

SLEEPY-TIME TALES THE TALE OF GRUNTY PIG BY ARTHUR SCOTT BAILEY

XX. A New Kind of Pig. "Stop grunting and squealing and follow me!" Old Dog Spot growled.

"These pigs," he said, "won't ever have tails!" Grunty a dozen pink and white pigs, all without tails.

"Umph! Umph!" said Grunty Pig as he shuffled along behind. "Now, I wonder what he means by that!" Spot mused.

Whoever they were, they were a bright-eyed little family. But Grunty Pig thought, as he stared at them, that they had a most peculiar look.

"You needn't think you can fool me. They're not pigs at all." "Oh, yes—they are!" Spot insisted.

"You didn't suppose that all the pigs in the world were exactly like your family—did you?" Grunty didn't know what to say.

"Hello, Grace!" Was it my fancy, or did Dicky carefully avoid anything but the most casual of glances.

"I could not forbear one astonished question." (Continued Tomorrow.)

"Thank you for letting me come, Madge," she said simply, and if I ever heard gratitude and sorrowful remorse for the past in any human being's voice I heard it in hers.

"I thought it would hit you between the eyes, Madge," Dicky said complacently, and for a long minute we feasted our eyes upon the low, rambling inn, set in a grove of wonderful old trees.

"That's right," Dicky said eagerly. "You must get a good long rest and pick up a bit before you begin work."

"I suppose I'm too thin, and—changed," she said with a gallant attempt at a smile.

So many uses for paper yarn have been discovered in Germany that it is being made at a rate of about 88,000,000 pounds annually.

More Truth Than Poetry By JAMES J. MONTAGUE

THE SAD TALE OF MICKEY THE MORON

When Mickey the Moron to Sing Sing was sent, For seven consecutive terms, The doctors averred that this criminal bird Was a victim of larceny germs.

This bothered the medical men quite a bit; It bothered the sheriff still more. Though the man was bereft of the habit of theft He did far more harm than before.

The puzzle, we're happy to say has been solved; The instruments used upon Mick Had been used to take bugs from a number of thug With criminal maladies sick.

Maybe when the delegates to the disarmament conference see how many of use there are and how we conduct a subway jam, they will just naturally want to disarm.

HOLDING A HUSBAND Adele Garrison's New-Phase of "Revelations of a Wife"

The Way Dicky Greeted Grace Draper and Masked His Chagrin. Hush, Dicky! She'll hear you."

"I reflected that I did not know the circumstances of their last meeting and parting, and I wondered if there was in Dicky's mind a remembrance of that time.

"I thought it would hit you between the eyes, Madge," Dicky said complacently, and for a long minute we feasted our eyes upon the low, rambling inn, set in a grove of wonderful old trees.

"That's right," Dicky said eagerly. "You must get a good long rest and pick up a bit before you begin work."

"I suppose I'm too thin, and—changed," she said with a gallant attempt at a smile.

"Rot!" Dicky rejoined sharply. I thought too promptly. It was as if he had anticipated her question.

"Very well," The words were quiet enough, but there was a world of disappointed mortification in her

Dog Hill Paragrafs By George Bingham

Washington Hocks says much of the interest taken in the daily weather is not to find out how the weather is going to be, but how far the forecaster missed it.

Everybody gets out of the way of a blind man, still blind men are not as a rule considered bad men.

thing so much that on day before yesterday, when a man on Gander creek stole a calf, the Deputy arrested him for stealing a cow.

Common Sense By J. J. MUNDY.

Being a Guest. Women who will visit at homes where there is no maid to do the work, or a part of it, should insist upon doing a good share of the work.

Your friends who come to visit you want to see you, and those whom you visit want to see you for a visit, but as a guest you must realize that your presence makes a change in the daily schedule or routine, not only because you are there and are bound to make extra work, but even the regular work in hot weather is exhausting.

"I made no reply, knowing from long experience that Dicky wished none when he was fighting something out with himself.

"I could not forbear one astonished question." (Continued Tomorrow.)

"I made no reply, knowing from long experience that Dicky wished none when he was fighting something out with himself.

"I could not forbear one astonished question." (Continued Tomorrow.)

"I could not forbear one astonished question." (Continued Tomorrow.)

"I made no reply, knowing from long experience that Dicky wished none when he was fighting something out with himself.

"I could not forbear one astonished question." (Continued Tomorrow.)

Romance in Origin Of Superstitions By H. IRVING KING.

Love and the Peach Tree. Among the various survivals of tree-worship existing in this country is a superstition mentioned by Mrs. Bergen in a memoir of the American Folk Lore society, which superstition is as follows: Go out at midnight and walk around a peach tree repeating—

"Low for a foreigner, Bark for a near one, Crow for a farmer—Screak, tree, screek, if I'm to die first."

This is to be tried by a young lady who desires information as to whom she is likely to marry, or to know whether she is to die unmarried. If, after she has invoked the tree, she hears a cow low, a cock crow or a dog bark, or instead, the tree "screaks," she has her answer.

This presumption is hardly warranted, as direct tree worship seldom, if ever, involves the ritual of sun worship. The peach tree superstition is analogous to several other forms of tree worship surviving in Europe.

Most hostesses will object, but it will be found that the helpful guest is given a more genuine welcome than the one who has to be waited upon all the time.

Your friends who come to visit you want to see you, and those whom you visit want to see you for a visit, but as a guest you must realize that your presence makes a change in the daily schedule or routine, not only because you are there and are bound to make extra work, but even the regular work in hot weather is exhausting.

"I could not forbear one astonished question." (Continued Tomorrow.)

"I made no reply, knowing from long experience that Dicky wished none when he was fighting something out with himself.

"I could not forbear one astonished question." (Continued Tomorrow.)

ancients used to try intimidation. In Devonshire the farmers take a barrel of cider into the orchard and throw cups of it at the most fruitful trees chanting:

"Health to thee, good apple tree, well to bear pocketful, haisful." Old Tusser in his "Hundred Points of Good Husbandry" says that in order to be fruitful all trees must be "wassiled"—that is, treated as the Devonshire farmers treat their apple trees.

Therefore, has passed through at least two stages before becoming the liquid as we know it. First, the grass or fodder which the cow eats and secondly the blood of the cow itself, from which the udder glands extract the easily digestible portions and transform them into milk for the calves—or for human babies.
