# **Greeley County** Gets \$107,685 Of Finance Board

Total of \$1,866,400 in Loans Based on Farmers' and Stockmen's Notes Approved by Committee.

F. W. Thomas, regional chairman of the war finance corporation, announces that during the past week the amounts shown below have been paid out to banks in the following

Greeley county, \$107,685; Sherman county, \$17,600; Boone county, \$12,400; Frontier county, \$25,300; Knox county, \$9,775; Nemaha county, \$6,000; Cass county, \$20,000; Colfax county, \$25000; Nance county, \$88,-000, and Pottawattamie county, Iowa, 17,000.

Greeley County Active.

Mr. Thomas said: "It will be observed from the above figures that the banks of Greeley county are cooperating with the war finance corporation in a substantial manner and that all banks in this county have shown an earnest willingness to cooperate with the stockmen and farmer to the fullest extent, and we be lieve from the personal interest and energy as shown that the govern-ment funds will be available to every community in substantial

"It is hoped by this showing that the efforts of other banks will be stimulated to bring government junds to this state to build up our resources, and together with the stockman and farmer, co-operate with the war finance corporation in order to relieve the losses sustained in the past two years.

Committee Meets Daily.

"The committee for Nebraska of the war finance corporation holds conferences daily and is recommending a great number of loans for the approval of the board of directors the war finance corporation at Washington. Agricultural loans in the state of Nebraska, for the most part, are comparatively small when compared with the larger cattle loans of the grazing states of the

"For instance, when Washington announces that an advance for the state of Wyoming for \$500,000 is appreved, this may consist of one or two loans, while in Nebraska the average advance made to a bank is approximately \$20,000, which in turn. s made up of an average of 15 notes of farmers or stockmen. From this it will be seen the great amount of detail necessary to handle a large volume of business for this state.

1,400 Notes Approved.

"The Omaha committee receives on an average of five telegrams a day from Washington approving advances to banks, and has already ecommended loans of an aggregate of \$1,866,400-all of this amount being based on Nebraska farmers' and stockmen's notes. Approximately, 162 Nebraska banks have already filed applications; while many of these were incomplete and it was, therefore, necessary to conform with the law, yet, in nearly every instance where the carefully compiled, the advance has been recommended.

"It is estimated that the Omaha committee has recommended advances to be made which are based on 1,400 notes of farmers and stockmen of this state. In order to bring a large amount of such funds to Nebraska, iti s necessary that all of the bankers of this state should lend their co-operation-and they are already for the most part showing a willingness to do so."
