**PURE SEED LAW IN FORCE**  
Food Commissioner Harman Details Provisions that Apply in Nebraska.  
ADVISES ANALYSES BE MADE

(From a Staff Correspondent.)  
LINCOLN, Jan. 24.—(Special.)—Information regarding the new seed law is being given out by Food Commissioner Harman and contains some information interesting to those who are connected with the handling of forage seed. The information is as follows:

The last legislature re-passed the pure seed law so that now it is separate law, but with the exception of a few minor amendments, contains the same provisions as the original act. The principal requirements of the law are as follows:

Every parcel, package, or lot of agricultural seeds as defined in this act, and exposed for sale in the state of Nebraska, or within this state, shall have affixed thereon, in a conspicuous place, on the outside thereof, distinctly printed in English language in legible type, not smaller than 12 point, the following: Gothic caps, or plainly written, a statement certifying:

First, name of seed.  
Full name and address of the seedman, importer, dealer or agent.

A statement of the purity of the seed contained, specifying the kind and percentage of the impurities. Provided that the seeds are below the standard fixed in the act.

Locality where seed was grown when analyzed.

Bulletins will be mailed upon request, covering the full text of the law. Samples of seed for analysis should be forwarded to the food, drug, dairy and oil commission, Lincoln. The law fixes a small charge of 10 cents for making the analysis of the sample seed, both as to purity and germination. The fee should accompany the sample.

On account of the shortage of Nebraska alfalfa seed all persons purchasing this kind of seed should have an analysis made as many states do not have pure seed laws and this seed must necessarily come from other states this year.

CHIEF ALFRED SAM HELD ON MANSLAUGHTER CHARGE  
NEW YORK, Jan. 23.—"Chief" Alfred T. Sam, who with a party of about sixty negro followers, sailed from Galveston, Tex., two years ago on the steamship Liberia for the gold coast of Africa, where he proposed to set up a negro colony, is being held by the British authorities in Africa on several charges, chief of which is manslaughter, according to Mrs. William H. Lewis of Galveston, a member of the party, who arrived here today on the Cymric from Liverpool.

On the voyage from Galveston to the gold coast, which was reached about the middle of November, 1914, several of the passengers and crew of the Liberia died from scurvy, among them Mrs. Lewis' husband. Upon these deaths is based the charge of manslaughter against "Chief" Sam, according to Mrs. Lewis, who added that the promised reception in Africa had not been arranged and that the natives were apparently hostile. Mrs. Lewis on her arrival in England was deported to this country.

**Frank P. Walsh Says Labor Must Work Out Its Own Emancipation**

INDIANAPOLIS, Jan. 24.—Speaking before the convention of the United Mine Workers today, Frank P. Walsh, chairman of the new committee on industrial relations, declared that if labor is to be emancipated, it must do the work itself. Only in complete organization can labor find protection, he said.

He asserted the federal commission in

**SPECIAL SESSION IN DAKOTA**  
Plan Now Proposed is to Change Law Fixing Date for Primary Election.  
SOLUTION OF DELEGATE TANGLE

SIOUX FALLS, S. D., Jan. 24.—(Special.)—It is believed that in the near future a solution will be found for the difficulty which for some weeks has confronted the republicans of South Dakota as to how best to provide for the selection of delegates to represent the republicans of the state at the republican national convention in Chicago.

There is no doubt that during the last few days sentiment in favor of the calling of a special session of the state legislature for the purpose of amending the primary election law of South Dakota has been growing, and it now is practically assured that Governor Byrne will in the near future call such a special session.

It is proposed to change the date of the primary election from June 6 to some date in April or May, and provide for the holding of just one primary election throughout South Dakota, at which the different parties can elect their delegates to their national conventions and select their nominees for congressional, state and county offices. The cost of a special session of the legislature would be only about \$6,000, which would cost the residents of South Dakota only about 1 cent each. Owing to the minimum expense, a special session of the legislature now is believed to be the only solution of the primary election difficulty.

NAVY ASKS THIRTY THOUSAND FOR COLLECTION OF INFORMATION  
WASHINGTON, Jan. 24.—Paymaster General McGowan of the navy told the house naval committee today about the purpose of a \$35,000 appropriation the navy wants for "collection of information at home and abroad." He said the sum included the expenses of naval attaches at London, Berlin, Vienna, Rome, Petrograd, Paris, Buenos Ayres, Tokio and Peking. The information sought "at home," he said, "was as to available ships, sources of supply, resources of various kinds," information, he said, of great military value.

"Every government has attaches at the other government capitals to find out what the other government does not want them to know" asked Representative Henley.

"I wish we knew more here about what they are doing abroad," remarked the witness.

"You need twice as much money for spying than last year!"

"We need twice as much for acquiring information."

**Rebels of Yunnan Pledge to Protect All Foreigners**

PEKING, Jan. 24.—Tung Chi-Tao, who has been appointed military governor of Yunnan by the rebels of that province, and Jen Kao-Tsang, the civil governor under the rebel regime, sent letters today to the legations at Peking respecting the conduct of affairs by the republic of Yunnan, the existence of which was proclaimed last month by the revolutionists. The letters state that Yunnan republic will respect all Chinese treaties, agreements and obligations which antedate the movement for restoration of the monarchy and will repudiate all others. The legations are warned that the republic will confiscate contraband destined for the government of President Yuan Shi Kai.

