

### Congress Asked To Postpone Its Plan to Adjourn

#### Harding Wants Upper House To Carry Out Program Without Cessation Despite Armament Parley.

Washington, Oct. 4.—Unperturbed by the prospect of congress in session simultaneously with the international armament conference, President Harding has given senate leaders to understand that he expects them to carry out the legislative program without consideration of an adjournment date.

#### Adjournment Would Cut Work.

Adjournment on November 19 would mean that the legislative program would be narrowed down to four measures, namely, the treaties of peace with Germany, Austria and Hungary; the tax bill, the Borel Panama canal tolls bill and the anti-beer bill, leaving the railroad funding bill, the allied debt refunding bill, the tariff and other measures to go over until the next session.

President Harding has let it be known that he has no fears of a partisan debate or of democratic resolutions designed to throw confusion into the armament parley. He has already taken Senator Brewster, the democratic leader, into camp as one of the American representatives and he has received assurance that the more influential democrats look upon it as suicidal politically to attempt to throw monkey wrenches into the limitation of armament conference. He takes the position that public sentiment is strongly supporting his efforts to limit armament and he feels confident that the country would very quickly indicate its disapproval of partisan obstructive tactics.

#### Facing Heavy Schedule.

The canal tolls bill will reach a vote on October 10, and the treaties on October 14. Prospects are that the rest of October will have to be devoted to the tax bill, and it is radically amended, as now seems likely, considerable time will be spent in adjusting it in conference. Immediately following the passage of the tax bill, the anti-beer bill will be brought up, and this is likely to lead to a continuation of the filibuster which has been going on against the measure from time to time for several months. As soon as the beer bill is out of the way, the railroad bill will be brought up.

It is doubtful whether either the allied debt refunding bill or the tariff can be reached at the present session. Secretary of the Treasury Mellon has been very anxious to get complete authority to refund the \$11,000,000,000 debt owed by the allies to the United States, but the measure, which has already been reported favorably by the finance committee, is likely to provoke much debate. The suggestion has been made by some senators that it might not be very hospitable to the visiting delegates to the armament conference to remind them of their nations' debts while they are here, but the intention of leaders is to push the measure as fast as circumstances will permit.

#### Omaha Makes Address at Restaurant Men's Meeting

Los Angeles, Cal., Oct. 4.—More than 1,000 delegates were present here today at the opening session of the five-day convention of the National Restaurant association. John W. Welch of Omaha, president of the association, delivered the opening address, outlining the growth of the association and detailing the recognition given its ideals.

It does not cost more to phone your want ads to The Bee, the charge rates are the same as cash.

### Writer Seeking "Pep" First Operation of Its Kind in America Given Monkey Glands

New York, Oct. 4.—The transplanting of a monkey's interstitial gland to a human being, said to be the first operation of its kind in America, was performed here Monday morning when Irving R. Macon, writer, voluntarily underwent this newest form of anatomical "grafting" at the hands of Dr. Thomas Webster Edgar and associate surgeons. The other principal in the fantastic procedure was a Brazilian ring tail monkey whose pituitary gland in the scientific demonstration was not a voluntary one.

Following the operation, Dr. Edgar issued a bulletin which stated that the patient had been operated on under a local anesthetic and at the end of the proceedings, which lasted 12 minutes, "he was smiling and conversing with the surgeons." Today Dr. Edgar reported that Macon was "progressing in a satisfactory manner."

Bacon, one time lawyer and writer on semi-scientific subjects, is 38, and before the operation was pronounced by a committee of five surgeons a fit subject for the scientific experiment.

Bacon declares that he sought the operation "for his own good," and in an effort to rejuvenate himself and restore youth to a mentality, which, he declares, is suffering the inroads of old age.

### Admiral Shoemaker To Command Pacific Battleship Squadron

Washington, Oct. 4.—Vice Admiral William R. Shoemaker was assigned to command battleship squadron No. 4 of the Pacific fleet in naval orders issued today. His chief of staff was announced as Captain Edward H. Campbell. Other officers assigned to duty with the Pacific fleet include: Rear Admiral Guy H. Berridge, to command the destroyer squadron with Captain Cyrus R. Miller, chief of staff, and Captain Claude C. Block to command mine squadron No. 2.

