

One Million Affected Unemployment

Conference at Washington of Interest to All Not Associated With Organized Labor or Capital.

By HOLLAND. Not less than 250,000 very likely as many as 300,000 of those who dwell in the United States are unemployed, but their employment is that of scholars in the schools and universities. If the present population is about 100,000,000, the number who are not employed is about 100,000,000 less than the number who are now in schools as students, there are left approximately 80,000,000 to whom the unemployment conference now in progress at Washington is a matter of great, and in many cases supreme importance.

The best estimate is that of these 80,000,000 all but 5,000,000 or 6,000,000 are not associated either with organized labor or with what is sometimes called the "capitalist class." Therefore some 80,000,000 are really to be beneficiaries of the results of this unemployment conference, provided the conference gives favorable results.

Public Pays. It is the great public industries only of those who do not attend to organized labor or to the capitalist class, which the conference will aid if as a result of this conference the public will pay the cost of this great public relief work.

Probably the attention of the conference will be called to the situation in the coal mining industry. The public now is compelled to pay excessive prices for coal. The coal industry is labor intensive, demanding labor wages which cannot be paid by the public. The coal industry is a public utility, and the public has a right to demand that it be operated in the public interest.

Many Cars Discarded. Some doubt has been expressed about the number of automobiles now in use and one of the features of the conference is to determine the number of automobiles now in use and one of the features of the conference is to determine the number of automobiles now in use.

New York Coffee. The market for coffee is higher today on account of a continued good demand. The coffee market is higher today on account of a continued good demand.

New York Sugar. The raw sugar market was quiet today and the price of sugar was steady. The raw sugar market was quiet today and the price of sugar was steady.

New York Cotton. The cotton market was quiet today and the price of cotton was steady. The cotton market was quiet today and the price of cotton was steady.

Chicago Grain

By CHARLES D. MICHAELS. Chicago Tribune-Omaha Bee-Lead Wire. Chicago, Sept. 29.—Liquidation was on in all grains early, with soft selling prices dropped to a new low on the present movement for wheat and for May oats.

There was some selling of wheat early that the trade attributed to a leading local professional, but under \$1.20 for December there was rather persistent buying by the leading local shorts which gradually absorbed the surplus in the pit.

Chicago Produce

By FRANKLIN K. SPRAGUE. Chicago Tribune-Omaha Bee-Lead Wire. New York, Sept. 29.—While trading in the stock market continued to be of only moderate volume, prices throughout the list made a substantial upturn.

Several statements of earnings which were better than had been expected, contributed to the lack of desire to continue the pressure which had been exerted in certain quarters of the list.

Conferece Unemploy. Ahead of Schemat

Consideration of General Emergency Relief Program To Begin Friday—New Committee Formed.

Washington, Sept. 29.—Due to rapid progress by committees in formulating recommendations, the unemployment conference will begin consideration of a general emergency relief program Friday, five days earlier than had been planned, it was announced last night.

In addition to the report of the manufacturers' committee, on which agreement had been announced, recommendations on emergency measures will be reported Friday by the committees on unemployment statistics, employment agencies and registration, emergency public works and construction.

Announcement of the formation of a new committee on community, civic and emergency relief measures, to recommend the best forms of community organizations to carry out recommendations for decreasing unemployment, was made by the conference.

The suggestion, it is understood, has also been made that local committees should be formed in the cities and different sections to administer recommendations adopted by the conference.

Public hearings were devoted to the question of employment service and the relative merits of public and private agencies.
