

The Chicken Always Lays a Golden Egg That Hatches a Select Brood

KEIPPER COLLAPSIBLE COOPS

Unsurpassed in Quality
POULTRY, PIGEON AND PET STOCK FRONTS OF EVERY DESCRIPTION
Keipper Collapsible Coops are constructed entirely of galvanized wire. Each compartment has a sliding door. All the work of setting up coops is done away with. These Keipper coops can be folded, when not in use, so they take up but little room. See the Keipper Coops at the United Fanciers' Exposition.

The Keipper Cooping Company
1401 First Street Milwaukee, Wis.

CHICKENS CUT LIVING COST

Home Flocks Mean More and Better Products for Table.

FOOD SURPASSES THAT OF BEEF

In Proportion to Cost, Fowls Have Proved, by Test, that They Give More to Table Than Do Cattle.

Meat of some kind is an essential part of the daily bill of fare of the average American family. Foreign nations express surprise, not unmixed with envy, at the amount of meat used by Americans in all walks of life. The habit of meat eating is a firmly fixed national characteristic. It will change only under stress of circumstances, even though our vegetarian friends insist that it would be to our advantage, both physical and financial, to leave meat entirely alone.

Fear has been expressed of late that present economic conditions will compel a readjustment and that the average family will be forced to cut table expenses. It cannot be denied that the problem of properly feeding the family on the average income is becoming more complicated, that the margin between weekly receipts and expenditures is constantly decreasing, and that the question of ways and means to keep things running on the old basis is a serious one. It is right here that the American hen steps in and offers to shoulder a portion of the burden. The amount of the load that she can carry depends entirely upon the opportunities afforded her. She cannot do the work alone; she must have intelligent co-operation. It will be our endeavor to point out in these contributions how advantage may be taken of the hen's adaptability; how to use her to cut down living costs; how to house, feed and manage her in order to secure the best results with the smallest expenditure of time, labor and cash.

First, it must be recognized that poultry meat at current prices is not luxurious; it is a staple. Laying aside the elements of palatability and ease of digestion, both very important, the fact remains that at current market prices certain classes of poultry products are the cheapest meat foods when considered on the basis of money cost, amount of waste and the digestible nutrients which they contain. Naturally, this does not apply to the best grade of table eggs, at the prices which maintain during the late fall and winter months, nor to such delicacies as early broilers, spring roasters, winter squabs, green geese and ducks, pheasants and other poultry specialties of similar grade. However, this point is clear—many of these luxuries can be produced on the city or suburban lot at a cost so small that they may, with economy, be used on the family table.

The beginner must expect to devote considerable time and thought to the work, must gain wide experience, before he can hope to make a name as a breeder or establish a trade of this kind. However, the opportunity exists and it is one of the things to look forward to as a possible development. The possibility will serve to maintain the interest and make the daily work less of a drudgery. In the vast majority of cases the family flock will best serve its purpose when managed with a view of producing for the home table, at lowest possible cost, the largest number of fresh eggs and tender chickens. The person who starts on this basis is safe. If later experience indicates the desirability of developing the fancy end of the business, this can be done with but slight chances of making serious mistakes.

meet the actual expenses of the plant so the home supply costs nothing but the spare time and labor devoted to the work. In exceptional cases small plants operated on extensive methods do much better than this, actually turning in a handsome profit. Occasionally they afford the sole means of support of the owner and his family.

The preference in these money-making intensive plants must not be misunderstood. Any considerable financial profits from them are not, as a rule, made from the production of table eggs and poultry, because the total output of these must of necessity be comparatively small. In other words, the volume of business is too limited to permit one to make any very large profits. For really large returns, one must depend upon quality rather than quantity, selling the birds for breeding or exhibiting purposes and the eggs for hatching at prices much in excess of market quotations. It is evident that the sale of a dozen eggs at \$3 or a cockerel at \$5 gives a greater margin of profit than the sale of the same things at current market rates. The prices quoted are not at all visionary. Thousands of breeders are regularly receiving more than this for eggs and stock.

It is frequently found that objections to chickens are based on the existence of conditions which are never found on properly conducted plants. The houses need not and should not be unsightly, unsanitary or filthy. They may be made attractive and they must be kept sweet and clean if the best results are to be secured. The adult fowls may be kept entirely out of sight, the only sign of their presence being their reports. Aen eggs have been deposited in the nests.

