JULY CIRCULATION

Daily 68,265—Sunday 59,312

leaving the city should have The Bee maile Address changed as often as requested

Vote with your eyes open today.

America's man-power is ready whenever the

Work or fight admits of only one interpretation nowadays.

The auto thieves must go and the auto speeders must slow down.

This indiscriminate letter writing is a dangerous pastime for politicians. When you vote at the primary, don't help

light any bonfires in Berlin. The Huns may be digging in again on the old

line, but they are not doing it at leisure. If Mike Clark is not entitled to a second term

as sheriff, we never had a sheriff who was. With Liberty 34s selling at 101, one might also say that Uncle Samuel's credit is improving.

Mike Clark is still on the job, as certain ambitious lid-lifters have discovered to their sorrow.

Congress is back at the old stand, with a fine program of work ahead, and the real campaign

coming on. "Big Bill" Haywood says the fight is just begun. He is right, but it is over, so far as he is

Carranza saw where his oil graft was leading n, and back-tracked on it, but he is not out

of the woods yet. Remember that the candidates the democrats favor for the republicans today are the ones they

hope to beat in November. If you are inclined to be despondent over anything, take a trip into the country and see the corn fields. Two weeks ago the pessimists had hem blasted beyond hope, but just look at them

Today's the day! It's your patriotic duty to do your part to nominate only real Americans as your party candidates without submitting to he dictation of any set of handpicked slate-makng autocrats.

The Douglas county treasurer, who is also exofficio treasurer for the city of Omaha, the Metropolitan Water District of Omaha and the school district of Omaha, handles many millions of dollars every year. Play safe by voting for Shriver for treasurer. Shriver is experienced, tried and dependable.

#### Tax on War Profits.

The new revenue bill will, it is reported, contain a provision for an 80 per cent flat tax on war profits. The popularity of the idea comes from the notion that the levy will rest chiefly on the income of the essential war industries. This is true, but if the measure is adopted it will have an advantage that did not exist in the graduated income tax. Under the present law the tax increased as the income mounted, and only became really impressive in the upper brackets. This permitted some of the most persistent of profitcers to escape almost untouched. No kind of war profits is more conspicuous, for any reason that would bring the class into prominence, than that which arises from the extortions laid on small articles. Here is where the pennies count. In New York the government has caught retail dealers levying on their patrons war taxes that do not exist; here in Omaha consumers have found prices advanced out of all reason by small dealers, who set up the war tax as a pretext. If the revenue measure is so framed as to reach the gains of this sort of business, filched from the public little at a time, but none the less an extortion, then it will be getting at the real war

#### NO OTHER LIKE NORRIS.

Don't let anyone persuade you that Norris has a war record as good as any of his competitors. Norris' record stands unique and alone. He not only talked the armed neutrality bill to death and voted against the war declaration, but after we were in the war, he voted against furnishing an army to do the fighting, against levying the taxes to pay the army, against making it punishable as sedition to backfire on the army at home and against nearly every other measure urged by the president as necessary to the winning of the war. No other republican representative from Nebraska in either branch of congess held back as did Norris from giving support to the war program. It is hard to conceive what more Norris could have done for German "kultur" had he been in the pay of the kaiser.

#### Unify the War Relief Work.

Approach of the "community" drive for funds to replenish the chests of the several agencies that have taken over the war relief work brings with it warning of a rift in the lute. A protest, mild enough, but still a note of objection, has gone to Secretary Baker from the Knights of Columbus. It appears that what was to have been a general movement to secure funds by subscription on behalf of seven associated organizations is now to be subdivided into sections, and while the goal of \$135,000,000 has not been lessened, it will be secured in sections. The process has made it necessary to one or another of the seven at the end of the procession, and it is just this that has made the trouble. Neither wants especially to be set away at the end, when all might move as one.

Secretary Baker had a perfect illustration of this last fall, when he received a committee representative of all organized societies, fraternities and institutions to represent to him the blunder he had made in giving to the Y. M. C. A. exclusive privileges at cantonments. If he will recall what happened then he may be guided to a better result now.

