

# FEED U. S. FIRST, ALLIES SECOND

### President Wilson Considering Plans for Regulation of Exports With This End in View.

(By Associated Press.) Washington, July 28.—A plan for rationing the northern Europe neutral countries was put before President Wilson yesterday by the exports council.

A general policy of supplying America first, the allies second and the neutrals last was announced by the president in his proclamation putting the export control into operation, but no specific policy has been adopted. At present no licenses are issued for shipment of goods to the northern neutrals. A large number of Scandinavian ships, loaded with foodstuffs, is awaiting permission to sail.

The American government has no intention of attempting to stop all neutral trade with Germany, but will put an end to reshipment of American goods into enemy territory. Gradually the export control will take the place of the British system of letters of assurance.

### Neutral Ships Wait.

Baltimore, July 27.—Eighteen neutral ships loaded with grain are anchored off this port with 96,000 tons of grain in their holds. Fifteen are Dutch and three Norwegian. Some have had their cargoes under hatches for a month awaiting a license from the United States government and letters of assurance from the British ambassador. The cargo of one neutral steamer consisting of grain was dumped overboard yesterday because it had spoiled. It consisted of about 7,000 tons of corn.

### More Than Two Million Tons Of Shipping Sunk, Says Cecil

London, July 28.—Lord Robert Cecil, the minister of blockade, discussed the shipping situation at length with The Associated Press today, touching particularly on the sacrifices incurred by Great Britain owing to the obligations imposed upon shipping as a result of the war.

"Ocean going vessels of British registry before the war were between 17,000,000 and 18,000,000 tons," he said, by way of introduction. "At present the total, inclusive of prizes and new ships, is slightly over 15,000,000 tons."

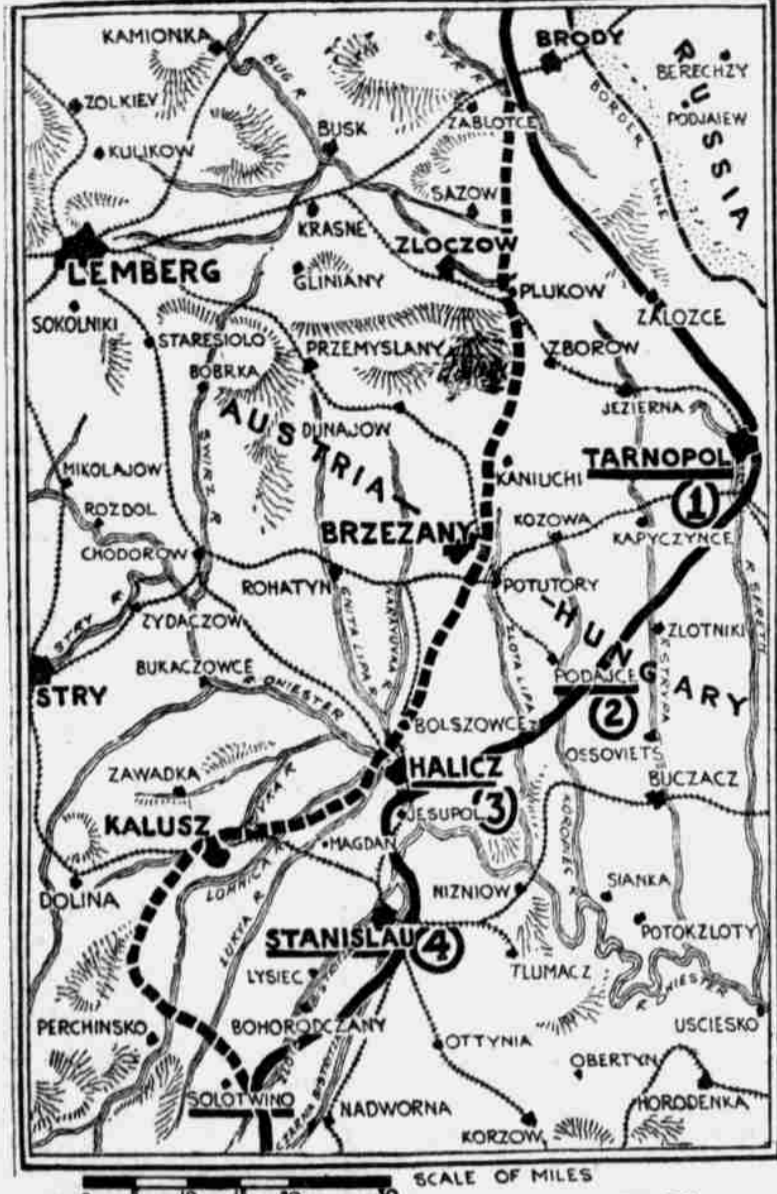

### CAMP DODGE SITE MUST BE CLEANED UP—MAJOR CRAFT

(Continued From Page One.) amount with the government in doing this work.

