A portion of the mission study books have arrived and may be purchased at the Y. M. C. A. rooms. All who have not yet registered in this course are urged to do so at once in order that more books may be ordered immediately.

Bruce Benedict, M. E. '01, is spending a few days in Lincoln while enroute to Johnstown, Pa., where he goes as inspector of steel cars for the Burlington. He has been promoted from the position of assistant master mechanic at Alliance.

Departmental.

A new clock was put up in the library Monday.

The class in German 17 is studying phonetics.

Beginning classes in astronomy are unusually large.

The botanical department classes are usually large this year.

The course in dentistry has been increased from three to four years.

Edward Olson has left for his home at Orleans, Neb., on account of illness.

More men are needed in the University chorus. Students who can sing are urged to join.

The chemistry class in second year domestic science is making qualitative analysis of water.

Some special work is being done by the advanced plant pathology class. A study of plant diseases is being made.

The botanical department reports a very large class in Freshman botany. The class is composed of ninety-two students.

Members of the leaders class in men's gymnasium will take charge of the first year squads for the first time next Wednesday.

The class in music 1 is short of books. Those used last year would fill the want. Leave name with Mrs. Raymond if you have one to sell.

The law library has received a number of new additions. The students are waiting for Paige's work, which has been delayed in delivery.

Owing to insects and other conditions the border plants in the greenhouse are not doing well. As a result next year's supply will be insufficient.

The charts on prices made by the debaters against Missouri last year, have been transferred to the political economy department for use in class work.

The class in German 17, the teachers' course, will use three grammars for comparative work this year. The Edgren-Fossler, Joynes-Melssner and the Spauhoofd.

Professor Swezey's class in geodetic astronomy has been determining time latitude by means of planet lines and other simple methods. More complex and scientific methods will be used later.

The laboratory division in zoology, which has been meeting from 8 to 10 on Tuesday and Thursday, has been divided and assigned other hours in order to make room for the medical students.

The Monday, Wednesday Friday and Saturday divisions in forge work are very large.

The class in experimental ecology is doing laboratory work in the greenhouse.

Professor Morse has an electric door-opener for his office. It is operated by means of a push-button.

A supply of iron for use in the forge shop was received recently. Enough is secured at one time to last a year.

The class in beginning shopwork, finds it extremely difficult to do satisfactory work because of its crowded condition.

Several large tables, which are to be used in the law library, are on the road. They will be placed in at once, as soon as they arrive.

Professor Caldwell's class in "Current Events" will discuss at this week's Thursday afternoon meeting the protection movement in Great Britain under the leadership of Chamberlain and Balfour.

A new seminar class in American history has been introduced. It is very popular with graduate students as only fifteen of the members are undergraduates. It consists of a close study of the period between 1850 and 1860.

Fifty-two young men and women are in the mission study course. One of the most popular studies is "Princely Men in the Heavenly Kingdom." The class meets with Mr. E. L. Witte in the Y. W. room Sunday at 9 a. m.

The attendants at the greenhouse are busily engaged in "slipping" and transplanting. Nearly all the bulbs are in the ground yet and will not be taken up until a heavy frost comes to kill the tops.

The weather department puts out regularly three bulletins as follows: First, the daily weather map. Second, a weekly crop bulletin. Third, a monthly report of the weather in the state.

There are one hundred and forty weather stations in the state, each one keeping records from day to day, which are submitted for publication every month.

The current number of the American Mathematical Monthly contains a contribution by Professor R. E. Moritz, entitled, "On Certain Proofs of the Fundamental Theorem of Algebra." The paper points out certain fallacies in the demonstration of this theorem by such well known mathematical as Cauchy, Todhunter, Chrystal and others. While admitting the difficulty of presenting a vigorous demonstration of the theorem that every equation has a root, Prof. Moritz points out that obstacles in the way of proof which can not be avoided should be frankly recognized as such.
