Prosperity is a happy state. It depends upon good credit, stable prices, employment of wage earners, and it general confidence in the future.

Of late there seems to have been an unnecessary amount of business depression, due mostly to the tack of fairness of one class toward snother, and to a little dishonesty or evergrasping scattered through all the classes, but not in a majority of any of them.

In a country of our enermous natural wealth, we should have little toworry about. Our land is liberally stocked with almost every variety of mineral wealth, and with our vast agricultural wealth, and with our vast agricultural wealth we lead the world in a great many things.

When corporations are renovated and their ills aired by publicity, and when business men begin to feel a renewed confidence, and when political "curalis," who have never made a success of their own affairs, guit offering "remedies" for all sorts of imaginary troubles; whon we have full publicity in politics and in government; when business managers and employees treat each other fairly, the causes for apparent depression will disappear and real prosperity will return and stay with us.