Governor Harding presided at the meeting. The city was represented by Mayor MacVicar and Superintendent Ben Woolgar, the county by County Auditor Frank Alber and members of the board of supervisors, and the state, in addition to the governor, by members of the executive council and the state board of health.

It was declared that the civil population tributary to Camp Dodge would develop to 135,000 people. This estimate is based on previous experience in big camps. The camp itself will have around 45,000 men. This will make possible, officials of the board of health declare, the transmission of contagion and infection to an unusual and alarming degree.

### ADVANCE OF TEUTONS AT STANISLAU—South of Tarnopol (1), the Germans forced their way over the Sereth river and succeeded in passing beyond Podajace (2) and Halica. This news was followed by the announcement from Petrograd that Stanislaw had been abandoned.

### PETROGRAD CALM, SITUATION BETTER

### Kerensky Disarms Rioters and Mutineers and Imprisons Extremists; Frontiers Closed Till August 15.

London, July 28.—Dispatches from Petrograd dealing with the military and political situation concur that Petrograd is outwardly calmer than it has been for months, which is attributed to Premier Kerensky's strong repressive measures, including the disarming of rioters and mutineers. Among the arrested extremists is said to be Madame Kollontai.

The ministry of justice is said to have issued a statement that it has clear proof that Nikolai Lenin, the radical socialist, and two of his associates, Zinovieff and Kameneff, were concerned in a German plot against Russia. None of the correspondents, however, mentions the arrest of Lenin.

### Internal Situation Improves.

The whole internal situation is said to show signs of improvement and, according to the Times, Odessa correspondent, it is generally recognized that the various domestic problems must now await the end of the war for solution.

On the other hand, this correspondent records the victory of the extremists in the recent re-election of the local executive of the council of workmen and soldiers' delegates. It is believed that the Germans themselves were disconcerted by the unexpected retreat of mutinous Russian troops near Tarnopol and lack sufficient forces at that point to take full advantage of the situation.

### Frontiers are Closed.

Petrograd, Friday, July 28.—The provisional government, in view of the existing exceptional circumstances, has issued a decree, closing the front-

iers of Russia until August 15 inclusive, both for persons desiring to enter and those wishing to leave the country. The only exceptions will be persons holding diplomatic passports and diplomatic couriers.

Premier Kerensky, referring to the situation in Russia said: "It is a spectre of anarchy which needs to be obliterated. Stout hearts and stern hands are required to stay the rout in the army. There is plenty of good material in Russia, but it has been allowed to go to waste."

According to the Gazeta, Lenin, the radical agitator, is being concealed in Kronstadt in the guise of a prisoner, by the maximilists.

On the battle front in Galicia, where the Teutons have been on the offensive, nothing of material importance occurred yesterday, according to the official announcement today. In the Carpathians, the Teutons attacked to the east of Kirlibaba and pressed back the Russian detachment.

### Teutons Continue Advance.

Berlin, July 28.—(Via London.)—On the front commanded by Archduke Joseph the Austro-Germans are nearing the Pruth plateau below Kolomea, in Galicia, the war office announced today. In the wooded Carpathians the Teutons have taken some high positions from the still resisting Russians.

General Boehm-Ermolli's army corps, the war office reports, has crossed the Jagliencia-Horodenka-Zablouow line in southeastern Galicia.

In the upper Putna valley the southern wing of the Austro-German army has retired to the eastern slope of the Bereczkei mountain before superior pressure of the Russians and Rumanians.

### Two Jap Steamers Sunk.

New York, July 28.—The Japanese freight steamship Kagoshima Maru, 4,555 tons gross register and the Shiguan Maru, 2,827 tons gross, were sunk by German submarines in the Atlantic ocean on July 20, according to cable advices received by marine underwriters here today.

### B. R. T. SWITCHMEN IN CHICAGO STRIKE

### Freight Traffic is Hampered and Embargo is Placed on Live Stock; Demand Closed Shop, Say the Managers.

Chicago, July 28.—Freight traffic in the Chicago switching district was seriously hampered today by the strike of the switchmen affiliated with the Brotherhood of Railway Trainmen, employed on nineteen railroads.

