

Building Trades Decline to Reopen Carpenters' Case Motion by Gompers' Calling on Jurisdictional Board for Rehearing of Squabble Is Defeated.

Cincinnati, June 11.—(By A. P.)—By rejecting a recommendation submitted by Samuel Gompers, president of the American Federation of Labor, the building trades department of the federation here refused to call on the national board of jurisdictional award to reopen a decision made against the carpenters' union, which was proposed as the means of winning the carpenters back to the membership in the department.

Coupled with this action, which was taken by the chief officers of the 16 unions composing the department at its annual meeting, was the unanimous adoption of a motion affirming the report of the jurisdictional board. This board is composed of representatives of the building industry, and charged with the settlement of disputes between various union crafts.

In offering the recommendation, Mr. Gompers said it, in substance, provided that when a rehearing in a dispute between the carpenters and the metal trades union had been ordered, that the carpenters would automatically become part of the department. Resident John Donlin of the department, in presenting the motion, which was adopted, said the question was that "no nonconformity in the recommendation of Mr. Gompers to invite the carpenters back, reopen the case and suspend the decision."

Proposals Adopted. The action of the convention came as a climax of a session that began with consideration of proposals which were adopted for bringing peace to the building industry. With the view of ending the turmoil in Chicago, which has prevailed since the Landis wage award, the convention directed that the executive committee of the department should call all union presidents in the building trades to be held in session "until the situation is cleared up."

Mr. Gompers, in referring to the Chicago situation said organized labor should abide by any judgment to which its word had been given, but he added that he preferred repudiation to lack of unity among the trades.

Two other steps toward promoting harmony were the adoption of President Donlin's recommendation that the union chiefs hold quarterly meetings to settle all disputes arising between crafts, and also his recommendation favoring the department joining the national building council, composed of representatives of all branches of the industry.

Split in Rank. While the carpenters, who form one of the greatest labor unions of the country, belong to the federation, they have not been affiliated with the building department for the last year on account of the judicial board deciding that the installation of metal doors and room trimmings was to be done by the metal trades union.

Mr. Gompers, in presenting the proposal to bring reaffiliation of the carpenters with the department, said the recommendation was framed at conferences of the executive committee of the federation, the executive committee of the department and representatives of the carpenters. He added that three members of the judicial board once approved the recommendation and then withdrew their approval.

Jury Finds Texas Oil Promoter Not Guilty. Houston, Tex., June 11.—Seymour E. J. Cox, Houston's spectacular oil promoter, was acquitted today by a jury in a dramatic close to the trial of the oil man and airplane enthusiast of international fame on charges of using the mails to defraud, came almost 24 hours after the case was given to the jury, when the 12 men brought in a verdict of "not guilty."

Cox was being tried in connection with enterprises involving paper capitalization of many millions. His defense was that he had been betrayed by men in his own organization, whom he had raised from comparative poverty to higher standards of living and that the government, acting now as prosecutor, had ruined him through receivership proceedings in the Red river basin.

The federal government contended that Cox had duped thousands through "the most enticing sales literature ever prepared by any man."

San Francisco Physician Deprived of Liquor Permit. San Francisco, June 11.—Dr. George F. Brackett, former city and county physician of San Francisco, was deprived of his liquor permit by order of Prohibition Commissioner Roy A. Haynes in Washington on the charge that Brackett issued an "emergency whisky prescription" three months ago to Robert H. McCormack, special assistant United States attorney general.

Vacationist Can Use Radio on Trip Traveler May Equip Automobile, Yacht or Even Motorcycle With Set.

By JOHN E. KENNEBECK (This is the sixth installment of The Bee's story of radio.) The average vacationist wants to get away "from the world" as it were. He wants to leave business behind and enjoy the great outdoors.

But nowadays, no matter where we go, the arm of radio will reach out to us and bring news, music and entertainment. Vacation joys may be increased by the use of radio. The radio bug who wishes to take a receiving set with him on a motor trip will wonder what apparatus he should assemble.

The type of outfit for a vacation depends upon two things: the distance one goes from a broadcasting station and the transportation facilities. The ordinary crystal set will be found inadequate if one travels more than 25 miles from a sending station. Campers more than 25 miles from Omaha would do well to take a two-stage amplification set with them.

Water For Ground. The aerial may be made up of a single copper wire from 100 to 125 feet long stretched between two tall trees, or a loop aerial may be employed. If a body of water is nearby, a long metal rod or a piece of pipe which is attached to the ground wire should be driven down into the soft mud near the shore.

