

Safety First

Today is the Careful Workman's Opportunity

EVERY industry and every factory is looking for the careful workman; every industry is looking for him because he is the efficient worker. The careful workman is not a chance-taker, he is not only looking to his own safety but also to the safety of his fellow workman. He knows that every accident has a removable cause and he strives to remove the cause and prevent the accidents--the careful workman is the man who works with a song on his lips and love in his heart--he is the man who is promoted and becomes a success in life.

The Wife Has a Tremendous Opportunity to Promote Her Husband's Welfare

Therefore wives should gently encourage their husbands to be sober, careful and saving. Wives should make their homes tidy, clean, comfortable and cheerful. The old motto, "*The way to reach a man's heart is through his stomach,*" holds good as a safety first principle in the home. The wife who can make the husband think of her while he is at work has done a lot to make him a safer man.

SAFETY HINTS

For Every Member of the Family

Fathers

Be cautious in your work; remember the dependent family at home.

Mothers

Caution the working members of your family to be careful. Keep constantly at it. Hammer home "Safety First" in all its phases and you will make this movement permanently successful and protect the rank and file from their greatest enemy---carelessness.

Sisters and Daughters

Urge your brothers and fathers to do everything in the safe way. An accident to them may mean that the whole family will suffer. Help to brighten the home---think right, speak kindly and smile.

Young Men

Careless methods used now may mean total or partial disability to you for the rest of your life. Learn to do everything in a safe way. It will be valuable to you as you grow older.

This Campaign is Supported in the Interest of the Public by the Following Manufacturing Companies, Firms and Public Service Corporations

American Smelting and Refining Co.
Alfa Butter Co.