However, a nation that is big enough to take over the management of the transportation system, land and water, as well as the wires, of the United States might also be big enough to handle the war relief work. If organizations soliciting support are carrying on a war activity it should be under the control of the govenment, if not actually supported from public funds. The generous and serviceable spirit of all is appreciated and the support of the work is certain, but the avenue for possible friction would be sealed if the work was under the single direction of the federal government. Unification of the relief work is quite as important as anything in connection with

#### One Real Economy.

It is interesting to note from the report of the county clerk for last year, just out, that we have effected one real economy through the abolition of the office of coroner, brought about almost exclusively through the agitation by The Bee. The law, which does away with the coroner's position, devolved its duties upon the county attorney and for the twelve months of 1917 the expenditure charged against the counattorney as ex-officio coroner aggregated altogether \$2,139.75, which is not much more than a third of what the cost to the taxpayers was under the old coroner system.

There are other offices in the city hall and court house which could be abolished or consolidated with profit to the taxpayers.

#### Bolshevism in Japan.

Disorder in Japan may be set down as an exhibition of bolshevism in that country. For years socialist propaganda has been spread broadcast throughout the land, and the lower classes of the Nipponese have responded generally to the appeal. Shortage of food and other untoward conditions have aggravated the social situation there till uneasiness has become general. This condition of affairs is favorable always to the bolsheviki, and Japan is no exception. It is unfortunate that the outbreaks should come at a time when the Japanese government was doing most for its people; ever since the war commenced the Tokio government has striven to improve the economic as well as the political status of Japan, and with considerable success. Industrially the kingdom was never so well off, work has been plenty, wages high, and the revenues of the country such as to permit a considerable improvement in the taxes. The expedition into Siberia, undertaken at the instance of the Allies, has served as an excuse for the agitators to touch off their plots, but such accounts as have come to America indicate little danger for the mikado in the present demonstration.

A still unanswered question: Why should the so-called "Committee of 500," made up of democrats as well as republicans, confine its activities wholly to the republican ticket to pull chestnuts out of the fire for a spoils-greedy political machine?

"Equilibrium on the west front is being slowly restored," say the German experts. Slowly is right, and as often as the Hun thinks he is safe along comes one of the Allies and upsets him

### Vital War Work of Dentists

Thousands of Them Enrolled For Service Without Charge

### Our Greatest Economic Test Can Be Readily Borne If All Do Their Duty Patriotically

New York Financial World.

The program which this country and its | being shifted to them and that the cost of allies have laid out for bringing about vic- living has advanced 60 to 90 per cent in contorious peace is a simple one, though formi-dable. The man power in France and England having been practically exhausted, so far as fighting material is concerned, large part of the job now falls on us. We have nearly 1,500,000 troops in France and 1,500,000 under training in this country. is intended to increase the total to 5,000,000 by spring, and with 3,000,000 Americans added to the fighting forces of France, England and Italy, go forward in the spring in an overwhelming rush against the Teutonic hosts and never stop until they cry enough, Americans know now what economic changes have been brought about by the calling of 3,000,000 men into the military and naval service. They are the "ultimate con-sumer" and they know that war taxes are

#### German Ingratitude Shown An exiled German industrial leader was

shocked because German soldiers in northern France last year "burned down the very houses in which they had been most hospitably entertained by the French women and children of the occupied districts." But this was a comparatively mild exhibition of German ingratitude. For example, a German gunboat, disabled in an engagement, sought refuge and aid in a Dutch port. Hospitably received there, it was repaired and supplies of provisions were placed on board. Two hours after it had gone to sea its gunners shelled a group of Dutch fishing boats, sinking four and killing half a dozen fishermen Holland was then sending fish to Germany.

Submarines repeatedly have sunk fishing boats near the Norwegian coast, although the German people were receiving large quanti-ties of fish from Norway. Relying upon the northern neutrals for a considerable part of the empire's food suply, Germany has sunk more than 1,400 of their ships and taken the lives of several thousand seamen.

Exhibitions of ingratitude are less offensive and shocking than the cruel atrocities of which Germany is guilty. A majority of the seamen lost with torpedoed neutral ships were murdered in lifeboats or in the water by gunfire from the attacking submarines. Some were drowned by submersion of the U-boat after they had been placed on its "Without shame," said the kaiser in his

recent proclamation to the German people, "the enemy smirch the fair name of Germany with ever fresh calumnies." But the absodant.-New York Times.

ing places.

thing akin to an economic convulsion is taking place in the world of industry as the man power is withdrawn from productive to the nonproductive military field; that the lawmaking power has extended the grip of the government into almost every field of enleavor and that several great industries heretofore under private control are now in contol and under the direction and operation of government agents, and the taking over of he great basic industry of steel-making is now under serious consideration.