Insulation Is Big Factor in Wireless. With the great boom in radio occasioned by the opening of the large number of broadcasting stations throughout the country, interest in constructing one's own instrument for receiving these radio concerts, news items and agricultural reports has risen to a high degree.

Among the cardinal points to remember in building radio apparatus of any type, is the fact that among all its features, insulation is perhaps the foremost. In other words, instead of using ordinary wood, excepting when it is very dry, or better still, boiled in paraffin or beeswax, you will always find that it pays to use a better insulation, such as vulcanized fiber stock hard rubber or bakelite.

Sparks. Do not place your hands on the surface of a crystal to be used as a detector. The action of the crystal is a rectifying action and any foreign matter or grease from the hands will interfere with its rectifying action. A sensitive spot on a crystal does not last long and when signals begin to fade find a new sensitive spot on the crystal. Keep all your reserve tested crystals wrapped in paper and in tinfoil until ready for use. Handle the crystals with a small pair of tweezers.

"Old Guard" Wins Big Victory Over Pinchot. Philadelphia, June 11.—In selecting W. Harry Baker of Harrisburg, chairman by an overwhelming majority in the regular session, Republicans won a sweeping victory over the forces of Gifford Pinchot, candidate for governor, at the reorganization meeting of the republican state committee.

Series of Tests to Fix Labor Efficiency Planned. New York, June 11.—The national production test committee which recently held its first meeting in Washington, assisted by two members of the United States bureau of labor statistics, will start a series of tests early next month to ascertain the comparative efficiency of labor in different parts of the country.

Mexican Cavalry Ordered to Patrol Rio Grande. Mexico City, June 11.—Orders were issued by the War department sending heavy detachments of cavalry to patrol the Rio Grande border. The forces will consist of horsemen used to patrol work in the plains and mountains.

WHO'S WHO IN THE STORY. Violet Ingelby, a pretty but poorly dressed girl, was sitting on a bench in a London street in the rain when her shabby little hat was blown off and quickly replaced by a well dressed and smiling young man. The latter picks up the hat and says to her, "I'm sorry to see you in such a state. I'll buy you a new one."

She had taken the ring to a pawnshop in the early morning. Many times before she had thought of pledging it. Necessity is a hard driver, but her heart was with the always faithful her at the last moment; there were memories' bound up in that band of gold, with its simple blue stones—memories of happier days, days that were gone forever.

£50 REWARD! The above reward will be paid to any person giving information concerning the whereabouts of a child belonging to a woman who was run over and killed in a street last night between the hours of 7 and 8 o'clock by a private motor car. The child—a boy—is 3 years of age and known as "Ronnie." Finder please communicate Box 32, office of this paper.

Dog Hill Paragrads. Cricket Hicks accidentally stepped into a bucket of eggs at the Rye. Straw store this morning. He says it is surprising how many eggs anybody can break with just one foot.

Minister Arrested Under Terms of Anti-Suicide Law. Paterson, N. J., June 11.—After two unsuccessful attempts to commit suicide, Rev. Hugh Secker, who resigned three months ago as pastor of the East Side Terrace Methodist Episcopal church, was arrested today and locked in jail. He was charged with violation of the anti-suicide law, but it was said he will be examined by alienists.

Amundsen Plans Airplane Flight Across North Pole. London, June 11.—Captain Roald Amundsen, the explorer, who is about to begin a five-years' expedition in Arctic region, says in a message to the Times that the plan was for his ship Maud, which sailed from Seattle recently for Nome, to drift across the Polar ocean, while short reconnaissance trips would be made in small planes.

SLEEPY TIME TALES THE TALE OF REDDY WOODPECKER BY ARTHUR SCOTT BAILEY

CHAPTER II. Getting Acquainted. "I don't believe," said Mrs. Jolly Robin, after old Mr. Crow had flown out of a cage, "don't believe that Mr. Woodpecker can be such a bad fellow."

"Don't call me 'Mister!'" he said. "I never saw a Crow that wasn't a rascally blackguard," he snapped. "There never wasn't a Crow that wasn't a nest robber."

"You don't look like one!" cried a strange voice which made everybody jump. It was the newcomer, Mr. Woodpecker, himself. He noticed he had flown up. And now he perched on a limb nearby. "You don't look any more like a nest robber than I do," he told Mr. Chippy.

The whole company stared at him, and then stared at little Mr. Chippy. There was a vast difference between them. Mr. Chippy was a tiny, meek person, while Mr. Woodpecker was as bold as brass. Mr. Chippy was modestly dressed; and his cap, though it was reddish, was of a dull blue. Mr. Woodpecker wore a very flashy suit of dark steel blue and white; and his cap was both very big and very red. Mr. Chippy was a shy body who said little; and when he did speak it was usually only to utter a faint chip, chip, chip.

