow most of the way from Casper to Lander and the Union Pacific found heavy snow all the way from Cheyenne to Rawlins and light snow from Rawlins to Green River.

It is also reported that the snowstorm and the cold weather accompanying it has killed thousands of young lambs and sheep that have been shorn of their fleeces.

While the cold is expected to nip some of the fruit and early vegetables, it is not going to injure the wheat that is making wonderful headway in its growth. The Burlington's crop report for the week ending last Saturday shows the following condition of wheat as compared with a week ago:

Table with 3 columns: Division, Present Time, One Week Ago. Rows include Omaha, Lincoln, Wynona, McCook.

The reports state that in every section on each division of the system the conditions for a bumper crop are much more promising than they were the previous week. Temperatures have been low and moisture has been plentiful.

The only danger expressed for the future of the crop is that the grain will grow too rapidly, running too much to straw.

The Nye-Schneider-Fowler company, that keeps in touch with the crop conditions throughout the state, receiving reports from its hundreds of buyers and agents and from farmers is out with its report for the week ending last Saturday. In summarizing the company says of the Nebraska wheat crop:

"Wheat is almost perfect in most localities. Where early reports indicated that the cereal would be practically a failure, now at least a three-fourth crop is expected. The soil is in fine condition and there has been plenty of moisture. Spring wheat and oats are almost perfect and corn planting is progressing in a satisfactory manner."

TWO VALUABLE PUPS REPORTED TO BE STOLEN

A pedigreed puppy was stolen from Lowell Carson of 1615 North Twenty-ninth street Saturday in a bold manner. An unidentified man drove up to his house, entered the yard and took the puppy from a kennel and drove away. Carson learned yesterday that the stranger had sold the pup for \$25.

M. R. Monahan of 818 South Thirty-eight street reported to the police that a Boston bull pup named Bluster had been stolen Sunday.

Lightning Fires Plant

PITTSBURGH, Pa., May 12.—The plant of the Woods-Lloyd company, manufacturers, was partially destroyed by fire today, causing a loss of \$100,000. The blaze was spectacular and resulted when lightning struck an electric cable leading into the plant.

To Keep the Face Fresh, Clear, Youthful

(National Hygienic Review.) More important than the cosmetic care of the complexion is its physical care. To keep the face clean, fresh, youthful, there's nothing better than common mercurized wax. It absorbs the soiled or faded worn-out skin particles. Using cosmetics simply adds unwholesomeness to the complexion. That's the difference. By all means, acquire the mercurized wax. It's so easy to get an ounce of the wax at the druggist's, apply at night like cold cream and wash it off next morning. There's no detention indoors, the old skin coming off so gradually no one suspects you're using anything. When in a week or two the alluringly youthful, resplendent under-skin is fully in view—well, you won't want, or need, a make-up complexion after that.

For obstinate wrinkles, a face bath made by dissolving an ounce of exfolite in a half pint witch hazel, surpasses massage cream for results.—Adv.

"Just Say" HORLICK'S

It Means Original and Genuine MALTED MILK

The Food-drink for All Ages. More healthful than Tea or Coffee. Agrees with the weakest digestion. Delicious, invigorating and nutritious. Rich milk, malted grain, powder form.

A quick lunch prepared in a minute. Take no substitute. Ask for HORLICK'S. Others are imitations.

Fine String of Bass Caught in Missouri River Near Decatur

The disciples of Old Ike Walton have always been saying that black bass would not live in muddy water," remarked "Doc" Williams of Decatur, Neb., who was in the city Sunday, stopping at the Rome. "but I know that they will."

"Decatur," continued Mr. Williams, "is on the banks of the Missouri river, about the muddiest stream that ever flowed. Being something of a fisherman myself, I know what I catch when I go out angling. Last Friday I was out on the Missouri fishing for skipjacks and was

using a small spoon, with a red feather above. Casting over into a eddy, I got a strike that almost pulled me out of the boat. Realizing that I had a whale, I let it until it was tired. Then I reeled in and with my landing net, brought over as pretty a black bass as you ever saw. It weighed a little over six pounds. Encouraged by my success, I cast around in that eddy two hours, at the end of which time I had fourteen black bass in the bottom of the boat, none of them weighing less than four pounds and one of them tipped the beam at six pounds and five ounces.

"Where those bass came from is a puzzle. They were never planted in the river and my judgment is that they just grew there. Of course they might have run down from some of the small streams

and could not find their way back, but they were in the Missouri alright when I caught them.

"The finding of bass in the Missouri leads me to believe that if the government would stock the stream, in a few years it would become the most famous fishing water in the world. It is so large that it would furnish room for the whole of the west and the current is so swift and so deep that the anglers could not exterminate the fish."