Rear Admiral Ashley H. Robertson was detailed today to command the Atlantic fleet destroyer squadrons. Captain Harry E. Yarnell will act as his chief of staff.

Other orders include the assignment of Captain Henry E. Lackey as commander of mine squadron No. 1, Atlantic fleet, and Captain Frank T. Evans as commander of naval training station at Newport, R. I.

### Naval Air Equipment Transferred to West

Washington, Oct. 4.—Organization of the naval air establishment on the Pacific coast on a peace basis has been undertaken by the Navy department, it was said yesterday, with the transfer to San Diego of much of the equipment and personnel formerly stationed at Cape May, N. J.; Chatham, Mass., and Rockaway, N. Y.

Strategic considerations led to concentration of most of the navy's air forces on the Atlantic seaboard during the war, officials said, but with the end of hostilities this necessity was removed. The three eastern stations were recently closed because of lack of adequate operating funds.

### Much Building Over U.S.A. Says Building Show Man

Robert C. Mitchell, co-partner of Charles A. Franke in promotion of the Building show, returned yesterday from Cleveland, O., where he has been for the last three months. Mr. Mitchell is optimistic in regard to the business outlook.

"Business prospects in the east are looking up," Mr. Mitchell said. "Especially is business looking good in the building trades. Much building, especially of moderately priced homes, is going on all over the country."

Messrs. Mitchell and Franke will stage their annual building show in the Auditorium the week of January 22.

The Mongolians eat only one meal a day.

### Phenomenal Heat Causes Erratic Output of Crops

#### Grain Plentiful Despite Drought and Hot Weather; Fruit Supply Less Than Half of Normal.

Washington, Oct. 4.—Phenomenal heat accumulation which has marked weather conditions all over the northern hemisphere this year has produced equally remarkable and erratic output of agricultural crops, according to summaries of American and foreign production compiled for and by the Agricultural department. The world's bread-crops came to abundant fruition in spite of drought and heat during the growing season. The world's wheat crop in 1921, up to September 30, it was indicated, would have a total wheat crop of 157,000,000 bushels greater than in 1920.

By another freak, fruit crops, almost in a world-wide sense, met havoc from cold in a season which has set new records everywhere for solar heat. This paradox was occasioned by the fact that last February the sun got at its work of bringing spring weeks in advance of normal, and trees and shrubs responded by budding out and coming into flower and bloom by March in nearly all areas where fruit is grown. Frosts could not be averted on all the nights, however, and this year the United States will produce about 109,000,000 bushels of apples, against 244,000,000 bushels in 1920. Only the orchards of the Pacific coast, northern New England and northern New York escaped.

#### Cotton Suffers Greatly.

Cotton suffered greatly and the Agricultural department experts assign the weather as perhaps the principal cause for a 50 per cent reduction in output. The mild weather of winter and spring gave its famous insect enemy, the boll weevil, full freedom to live and thrive, and even let him move north many miles from previous latitudes. Later drought and sun conspired to cut down production of the fiber.

European fruit and subsidiary crops were sharply reduced, the department finds, although the bread grains survived. Their success, it was said, was due to the fact that they were chiefly fall-sown crops which grew well in the mild winter. The spring-sown grains, root and forages, including oats and barley wheat, in the United States as elsewhere, lived through, but yielded little. Russia was the one exception in northern territory, but in terms of statistical averages, the demand for wheat was little greater than Italian lemons and Grecian currants were found in fair condition this fall.

#### Causes Suggested.

As to the causes of the heat accumulation, the weather bureau suggests that the usual seasonal interchange of air between the polar and tropical regions was this year badly disturbed by atmospheric pressure on the subject is hardly possible. The barometer in "semi-permanent high pressure regions" over the Atlantic and Pacific oceans was found to have maintained a higher average normal, which might have had an effect in diverting rain-storms to the north all through the season.

When the decreased snowfall of 1921, and the thinness of ice on streams and lakes allowed solar heat, normally expended in melting and evaporation to be stored up, the bureau says, in heating the soil and atmosphere.