Mr. Woodpecker gave a quick glance all about and cried, "Howdy do, everybody!" "Good morning, Mr. Woodpecker!" the birds greeted him. "Don't call me 'Mister!'" he said. "My name is Reddy—Reddy Woodpecker." Then he turned to little, shrinking Mr. Chippy and his wife. "I can see that you're worried about your eggs," he remarked. "I suppose your nest is hidden not far away."

Mr. and Mrs. Chippy looked most uncomfortable. They didn't quite dare speak to such a grand person as Reddy Woodpecker. "Where's your nest?" Reddy asked them bluntly. "Chip, chip, chip, chip!" said Mr. Chippy. "Chip, chip, chip, chip!" said his wife.

"What sort of answer is that to a civil question?" Reddy Woodpecker blustered. "Here I've just made your acquaintance. And I've asked you to call me by my first name. And you won't even tell me where you live!"

Mr. and Mrs. Chippy didn't know what to say. It was lucky for them that Mr. Catbird came to their rescue. "Don't bully these good people!" Mr. Catbird cried, as he settled himself in front of Reddy Woodpecker. "If you had heard what old Mr. Crow said about you, just before you arrived, you'd understand why Mr. and Mrs. Chippy don't care to tell you where their nest is."

Reddy Woodpecker glared at Mr. Catbird. "Old Mr. Crow? Who's he?" Reddy demanded. "I haven't made his acquaintance. I'm sure he can't know anything about me."

"Ah! Perhaps not!" Mr. Catbird answered. "But he knows what sort of a fellow you are. He has met others like you."

Reddy Woodpecker sniffed. "I never saw a Crow that wasn't a rascally blackguard," he snapped. "There never wasn't a Crow that wasn't a nest robber."

"Chip, chip, chip, chip!" Mr. Chippy interrupted. "What's he saying?" Reddy Woodpecker asked Mr. Catbird. "He says he agrees with you."

"Then he has more sense than I thought," Reddy Woodpecker observed. "And if Mr. Crow spoke ill of me I hope Mr. Chippy has enough sense not to believe him."

"Chip, chip, chip!" "What's he saying now?" Reddy Woodpecker demanded of Mr. Catbird. "He says he agrees with you, Mr. Crow," Mr. Catbird explained pleasantly. "Then he hasn't any sense at all!" cried Reddy, darting a fiery glance at little Mr. Chippy.

The whole company couldn't help giggling when he said that. And Reddy Woodpecker promptly lost his temper. "I've planned to spend the summer here," he said. "It's too late now to move on. But I can understand at last why none of my family has visited this neighborhood for many years. It's a pleasant enough place. But the neighbors aren't my sort at all."

Canvasses Show Senate Majority for Bonus Bill Opponents of Measure Say Defeat of Cloture Rule to Limit Debate Practically Assured.

Washington, June 11.—Informal canvasses made by leading opponents of the soldiers' bonus bill, were said to have disclosed a senate majority for the measure of practically 3 to 1. This compares with the nearly 5 to 1 vote by which the bill passed the house.

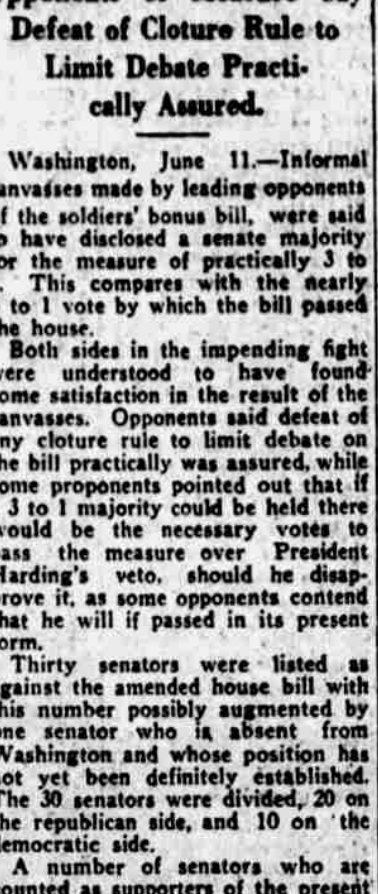

Both sides in the impending fight were understood to have found some satisfaction in the result of the canvasses. Opponents said defeat of any cloture rule to limit debate on the bill practically was assured, while some proponents pointed out that if a 3 to 1 majority could be held there would be the necessary votes to pass the measure over President Harding's veto. Should he dissent, it, as some opponents contended, that he will if passed in its present form.

