Former Member of Crew of Imperator Arrested Here

When examined by the federal authorities he stated that he had been a member of the crew of the interned German steamer, "Imperator," but he said he arrived in New York a few months before the beginning of the war. He was in this country twelve years and had been back to visit relatives in Germany in 1914, working his way on the "Imperator" as a coal passer.

I have something wrong with my head the last few months. I suffer horribly sometimes. I do not know what it is. No, I do not know who will win the war. No, I do not want to be in the German army."

Sweden Sells to Germany And Buys Back of U. S.

Washington, July 9.—An official report just made to the American government showing the extent to which Sweden is furnishing supplies to Germany, reveals that the central powers are receiving enormous quantities of materials that go directly into the manufacture of munitions.

In exporting iron ore to Germany, Sweden, it is shown, has supplanted shipments with imports from the United States.

What this government will do to end this trade through operation of the export control act has not been announced, but some of the allies it is known that during the United States to license no food exports to Sweden until a definite understanding has been reached with the Swedish government concerning its exports to Germany.

Iron ore shipments from Sweden to Germany, the report made to this government declares, have reached a total of 9,000,000 tons in the last two years, representing an amount equal to Sweden's entire pre-war export.

Need Half Billion Dollars More to Build U. S. Ships

Washington, July 9.—Another appropriation of half a billion dollars for shipbuilding probably will be asked of congress immediately by the administration. Contracts already let and about to be closed, the shipping board announced tonight, have absorbed the first \$500,000,000.

Announcement of the intention to ask for a second appropriation was contained in a statement issued tonight by Chairman Denman of the shipping board, which carried the intimation that the second sum may be used largely for wooden construction.

"The vast resources of quick wood construction," it said, "are still far from exhausted and we believe more steel contracts can be placed. We need wooden vessels of both slow and fast speeds. The slower can relieve our coastwise congestion and our car shortage. Many wooden ships can be built which are faster than the majority of the vessels now crossing the war zone."

INDIVIDUAL EFFORT THING THAT COUNTS

Rev. Mr. DeLarme Points Out the Cardinal Virtues of the Finished Man of the World.

Individual morality and its relation to the communities and the nation, was a thought that was expanded by Rev. A. A. DeLarme at the First Baptist church Sunday.

"The Unfinished Man Finished" was Rev. Mr. DeLarme's text. He referred to the race riots in East St. Louis as evidence of a community whose morals was of a low standard.

"If we would behold a finished man in the sense of my text, we would see a man in whom the cardinal virtues are well grounded," said the minister. "These virtues, we know, include integrity, faith in Christ, moral courage to stand for the right on any and every occasion. To the extent that a community has men and women of those attributes, to that extent will any community have a morale that will withstand the storms and tempests of riot, race hatred and other disturbing elements. And to the extent that a nation has communities whose moral atmosphere is wholesome, to that extent will a nation be strong."

The minister urged every individual to do his or her part in making this community and this nation strong in morality and all of the desirable attributes. He emphasized "that, after all, it is the individual effort that counts, because a community or a nation is made up of individuals."
