CORRESPONDENCE Address communications relating to news and editorial matter to Omaha Bee, Editorial Department.

### MARCH CIRCULATION 66,558 Daily-Sunday, 56,553

Subscribers leaving the city should have The Bee mailed them. Address changed as often as requested.

Over the top, but not mished. Go to it!

Hoover urges us to eat more potatoes scarcely can be done.

Mayor "Jim" is home again, so the jockeying for start may commence.

Do not let the deadly grade crossing hide again until new victims call attention to it. Press it on the city council.

"Our line was reported intact on the whole roft," is the word Haig sends from the battlefield. Good old bulldog.

Our democratic county treasurer may think is tax books of greater importance than the Liberty loan drive, but he will hear from the voters a little later.

Visitors to the movies will do well to oberve local customs in matters of bestowing applause. Some of the home folks are getting mighty techy just now.

The city garbage question is again coming in or consideration. This is a point of city administration that may well occupy the thought of of the aspirants for commissionerships, It will not be settled right till it is taken over as a metion of government.

Br'er Edgar Howard has taken the plunge, urned his bridges, and is now enlisted for the ar, or till after the primaries. This may add ome interest to the primary proceedings in Neraska; at any rate it will give the Mullen-Hitchtock plotters something to think about.

# What Liberty Bonds Mean.

One of Omaha's oldest and most experienced ankers, answering the inquiry of a customer, old him the best investment extant today is Liberty bonds. A Nebraska man invested all is worldly possessions in the first and second ssues, and when the third drive came on found mself without means to purchase; he enlisted the army. There you have the spirit supportg the Liberty bonds in concrete form.

The banker says he knows of no interest or concern that takes precedence over the loan. The other man gave all his goods and then pledged his life. Arguments such as these are unanswerable. In them breathes the spirit of American liberty, the indomitable resolve to stablish and hold on to all the rights of freenen. While American people are so animated, ur institutions are safe, no matter by whom ssaulted.

We are facing the most formidable aggregaion of relentless force ever dedicated to destruction, but the men, who, maddened by lust of power, loosed that force on civilization are purblind, unable to conceive devotion to principle that will lead men and women alike to make the supreme sacrifice to maintain their freedom. Utterly out of touch with the real life of the world, the Potsdam gang made the stupid blunder conceiving that murder, rapine and destrucion could be substituted as governing forces of priety in lieu of justice and right. Even now hey seem unable to understand what the real nessage of the Liberty bond is: An end to brute orce as a factor in human government.

### STANDING BACK OF THE PRESIDENT.

President Wilson notes the inconsistency between his test of loyalty and the possible succession of Gilbert M. Hitchcock to the vacant chairmanship of the senate committee on foreign

Mr. Wilson not only is aware of the pro-German activity of the senator prior to the declaration of war, as evinced by the introduction of the embargo resolution, but readily must recall the visit to the White House when Hitchcock sought to dissuade the president from asking for a declaration of war. Not until he found that nothing he could do would prevent the declaration of war against Germany, did the democratic senator who misrepresents Nebraska desist in his efforts to save the kaiser from the destruction certain to follow America's entrance into the conflict.

This is why the president is opposed to Hitchcock's being made chairman of the committee, to succeed William Joel Stone. It is not because he is, as suggested by the dispatches, "independent," and that he will refuse to "obey orders," but because his loyalty at all times will not measure up to a test that has been established by the president himself.

The senate has a splendid opportunity to back up the president and serve the country at the same time by making Henry Cabot Lodge hairman of this most important committee. Such action will ensure the control of the committee in the hands of a man who is truly loyal, whose qualifications are unquestioned, and on whom the president can with confidence rely. Will the democrats support their professions of fidelity to the president by doing this?

### Germans Plundering Russia.

Loot is evidently the uppermost thought in the mind of the superman. Founded on the robbery of France, and held together by prospects of rifling the treasure chests of the world, the German empire has an unbroken record of robbery wherever it has been able to break through with its armies. Just now the record of Belgium is being repeated in Russia. Finland has been invaded, under pretense of restoring order; efforts are being made to seize the remnants of the Russian navy, although the treaty of Brest-Litovsk specifically provided that these ships were to be dismantled by the Russians and not become part of the German loot. Little seraps of paper do not trouble the kaiser conscience, though, and if these ships can be grabbed they will be made the first line of attack in an effort to break away from the strong blockade that has held the German navy helpless in its strongholds.