Thirty senators were listed as against the amended house bill with this number possibly augmented by one senator who is absent from Washington and whose position has not yet been definitely established. The 30 senators were divided, 20 on the republican side, and 10 on the democratic side.

A number of senators who are counted as supporters of the present bill, if no definite one can be put through, will join in a fight to amend the measure reported by the finance committee. Some of them favor a cash feature with other important changes, but the extent to which it will be possible to change the pending bill is regarded as problematical.

The labor of stirring milk may be obviated by putting a large, clean marble into the pan. The marble will automatically do the stirring while the liquid cooks and there will be no burning.

You don't have to coax big and little folks to eat Kellogg's Corn Flakes

Just as soon as you serve Kellogg's you'll note fussy and fazed appetites getting mighty sharp; you'll find big bowls being handed back for "just a few more Kellogg's, mother—they're wonderful!"

And, that'll make you glad, for Kellogg's Corn Flakes are a great speed-start for the day's doings! They make for health and happy digestion! Kellogg's are never leathery or tough, but always joyously crisp!

Kellogg's—the original Corn Flakes—will be a revelation to your taste if you have been eating imitations! For your own enjoyment, do this—compare the big, sunny-brown Kellogg's Corn Flakes with other "corn flakes." Eat some of Kellogg's—then try the imitations! You'll realize then why Kellogg's Corn Flakes are the largest and finest selling cereal in the whole world!

Do more than ask for "corn flakes." Insist upon KELLOGG'S Corn Flakes in the RED and GREEN packages! My, but it's worth while!

USE BEE WANT ADS—THEY BRING PROFITS

REO

Vast Volume—or Quality? If a Reo motor car were built to compete with the rank and file of automobiles on a mere price basis—it could not be a Reo. Because vast volume is essential if price alone be the goal. A policy of "Volume First" renders impossible that close attention to details—that care in assembling—and the rigid inspections and tests that each individual Reo must pass. Consider Reo in the quality—not the price—class. Then you will compare Reo with the few built for the approval of the Elect—not the many built for careless, or inexperienced, or short-sighted buyers. The eye of the expert sees in a Reo a thousand details that are done better—and he sees depth as well as beauty, in the finish of a Reo. At the Reo price you obtain—and the Reo reputation guarantees—vastly more than the slight difference in price between Reo cars and the rank and file of mediocrity.

Alamito The Safe Milk! DO UGLA 0409 AND OUR WAGON WILL STOP

ADVERTISEMENT. How to Make Jellied Strawberries A Delicious Novelty Every Housewife Will Want to Try This Recipe

By Ann Frocter. Something new and delicious in the line of preserves that every housewife will want to make this season is Jellied Strawberries. Only three minutes' boiling is required and the process is so simple and easy that success is assured at the first trial.

Soak only small or medium sized, fully ripe berries. After hulling, add juice of 1 lemon and weigh out 2 lbs. berries, including lemon juice. Spread berries on their sides in single layer on flat plate and gently press each berry nearly flat with bottom of small bottle. (This leaves skins nearly intact, but ruptures fruit inside and makes it hollow, allowing boiling sugar to saturate tissues quickly.) Measure 7/8 leveled cups (3/4 lbs.) sugar into small pan. Place about a cup of berries and juice in large kettle and cover with layer of sugar. Continue placing layer of sugar over each cup of berries and put balance of sugar on top. Allow to stand over night, so that part of sugar will be dissolved, and mixture can be stirred and cooked without crushing fruit. Stir constantly and bring to a vigorous boil over the hottest fire. Boil hard for 3 minutes with continual stirring. Remove from fire and add 1/4 bottle (scant half cup) CERTO, stirring it in well. Skim at once and pour quickly within five minutes from removal from fire.

The really astonishing results obtained by those who follow this recipe is due to the use of Certo, the pure concentrated jelly-making principle of fruit. It contains no gelatine or preservative and is highly endorsed by leading domestic science authorities and housewives who have used it. "Certo Process" you can make jams and jellies from all kinds of fruits, either fresh or canned, with only one minute's cooking. These keep perfectly.

The above recipe and nearly 100 others for making delicious jellies and jams by the "Certo Process" is found in the Certo Book of Recipes, a copy of which will be given to you by your grocer or druggist when you get Certo. Extra copies will be sent free if you write to the Pectin Sales Company, Inc., Dept. 109, Rochester, N. Y.

IMPORTANT—Use Certo this year in making all your jams and jellies. It saves time, worry and boiling. The "Certo Process" never fails and saves money, because you make half as much more jam from the same amount of fruit. Jam and jelly made this way keep perfectly.