### Largest Out Crop Ever. Is Forecast for Saskatoon

Regina, Sask., Oct. 4.—The largest out crop and the second largest wheat crop in the history of the province is forecast by the statistics bureau of the Saskatchewan department of agriculture in its crop estimate, issued today.

### Dry Officer Accused Of Accepting Bribe

Hartford, Conn., Oct. 4.—Thomas F. McAuliff, federal prohibition enforcement officer for Connecticut, arrested today on a charge of accepting a bribe, was locked up in the Hartford county jail tonight in default of bonds of \$15,000.

It is charged that McAuliff accepted a bribe from Samuel and Charles Gardini, proprietors of a hotel in New Britain. The Gardini brothers also were arrested charged with giving a bribe.

McAuliff's arrests are now being held in connection with the state and county inquiry into conditions in New Britain involving charges of manslaughter, whisky running, automobile thefts and bribery.

### Mystery Develops In Scout's Death

#### Original Theory of Suicide or Accident Is Apparently Disproven.

Chicago, Oct. 3.—Additional mystery today was cast on the puzzling death of Samuel Buffington, 14-year-old high school student, whose body was found hanging in a closet at the family home Sunday night with the hands tied.

The police theory that the boy, experimenting, had tied himself and then strangled when he attempted to get free, was apparently disproven. The lad, a member of the Boy Scouts, was an expert in knot tying. S. H. Giesey, scoutmaster, told Robert E. Crowe, state's attorney, who has started an investigation.

Mr. Giesey, while examining the knots around the boy's wrists, said they were carelessly tied and that the lad himself would not have tied such a knot.

Questioning of Charles Pinkham, the boy's stepfather, his wife and Hugh, the boy's 10-year-old brother, are proceeding today. The dead boy, it was asserted, was one of two heirs to property left by his father and valued at from \$60,000 to \$300,000, most of the property being farm land in Oklahoma.

### Police Investigate Mysterious Death of Lad Hung in Closet

Chicago, Oct. 4.—Samuel Buffington, 14, an Eagle Boy Scout, was found yesterday afternoon hanging in a closet of his home. His hands were securely tied behind his back with the intricate knots known to Boy Scouts. There was no box upon which he could have stood while adjusting the noose.

His stepfather, Charles Pinkham, a meat inspector in the stock yards, believes he was hanged by other scouts in a hazing experiment. His mother insists that he was hanged by burglars, whom he surprised in the house.

Police are divided between the theories of hazing and suicide. They learn that two boys rode to the Pinkham home Sunday afternoon while the boy was there alone and remained there for some time. Police are seeking these boys.

Young Buffington would have inherited an estate of \$350,000.

### Exercises Held In Honor of Noted Italian Writer

#### Six Hundredth Anniversary Of Death of Dante Alighieri Commemorated At Washington.

Washington, Oct. 4.—The 600th anniversary of the death of Dante Alighieri was commemorated tonight at exercises in the National museum, presided over by Secretary of State Hughes, who said of the great Italian: "He is our as well as Italy's."

A letter was read from President Harding, who was unable to attend. Speakers included Guido Sabetta, counselor of the Italian embassy.

"In arms, in his great thoughts and Professor Charles H. Grandgent of Harvard university.

"It is well to turn back 600 years," Secretary Hughes said, "to learn once more the lesson that 'Moral supremacy is the only one that leaves monuments and not ruins behind it.'"

"Dante embodied all the knowledge and culture of his time," he said. "He was scholar, patriot and poet, but his distinction transcends his age and becomes more impressive as the centuries pass. He is universal because he is the poet of the Christian faith and with the ideals of that faith he wrote the epic of the human soul. Dante, with matchless power, taught the lesson of the triumph of the soul triumphant, of the strength which alone gives the mastery of life and cannot know defeat."

President Harding in a letter said: "My Dear Mr. Secretary: I wish you would be good enough to express my regrets to the gathering at the National museum on Monday night for the memorial of the 600th anniversary of the death of Dante Alighieri."

"In arms, in his great thoughts and Professor Charles H. Grandgent of Harvard university.