With the railroads, merchant marine, telphone and telegraph and steel under government direction or operation, and many others restricted by reason of price regulation or limitation of output, it is seen how ar-reaching has been the upheaval in American industrial life. The rapid withdrawal of an additional 2,000,00 men by spring will make the situation still more tense, and by that time, if the Teutonic military caste has not been convinced, we then must make plans for calling an additional 5,000,000 fighting men to the colors.

Can we do it? Unquestionably. Great Britain, with a population of less than 50,000,000, has 4,500,000 men under arms and 3,500,000 men and women at home engaged n war work. France hasn't a man or woman today engaged in a nonessential industry. The United States, with a population fully equal to that of Great Britain and France combined, has not yet begun to put its power to severe strain, and if it has to call 10,000,000 men to arms it can carry the burden as easily as Great-Britain is carrying its own.

A keen observer, Herbert Casson, tells us that the war strain hasn't stopped the ntional game of cricket, in Great Britain the theaters are well patronized, holidays are taken by children, women and old people, and life, while not by any means normal, is bearable, and there is no whining over the burdens, criticism of the conduct of the war or protest at the sacrifice of blood and treasure. In France everywhere there is a steel-like determination to fight on. So it is here. Our casualty lists are growing larger day by day and every city, town or hamlet has had the war brought home to it with a solemnity not heretofore felt. When blood sacrifices follow the material sacrifices it knits the nation together as never before, and we now have the inspiring spectacle of the greatest and most powerful nation on earth, moving in terrible unity to crush the one great enemy, lute proof of German inhumanity is abun- and counts not and questions not the consequences until the job is done.

· Slightly Sarcastic. in pertickler that amazes you so?"

"You buy it," she said. "Till find the duke."—Chicago Tribune.

One morning Jorkins looked over his fence and said to his neighbor, Harkins: "What are you burying in that "Just replanting some of my seeds,

that's all," was the answer.
"Seeds!" exclaimed Jorkins, angrily.
"It looks more like one of my hens!" That's all right, said the other.

# The Bee's A

Somewhere in France, July 26 .-To the Editor of The Bee. A letter which arrived yesterday from my father. Harry Pearce, register of deeds, telling me of the approach of the primaries on August 20, prompts me to this expression of appreciation of the loyal support you have given him in the campaigns of this and

other years. In the States I have always been too much occupied with my own little circle of existence to notice such things, but the thousands of miles which lie between France and Nebraska have greatly aroused my interest in the community affairs of Omaha and have made me more keenly aware of the benefits of that city as a home; things which formerly were taken merely as a matter of course.

There is one thing of which I may assure you, and that is of the wholesouled loyalty of the candidate you are suporting. Two sons, Harry Pearce, jr., and myself, have left our home in the last year to enter the service of our country and our father has sent us forth filled with lighthearted encouragement and wholly lacking in the dragging wish that it might be otherwise. I believe his only lament is that he is not able to accompany us. You, I know, are as well aware as I am of the continued support he has given to war relief and government issues. As well as he may in far-off Nebraska, he is taking a hand in the big game of making this world a decent place in which to

Again I thank you for the work you are doing and also for the bits of home news which reach me through clippings from The Omaha Bee. Each line of type carries with it a vision of my home and serves to make my existence here a little more pleasant. With most sincere regards and well wishes for the community and its pa-per, I am WALTER T. PEARCE,

Headquarters Company, 340th Field Artillery, A. E. F.

Are Auto Owners Selfish? Omaha, Aug. 16 .- To the Editor of The Bee: How many owners of large roomy motor cars ride each day and evening enjoying the fresh air, while great numbers of their friends and neighbors are never asked to share

If those who are fortunate to afford such luxuries would look about them in their own vicinity and see the children who would so much appreciate a ride after a hot day, would it not cause them to feel ashamed of their selfishness?

Imagine the happiness that brought to the child who is given the opportunity to occupy the seat beside the driver; to youth it is a real thrill, and yet how many are denied this. Wake up, you who are one of the above mentioned, and remember it is democracy that we are fighting for. 'A word to the wise is sufficient.' AN OBSERVER.