"The request is made that the powers remain neutral in the struggle between the revolutionists and the government of Yuan Shi Kai. Protection for foreigners is promised."

**City Wants Schools to Bear Half Cost of the Inspection**  
The city council will invite members of the Board of Education to meet at 10 o'clock today for consideration of the plan to induce the school officials to bear half of the expense necessary on account of an epidemic.

"There has been some friction between school and health officers. What medical inspection has been done in the schools has been forced by the health commissioner. There has been a jealousy as to control of the health of the children. The control of this epidemic rests upon efficient inspection of the schools," said Dr. Millard Langfeld at a conference in the city council chamber.

Director Paquin of public health, Kansas City, told the city commissioners that in his city school and health officials now act in harmony, with the health board in full control of medical inspection and the school board paying half of the expense of inspection.

Member Holovitchner said he did not believe the Board of Education could legally spend money for medical inspection.

Dr. A. D. Dunn said: "Closer inspection of schools is necessary, and I would urge keeping children away from picture shows and other public places."

Commissioner Butler contended the school district should bear half of the expense.

Sanderfeld was a veteran of the German army.

**Hopes Women Will Adopt This Habit As Well As Men**  
Happy, bright, alert-vigorous and vivacious—a good, clear skin; a natural, easy complexion and freedom from illness are assured only by clean, healthy blood. If only every woman and likewise every man could realize the wonders of the morning inside bath, what a gratifying change would take place.

Instead of the thousands of sickly, anemic-looking men, women and girls with pasty or muddy complexions; instead of the multitudes of "nerve wrecks," "run-downs," "brain fags" and "peevishness" one should see a virile, optimistic throng of rosy-cheeked people everywhere.

An inside bath is had by drinking, each morning before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and ten yards of bowels the previous day's indigestible waste, acid fermentations and poisons, thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Those subject to sick headache, biliousness, nasty breath, rheumatism, colds; and particularly those who have a pallid, sallow complexion and who are constipated very often, are urged to obtain a quarter pound of limestone phosphate at the drug store, which will cost but a trifle, but is sufficient to demonstrate the quick and remarkable change in both health and appearance awaiting those who practice internal sanitation. We must remember that inside cleanliness is more important than outside, because the skin does not absorb impurities to contaminate the blood, while the pores in the thirty feet of bowels do.—Advertisement.

**News from the Home of the Coffee Bean**  
Mr. Frank G. Carpenter, noted correspondent, writing from Santos, Brazil, said to be the chief coffee port of the world—in an article in the Los Angeles Times of Oct. 30th, 1915, says:

"The people here believe in coffee. They talk nothing else and as they talk they drink. They drink so much of this beverage that they grow sallow, and the muscles of their faces twitch continuously. When one of them sits in a chair, resting his toes on the floor, his knees bob up and down with nervousness, and the whole system seems afflicted with St. Vitus' Dance."

Very interesting!  
And what, pray, is there in coffee that makes people sallow and nervous? The drug, caffeine—about 2½ grains to the average cup—a powerful irritant of the nerves and delicate tissues of the body.

Of course not everybody is affected so severely. But caffeine is a cumulative poison, and sooner or later it gets in its work with many users—slowly with some, faster with others.

Is it wise to tamper with such a menace to health? By far the better way is to leave coffee alone, and for a pleasant, delicious table beverage use

**To Keep Skin in Fine Condition in Winter**  
It would be much better for the skin if little cream, powder or rouge were used during the winter term. These things which clog the pores, tend to add wind and weather a roasting and coarsening of the skin. Ordinary mercerized wax will do more for the complexion, and without encouraging the skin to chap, crack or become leathery and leathery. It is the ideal application for the season, as it not only keeps the skin clear, but daily removes particles of scurf skin which have been spotted by winds or temperature. By constantly keeping the complexion clear, white and soft, it does more toward perpetuating a youthful complexion than any of the artificial artifices commonly employed. One ounce of mercerized wax, obtainable at any drug store, will completely remove the worst complexion. It is applied at night like cold cream and washed off in the morning.

To keep the skin from wrinkling, or to overcome such condition, there's nothing better than a face lotion made by dissolving a ounce of powdered axolite in 1/2 pint with Lazel.—Advertisement.

**TODAY'S BEAUTY HELP**  
It is not necessary to shampoo quite so frequently if your hair is properly cleansed each time by use of a really good shampoo. The easiest to use and quickest drying shampoo that we can recommend to our readers may be prepared very cheaply by dissolving a teaspoonful of camphor, obtained from your druggist, in a cup of hot water. This rubbed into the scalp creates a thick lather, soothing and cooling in its action, as well as very beneficial to scalp and hair. After rinsing, the scalp is fresh and clean, while the hair dries quickly and evenly, developing a bright luster, and a soft stiffness that makes it seem very heavy.—Advertisement.
