## NEW LINES LAID FOR STATE GUARD

Reorganization of State Troops Along Different Plan Made Necessary by Trench System of Warfare.

(From a Staff Correspondent.)

Lincoln, Neb., Sept. 2 .- (Special.) -Reorganization of the National Guard under new ideas will be affected under regulations which have reached the headquarters of the Nebraska guard.

The new organization will be made under the act of June 3, 1916, which provides "for more effectual provisions for national defense," and by the act of May 18, 1917, providing "temporary increase in the military establishment of the United States." It is pointed out that "trench war-

fare" has outgrown the older method of fighting and also that divisions are entirely to large for the present way of handling men. Therefore the in-fantry brigade will consist of but two regiments of infantry, a machine gun company and sanitary troops in place of three regiments of infantry.

The infantry line company under the new plan will be composed of a captain, three first lieutenants and two second lieuteants and will combose 250 men of which sixty-four are first class privates with eighteen sergeants and thirty-three corporals. The company will be divided into four platoons commanded by the lieutenants. In ach platoon are four sections, each section being drilled in a particular line of fighting. Present National Guard-organizations as soon as camps are ready for them will be brought under the new plan.