Heavy egg production is frequently secured when the birds are kept confined in clean, well ventilated houses, never stepping on the ground during the entire year. Yards are desirable, but are not a necessity, excepting for growing chicks. As a matter of fact, on extremely restricted areas the land might better be used for houses to accommodate a few more birds than divided between house sites and yards.

Objection to the noise made by fowls refers almost exclusively to the crowing of the males, the presence of which is unnecessary and undesirable in flocks that are carried solely for the production of table eggs. The male is a disturber and although a consumer, he is not a producer. He may well be dispensed with in all but the breeding pens. There is a widespread idea that flocks of hens without males will not lay well. This is not founded on fact, as some of the best egg records have been made by pens of hens which have never had a male bird kept with them.

If the objecting neighbor is reasonable, these considerations will probably smooth matters out and enable one to proceed with this plan, especially if there is a probability of a few fresh eggs being slipped across the fence occasionally.

In perfecting plans for the establish-

ment of a home flock one will do well to carefully study conditions surrounding his particular case and proceed accordingly. The amount of space available, the exposure, the character of the soil, the available funds, all have an important bearing on the subject. The best advice is to begin on a small scale, keeping only a few birds until experience warrants expansion. Following this plan, one invests but a small sum, and any errors can be corrected without serious loss.

But try out the idea in some way and learn how fresh eggs and properly grown chickens really taste. Some one has said that it would be better for the American people to eat "more chickens and celery and less hog and hominy." There is much truth in this. Test it. But grow your chickens and celery at home if you can possibly arrange to do so. Convert the waste from your table into food that costs good dollars to purchase.

Creighton Warriors Do Practice Stunts

The Creighton varsity squad held its first real scrimmage of the year on Creighton field Monday afternoon. Coach Miller, himself, played with the scrubs and together with Levy did most of the gaining. The forward pass and long end runs were tried repeatedly against the varsity, but they put up a stubborn defense. The scrubs managed to get away with one touchdown on a long forward pass to Levy.

For the varsity Miller ran the team in "fast" style, while Collins made gains through the scrub line. Casey at tackle repeatedly broke through and tackled the man with the ball.

After the varsity scrimmage the Creighton High scrimmaged for a short time with the scrubs. Many alumni of the Creighton Medical department are in town to attend the special alumni clinic now being held at St. Joseph and Nicholas Senn hospitals. Clinics will be held every morning this week and cases will be presented to the alumni by prominent doctors.

BESSIE SUBMITS HIS REPORT

Scoring of Omaha Dairies Show a High Quality of Milk.

SPANGARD LEADS THE LIST

Majority of the Distributors of Milk Are Able to Show Scores that Go Above Eighty Per Cent.

The dairy of C. Spangard holds high score among the unclassified dairies of the city, according to the report of City Dairy Inspector Bossie on cleanliness for the month of September. His report made to the health commissioner, R. W. Connell, follows:

CERTIFIED DAIRIES

Arwood Dairy Company	94.6
Friesland Farm	94.0

Fight is Averted in Juvenile Court

A free-for-all fight was narrowly averted in juvenile court, and one man was sentenced to one day in jail as a result of the commitment of a boy to the State Industrial school.

Chester White was committed to the school because he was found to have contributed to the delinquency of a 14-year-old girl. Donald L. White, the boy's brother, flew into a rage and asked Judge Kennedy if he had any children of his own. He said he had.

The brother of the erring boy then raised his hands in the air and with an oath said: "Then I hope that every one of them—" He was interrupted by Juvenile Officer Bernstein, who, thinking he meant the court physical harm, leaped upon him. White's wife, thinking Bernstein meant to beat her husband, pounded the juvenile officer. When order was restored the court sentenced White for contempt. He apologized.