This, however, is the least of the offenses committed against decency and good conscience by the kaiser's wrecking crew. Rural Russia, penetrated through treachery, is overrun by armed parties of German soldiers, who are seizing farm animals, food and all sorts of moveables, leaving the wretched peasants helpless and destitute. Forced loans are levied on villages and terrible destruction follows resistance. Highway robbery and murder in all gradations are practiced against the unprotected mujiks, who thought in the Lenine peace they would find at least a chance to live, protected by their poverty. But no situation short of nakedness fails to tempt the greed of the heartless Hun.

No better illustration of the fallacy of nonresistance could possibly be afforded. "Our weakness is our strength," said Lenine, but the German regards the Russian peasant's weakness just as does the wolf that of the lamb. A helpless, nonresisting people is to be plundered to the last shred, all in the name of kultur. The kaiser is building a monument of infamy whose shadow will rest dark across Germany for many generations.

# Universal Service at Hand.

The action of the house military affairs committee in reporting for passage the senate bill extending the provisions of the selective draft law to include automatically all men attaining their majority since June 5, 1917, indicates a change of attitude on part of the administration. Chairman Dent of the committee held up the bill, awaiting word from Secretary Baker, to be given on his return. The sentiment back of the measure is of a nature that admits of no quibbling. It devotes America's man-power to the war purposes to which our country stands pledged. Under the restricted operation of the law, whereby those attaining the age of 31 passed out while none were coming in, the class subject to the draft was rapidly diminishing. Opposition to inclusion of those who came of age rested on the theory that its recognition would amount to endorsement of universal military training for America, against which the administration had set its face. What Mr. Baker learned in Europemay have helped him to change his mind, for the senate bill has been recommended for passage, and we are to have an army adequate to our

A correspondent asks the pertinent question of the school board as to how much longer High school pupils are going to be forced to study German. An answer to this query will interest a

## Why They Don't Go Back

The natural query has been of those who have been pro-German, both before the Inited States entered the war and somekaiser, why don't they go back there?" Some splendid reasons for not "going back there" have been advanced by the war, but even better ones remain behind.

Edward Mott Wooley, a magazine writer, has been comparing the wages of laboring men in Germany and the United States as they were before the war. The figures are taken from official documents:

In Chemnitz, Germany, before the war, masons, plumbers, painters and bricklayers received \$6 to \$8 a week; plasters, \$7 to \$9; machinists, \$6 to \$9; molders and pattern makers, \$7 to \$8. Teamsters were paid \$1 a day, and textile workers \$6 to \$7 a week, unskilled laborers from \$4 to \$5, and municipal employees, \$4 to \$6.

At the same period in New York plasterers were getting \$5.50 a day and masons, boilermakers, electrical workers, steamfitters, painters, cabinet makers, stationary engineers, ironworkers, slate roofers and decorators from \$4 to \$5.50, the average being, perhaps, \$4.75 or more a day.

Chemnitz newspaper compositors received \$13 a week, compared with a scale of \$31 in New York.

In 1910 in Chemnitz, with a population of 287,000, two-thirds of the inhabitants lived in apartments of three rooms or less. Food for a family of six persons cost \$7 to \$8 a

These and similar items showed that the great gap between the wage scales of the and will respond to the wailing demands of two countries was not closed by differences their own people, and will ask for peace. of living cost in favor of Germany. Vienna plumbers before the war earned

\$1.10 and painters \$1.25 a day. Employes in the shoe factories earned \$3 to \$4 a week Unskilled laborers worked 11 and 12 hours for wages ranging from 60 to 90 cents a day. offers them the most splendid chance of getting themselves killed for their masters that United States seems to do pretty well for

# Possibilities of Concrete Ships

The announcement by the shipping board that three concrete vessels of the 7,500-ton type are to be built immediately and that other ships constructed of the same material and of large tonnage are to follow furnishes indications of an expansion in the shipbuilding program that must be based on most satisfactory conclusions as to the practicability of ships of this character.

It had been understood earlier that, while the theories concerning the concrete ship had proved acceptable to the experts, a practical test would be awaited before a general launching into the new kind of construction would be undertaken. The largest of these ships, the Faith, is now being outfitted on the Pacific coast and has not yet been used for the preliminary practical tests which were to precede further developments of the concrete shipbuilding plans.

The natural assumption is that the shipping board officials are assured that concrete ships will prove a success. The larger tonmage will be called for because of the fact that increased tonnage rather than a greater number of vessels is the pressing need of the moment. Under the methods of construction the larger vessels can be built nearly as quickly as those of the 3,500-ton type, will cost but little more and will be far more

profitable. In the event that the concrete ship has over both steel and wooden ships in meeting through submarine attack were the same as of construction gives it a prime advantage .-Washington Post.
