

Agreement On Tax Bill Is Reached

Tentative Understanding on Proposed Changes Is Made By Republican Leaders in Senate.

Reduce Surtax Maximum

By ARTHUR SEARS HENNING. Chicago Tribune-Omaha Bee Leased Wire. Washington, Oct. 6.—An agreement which will insure passage of the tax bill by the senate with important amendments supported by nearly all the republicans became a certainty today.

A tentative understanding on the proposed changes was reached at a conference between Senator McCormick of Illinois, leader of the compromise movement, Senator Lenroot of Wisconsin and Senator Capper of Kansas, on the one hand, and Senators Penrose, Watson and Lodge on the other.

The amendments as tentatively proposed include the following: A maximum surtax rate of 50 per cent instead of 32 per cent in the present law, effective January 1, 1922.

Reduction in all the surtax rates on incomes below \$60,000, the pending bill proposing a reduction on incomes of less than \$20,000, but slightly increasing rates on incomes between \$20,000 and \$60,000, effective January 1, 1922.

Retention of the present corporation income tax of 10 per cent on corporations having a net income of less than \$50,000, with an increase to 15 per cent on corporations with larger incomes, effective January 1, 1922.

Retention of the corporation capital stock tax, which is repealed in the senate bill.

Repeal of the freight, passenger and express taxes, effective January 1, 1922.

An increase in the maximum rate of tax on estates from 25 per cent to 40 per cent, this rate to apply on estates above \$100,000.

Repeal "nuisance" taxes. Repeal of some of the miscellaneous "nuisance" taxes which are retained in the pending bill.

Adoption of the Calder amendment increasing the taxes on whisky and alcohol.

Under the agreement the excess profits tax will be repealed, effective January 1, 1922, just as provided in the pending bill. There will be no change in the normal tax rates.

Senator Penrose and other republican leaders were reluctant to accept the modification of surtax rates but realized that if they did not do so a coalition between republicans and democrats for a higher maximum surtax rate was likely.

It is still somewhat uncertain as to whether the amendments will be adopted.

The attorney of a prominent business man of Omaha appeared at 4:30 yesterday afternoon in Sheriff Clark's office and whispered that his client would be present at 5 to submit to arrest and give bond to appear for trial on charges on which he has been indicted by the grand jury.

The bond was looked over and approved by Judge Troup. Deputy Sheriff Foster was waiting until 5:30. Then word came by telephone that the man had decided to wait until morning before giving himself up.

Several other very well-known business and professional men are expected to be on the arrested list today. Two or three who were out of the city are scheduled to arrive home today and be arrested.

Ex-Bank Official Arrested. L. M. Swindler, former official of the American State bank, was arrested yesterday by Deputy Halter on four indictments in connection with the Shafer brothers, charging him with conspiracy in misrepresenting American Bank Building company and presenting it for sale.

The sum of \$25,000 will be placed at the disposal of Attorney General Davis and County Attorney Shottwell in the prosecution of the 36 persons indicted by the grand jury for embezzlement, obtaining money under false pretenses and conspiracy to embezzle. Whether this amount can be set aside in advance or whether payments will have to be vouchered depends on interpretation of the law to be made by the county attorney to the commissioners before final action.

Will Push Prosecution. The attorney general and the county attorney met at noon yesterday with the board of county commissioners, who expressed their desire to push prosecution to the limit.

Of the 36 indictments but one is under the "blue sky law," the jury purposely indicting these persons on charges of embezzlement or obtaining money under false pretenses.

Increase Reported In Labor

Statement of U. S. Employment Service Shows Definite Improvement in Conditions.

West Makes Best Gains

Chicago Tribune-Omaha Bee Leased Wire. Washington, Oct. 6.—An improvement in employment conditions is indicated in the monthly reports of the United States employment service, made public today. The number of workers employed by 1,428 firms in 65 principal industrial centers shows an increase of 1.2 per cent during September. It is the first time during the present year that the monthly figures have shown a net increase in the number employed.

The workers employed by the firms on September 30 totaled 1,544,529, as against 1,526,479 on August 31, or a net increase of 18,050.

The number employed on September 30 shows a decrease of 81,905, or 5.2 per cent from the total in these same establishments on January 31.

