### UNIVERSITY CLUBS ADVERTISE SCHOOL

ive Attractions Visit the Various Towns of the State During Week:

BIG ROAD SHOW ONE OF THEM

The work of the University Week association of the University of Neuruska during the last month has done much to advertise that institution. During the spring holidays five attractions made up of the major student activities of the school were sent to David City, Scward and Osceola. The attractions included the military band of thirty members, the glee cith of twenty-four, the dramate club with twenty members, a road show with thirty young men and women and two faculty lecturers.

The organization of the University Week association and the work of preparing the schedules and programs is credited to the members of the Innocents, an honorary senior society of the university. Last year the band made a very successful tour of the state, and this apring plans were made by the inmocents to organize several attractions and send them out over the state. In order to carry out the work more successfully it was decided to form a permanent association which would make extension week a yearly affair. The authorities were consulted and a committee of the Innocents was appointed to draw up a constitution and by-laws. At a meeting of the Innocents, Black Masques and faculty members, a permanent organization was perfected. The following were elected as members of the executive committee: Homer G. Hewift, Russell F. Clarke and Frank S. Perkins, from the Innocents; Margarutte Farley, Gladys Well and Lorenz Blaby, from the Black Masques; Guy Reed, Dean Mary Graham and Prof. R. D. Scott, from the faculty. T. C. Williams was appointed by the chancellor as permanent sceretary of the organization. He is an exofficio member of the committee. At a cting of the executive committee Russell F. Clarke was selected as president, Homer G. Hewitt senior manager and Darius Lane junior manager. The programs given in the

Faculty Lectures.

Dr. Lucile Eaves of the political science and sociological department of the university and Dr. George Condra of the Nebraska conservation desartment lec-tured in the different towns on the trip. Dr. Ecaves gave her lecture on the "Public Playground and Recreation Movement in Cities." A series of slides from the Russell Sage foundation were used to illustrate her lecture. Dr. Condra's work consisted of a series of moving pictures showing the industrial reurces of the state and a few films of the university and its environment.

Within the next few weeks the association plans on sending out literature to the cities and towns of the state, explaining the work of the association and how the various attractions may be secured for engagements. Next year the association plans to conduct a regular lyocum ureau in which the various activities of the school will be called up to supply the talent. The University of Minnesota has worked out a system for supplying attractions from the state university to cities and towns of the state and it has proven to be quite an advertising feature for the institution.

There are eight Omaha young men who ere members of the organization that

In these modern days of heavy armament and scientific war equipment, much thought has been given to our coast de-

to be prepared by always keeping a bottle of Hostetter's Stemach Bitters in the house. It is your butwark in time of dis-

HUDSON Six-40 \$1550 7-Passenger

Phaeton

3-Passenger Roadster

## Next Year's Value What Will It Be?

This new-type HUDSON is the car for men who are seeking stable value.

High-priced Fours have dropped immensely in value since class buyers came to Sixes.

Heavy cars are almost bygones. Refinement and lightness are in vogue.

Light Sixes are the cars of the future. They dominate now in the class field. There are ten times as many as last year. But the HUDSON-the original-the result of

four years of refinement-is more stable than a new A design by Howard E. Coffin-the top-place

designer-is more likely to be final than another man's new model.

And the HUDSON name and standing give permanence to HUDSON values.

#### A 25-Million-Mile Car

The HUDSON S(x-40 may today be called the 25-Million-Mile Car. Over 10,000 owners, in the past two seasons, have driven it at least that far.

What one says all will say. The car has proved

It is a finished product. Our whole engineering corps has spent four years in refining every detail. Motorists today can see no way to add further im-

This car has a staple value. It shows the coming type perfected. Inside and outside, every part and detail shows the final touch.

And HUDSON service gives it added value, We never lose sight of these cars. Come see if you agree.
