Report Many Cases of Rheumatism Now

Says we must keep feet dry; avoid exposure and eat less meat.

Stay off the damp ground, avoid exposure, keep feet dry, eat less meat, drink lots of water and above all take a spoonful of salts occasionally to keep down uric acid.

Rheumatism is caused by poisonous toxins, called uric acid, which is gen-erated in the bowels and absorbed in-to the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine. The pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly, cold weather the skin pores are closed, thus forcing the kidnevs to do double work, they become weak and sluggish and fail to eliminate this uric acid, which keeps accumulating and circulating through the system, eventually settling in the oints and muscles, causing stiffness, soreness and pain called rheumatism.

get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of these impurities.