Of the 65 cities, 38 report employment increases during September over August, while 26 show decreases.

Eight Show Increase. Out of 14 groups of industries, eight show an increase and six a decrease. The industries which reported a greater number on the pay rolls include stone, clay and glass products, with an increase of 8.6 per cent; food and kindred products, with an increase of 3.6 per cent; chemicals and allied products, with an increase of 2.6 per cent; railroad repair shops, with an increase of 6.2 per cent; iron and steel products, with an increase of 2.2 per cent; textiles and their products, with an increase of 1.7 per cent; metals and metal products, other than iron and steel, 1.1 per cent; lumber and its manufactures, 0.9 per cent.

Industries reporting a decrease in employment were liquors and beverages, with a decrease of 32 per cent, and paper and printing, with a decrease of 3 per cent. In four other groups, leather and its products, hatters, vehicles for land transportation and miscellaneous industries, there were decreases of less than 1 per cent each.

Improvement Under Way. Francis I. Jones, director general of the United States employment service, in commenting on the figures said they show that a definite improvement in taking place in industrial conditions.

"The continued increase in employment clearly confirms the indications observed in August, that the industrial pendulum is definitely on the upward trend," said Mr. Jones. "The greatest change reported is in the western and southern sections of the country, obviously due to agricultural activities and the advance in the price of cotton. The industrial areas in the east not only held their own, but slightly increased their forces in many lines, leading with textiles and including iron and steel and railroads.

"Building operations proceed with greater activity and show every indication of continuing at least until checked by adverse weather conditions.

"These favorable trends, however, should not obscure the fact that within the next 30 days thousands of agricultural seasonal workers will return to the industrial centers and join the multitude of unemployed in their previous occupations.

"The marked increase in industrial optimism reported from every section of the country seems to be based largely on the improved conditions in the wholesale and retail business, which has been partly stimulated by the change of season."

Doctor Tells of Treating Meyer For Pneumonia

Important Testimony Given In Trial of Lyda Southard, Charged With Slaying Ex-Husband.

Twin Falls, Idaho, Oct. 6.—That Edward F. Meyer suffered an attack of typhoid fever and typhoid pneumonia in April, 1913, and was treated by Dr. D. L. Alexander of Twin Falls, was stated on the witness stand by Dr. Alexander in the trial of Lyda Meyer Southard, alleged poisoner of Meyer, her former husband.

The admission is regarded as of importance when coupled with other medical testimony to the effect that the widow testifies that she applied to the blood of a person never previously afflicted with typhoid.

Dr. Alexander also stated on the witness stand, that in his opinion Meyer was suffering from "some sort of intoxication or some sort of poison," when he visited the patient at the hospital on September 3, four days prior to Meyer's death.

Dr. Alexander declared that within his experience he had never seen a case of typhoid in which the patient had a subnormal temperature throughout the progress of the disease. He said this condition developed during the recovery, but he never knew it to be present before the period of recovery.

An unusual percentage of women and young girls were present among the spectators at today's session of the trial, many of whom did not leave their seats for lunch. The defendant preserved her customary attitude of stolid indifference, although she appeared to be less affected by the proceedings today than she has been for some time.

Kansas Man Dies At Wheel of Auto

Machine Crashes Through Bridge, Injuring Three Of Family.

Atlantic, Ia., Oct. 6.—(Special Telegram).—Death of Estes Kernes, 67, from heart disease, while he was at the wheel of his automobile, caused the car to crash through the guard rail on a bridge near Avoca, perhaps fatally injuring his sister-in-law, Mrs. George Kernes of Neola, and slightly injuring his wife and small daughter.

Physicians who examined the body of Kernes immediately after it was taken from under the overturned automobile declared his death was not due to the accident. They say he evidently had died of heart disease before the machine went off the bridge.

Just before the car reached the bridge, Mrs. Kernes spoke to her husband, telling him to drive slowly. He did not respond. It is thought his failure to answer his wife was because he was dead.

Mr. and Mrs. Kernes and daughter motored from their home in Norton, Kan., to visit at the home of his brother in Neola. They were out riding when the accident occurred.
