There is no one "Bell Company," but the Bell System is made up of several operating companies, each giving service within a definite territory, and the American Telephone and Telegraph Company, which operates long distance lines connecting the various local companies.

The American Telephone and Telegraph Company assists in financing the whole Bell System, and aids and directs in the introduction and development of ideas and systematic plans and inventions, so that the most satisfactory equipment and practices may be made uniform throughout the country.

The Bell policy has made possible one method, one system and nation-wide transmission, with the result that Bell service has become the standard of the world.