We Want AN AGENT To Handle BUCKEYE INCUBATORS In Omaha and Vicinity

MR. DEALER
Here is a line of incubators that will enable you to outsell your competitors five to one—that's what our agents do in other cities—because you have both the quality and price to back you up.
Buckeyes have been the best hot water incubators for twenty-two years. They are made in five sizes with a capacity of 60 eggs to 350 eggs. They are sold as low as \$8.00—and every Buckeye, regardless of price, is guaranteed to hatch every hatchable egg.
You can't beat that combination, Mr. Dealer, and you have only to show the Buckeye in competition with other brands to get the business. Even a novice can see the difference. Write today and let us tell you all about Buckeye incubators, and how you can handle them at a handsome profit. We will give an exclusive agency to the right party.
MR. CONSUMER
We'll gladly send you a catalogue upon request, and all orders received before we place an agency in Omaha, will be shipped by prepaid freight at the same prices our agent would charge.

The Buckeye Incubator Company
SPRINGFIELD, OHIO.

GERMOZONE

Make and keep your fowls healthy. Give them good appetites, good digestion, good feeling. The way lies through GERMOZONE

You will never be troubled with contagion in your flock if you place Germozone in the drinking water twice a week. Germozone is unquestionably the world's greatest poultry medicine, a bowel regulator, conditioner and tonic.

It prevents and Cures Roup, Cholera, Bowel Troubles and all Common Poultry Diseases.

Thousands have tested and proven the great value of Germozone. You cannot afford to be without it. Cost is nothing compared with having all healthy, vigorous fowls. Leading poultry supply dealers everywhere sell it. Liquid or tablet form.

Price 50c

Give Your Hens a Chance

Make heavy layers of your hens by feeding **Lee's Egg Maker**

Don't depend alone on the grains you are feeding. They are ideal for growing and fattening, but they are not egg makers. Lee's Egg Maker is a highly concentrated protein food, the very stuff eggs are made of. One pound is equal to 16 lbs. of fresh meat. Hens crave it because it is the most perfect substitute for the bugs, worms and grasshoppers which they devour so greedily. And you know that bugs and worms are nature's way of supplying protein to hens to make eggs.

25c and 50c Pkgs. 25 lb. Pails \$2.00. 100 lb. Drum \$7.00. Special prices on larger lots.

"Lee's Chicken Talk," a practical poultry book for all poultrymen is free to you. Write for copy.

GEO. H. LEE CO., 1133 Harney St., Omaha, Neb.

KENTUCKY LIZ IS MARRIED IN THE BLUFFS

Nance Willbert, better known as "Kentucky Liz" Mortimer, proprietress of a "bath house," was married to Jirah P. Page of Decatur, Neb., in Council Bluffs Monday. She is 37; he, 67.

The pair tried to secure a marriage license in Omaha last Friday. Clyde Sundblad, clerk of the county court, refused to issue the license because the old man was drunk. Instead of returning for the license when Page was in a better condition the pair went to Council Bluffs.

Jersey Campaigner to Appear Neutral

Governor Woodrow Wilson is to speak on a nonpartisan subject to 300 members of the Commercial club at the luncheon to be given Saturday noon in the club dining rooms.

Admission will be by ticket only and the number of tickets to be sold is limited to 200. Tickets will be on sale until 5:30 Friday evening.

Only members of the Commercial club can secure them. No tickets will be sold Saturday.

Senator G. M. Hitchcock will preside at the meeting.

COMMERCIAL TEACHERS MEET HERE IN NOVEMBER

The Missouri Valley Commercial Teachers' association will this year hold its annual meeting in Omaha November 29 and 30. This will be the first time the association has come this far north for its annual meetings, as the former meetings have practically all been held in Missouri and Kansas, where the bulk of the membership is. The association includes the commercial teachers of the states of Missouri, Oklahoma, Kansas, Iowa and Nebraska. The personnel is made up of the teachers of the commercial schools of these states. About 250 are expected to attend the meeting.

"It is a pleasure to tell you that Chamberlain's Cough Remedy is the best cough medicine I have ever used," writes Mrs. Hugh Campbell of Lavonia, Ga. "I have used it with all my children and the results have been highly satisfactory. For sale by all dealers—advertisement."

The Diamond Egg Carrier

It is an exhibition at the Fanciers' exposition, ten of these boxes are offered as prizes, five to the exhibitor winning points in the Plymouth Rock class and five to the exhibitor winning the most points in the Orpington class. These packages are so small they can be packed.
