What Red Did. Old dog Spot was trotting down the road from the mill pond, carrying a bundle of somebody's clothes in his mouth. When he heard frantic shouts from the water, where Johnnie Green and his friends were

wimming, he quickened his pace. One of the swimmers was known as "Red," And it was a favorite trick of his to tie hard I nots in other boys' garments while the owners them were in the pond. Usually he wet the knots, because wetting them made them harder to untie. On this day somebody had turned

the tables on Red. Somebody had crept up behind the big old hickory tree on the bank and had knotted Red's clothes tightly. That was why old Spot found a bundle under the tree, all tied up and ready to cor-

It was no wonder that the boys began to yell when they saw Spot pick up those clothes and callely trot away with them. It was no wonder that they swam to the bank and scrambled up to the big hick-ory to find out whose clothes were missing.

When they saw that Red was the unlucky one everybody else began to whoop and laugh.
But not Red! He let out frightened scream and started to

follow old dog Spot.

To the great delight of his companions, the rattle of a wagon and

Of Superstitions

The popular saying "Rats desert a inking ship," imperfectly describes

the superstition to which it is sup-posed to give expression. The belief

of sailors—and of many who are not sailors—is that when a ship is in port and the rats suddenly swarm ashore, forsaking it, that ship, in all proba-

bility, will go down on her next voyage. Many a ship has been held for long weeks in port wanting a

crew, the old crew having refused

to reship because the rats had been seen leaving the vessel as it lay at the

A common explanation of the superstition is that it has a found-

ation in a physical fact. A ship in

bad repair-unseaworthy-is damp down below and the rats desert to

dryer quarters ashore. And a leaky

ship is, of course, most likely to go

down if she encounters heavy weather, But sailors scout this explanation

and will tell you that well-found ships are as likely to go down as any others if the rats desert them-which

is not so, of course. The common

explanation of the superstition, un-

romantic and unclassical as it is, is

undoubtedly the true one But that

innate proclivity for superstition which pertains to all mankind in

general and sailors in particular, prefers to see a serious omen in the de-

sertion of a ship by its rat inhabi-tants rather than a plain prosaic inti-mation that the "old hooker" needs