The dispute which led to the walk-out of the switchmen at 6 o'clock this morning is over certain demands which the railroads declare are equivalent to establishing a closed shop against all switchmen not members of the Brotherhood of Railway Trainmen.

Members of the Switchmen's Union of America, affiliated with the American federation, remained at work, and the railroads declared were aiding in filling the places of the strikers.

### One Accident Reported.

No violence was reported and the derailment of a passenger car in one of the yards was the only accident recorded. Police details were sent to the various yards and reserve held ready.

The railroads gave great attention to the moving of government supplies and the progress of the strike was closely watched by federal officials. District Attorney C. F. Clynne said that prompt action would be taken if government supplies or army materials were destroyed.

Federal mediation was a possibility, though intervention was refused yesterday before the strike was called.

### Embargo on Live Stock.

The general managers' conference committee, representing all the railroads affected, as soon as the strike was called, declared an embargo on

all shipments of perishable goods and live stock and notified shippers that it would be in force until the strike was settled.

Although the strike technically is local, it will have national scope to the extent that it may delay traffic on all transcontinental roads passing through Chicago.

James Murdock, vice president of the Brotherhood of Railway Trainmen, received early reports that the men had quit work at the appointed time. He said 3,400 switchmen belonged to the Brotherhood of Railway Trainmen in the Chicago district. The strike is the outcome of a demand of the men for certain changes in rules which the railways contended would establish a closed shop.

G. W. W. Hanger of the federal board of mediation said that he had been informed that the union leaders had voted not to mediate.

### Fourth of Men at Work.

Railway officials reported that more than 25 per cent of the switching force was at work today. Passenger service was said to be little affected.

Headquarters of the switchmen reported the 98 per cent of 6,000 switchmen employed by the nineteen roads quit work. It was further stated by Mr. Murdock that out of 1,408 switchmen unaffiliated with any union, 1,090 had voted to strike.

### Omaha Little Affected.

An embargo has been placed by the Burlington and Northwestern roads on perishables and live stock destined for Chicago. This is the result of the strike among railway switchmen in Chicago.

The Stock Yards company of Omaha expects to be notified officially also that the embargo is effective on stock billed to Chicago.

W. B. Tagg, president of the South Omaha Live Stock exchange said: "This embargo will have no great effect upon our receipts here, except that they may run a little heavier than usual. Probably quite a few shipments will come here from western Iowa that under ordinary circumstances would go to Chicago."

### American Army Is Safe in Some European Port

(Continued From Page One.)

other. When they are not hurling dummy metal missiles, they may be seen practicing with heavy stones, dummy shell holes having been constructed as targets. The Americans are wonderfully accurate and the French instructors are amazed at their skill, so easily acquired. This, of course, is due largely to base ball, although bombs are thrown with a straight arm swing quite different from the elbow motion of the base ball pitcher.

Word was received from headquarters today that the expeditionary force field bakery would be in operation within the next few days, supplying the soldiers with "home made" American bread. They have been living thus far on the regulation French war bread.

Representatives of the Salvation army arrived at headquarters today and will soon make arrangements to hold meetings in the various billeting areas.

### Climate Damp and Cold.

The headquarters staff has received from the French government meteorological data of the department in which the American troops are training and also for the part of the line in which the troops may eventually be employed. These figures show January is the coldest month of the

year, with a mean temperature of 33 degrees Fahrenheit, a maximum of 46 and a minimum of 5 above zero.

July is the hottest month, with an average maximum of 90 degrees and an average minimum of 45, the days being very warm and the nights quite cool. November, December, January, February and March are all cold months, with much rain and quite a little snow, so that preparations already are being made to protect the men as far as possible from winter hardships. The dampness causes the cold to be felt keenly, a temperature of freezing on this side being as uncomfortable and dispiriting as zero in most American latitudes.

### Movies and Band Concerts.

The hard work of troops in training has made the officers more keenly anxious than ever to provide wholesome amusements for them in their moments of leisure. They now have band concerts given by both their own and French bands and it is hoped soon to have moving pictures outfits available for every battalion. The suggestion has been made that war pictures such as the English film of the Somme battle and later pictures from that front should be shown to the men repeatedly, giving them an accurate idea of what actual fighting conditions are like.

It is now being planned to take both officers and soldiers to the French front in detachments from time to time so that they may see and study life in the trenches before they are actually called upon to take their places there.
