State Hist. Society.

VOL. III. NO. 103

UNIVERSITY OF NEBRASKA, LINCOLN, THURSDAY MARCH 10, 1904.

PRICE 3 CENTS

READY FOR BIDS

Physics and Farm Building to be Advertised Saturday.

The completed and revised plans for the new physics and state farm buildings have been returned to the office of the Superintendent of Construction, and bids will be advertised for Saturday in the Lincoln and Omaha papers. No material alterations were made in the original plans for the physics building, as it was discovered that they might be carried out as at first intended, without doing away with the athletic field. Even the contemplated shortening of the north wing will not be made.

This will necessitate the extending of the field clear to the board fence on the north end. The earth excavated for the new building will be used to fill in the hollow there, and it is thought that the work may be done at very little expense to the athletic board. Ample space will be left for the north goal, although the one of the south will be somewhat inconveniently located on account of the building just back of it. In the southeast corner of the field only about four feet will intervene between the building and the goal line. The northern wing will extend to the west along this line for about twenty-nine feet, but as has already been explained, plans in this corner may be transferred to a corresponding place on the other side of the field if necessary.

On account of the time that will intervene before the next meeting of the regents it is possible that the bids for the new structures will be opened before that session. Work will actually commence about the 20th of April, and pushed with all speed in order that the buildings may be in use by the first of next year. A section about 48 feet long on the southern end of the grandstand will have to be removed to the northern end.

In addition to the changes in the chemical laboratory already announced plans for an entirely new addition to the old structure are being made by Superintendent of Construction Chas. W. and will be submitted to the regents for approval as soon as completed. For the present the additions will be constructed with the idea in view of raising it, to the same height as the original building. It will extend south of the present laboratory about the same distance as the length of the northern wing, and will be laid out in nearly symmetrical lines with that portion as possible. It is thought that the \$30,000 appropriated by the legislature for this purpose two years ago will be sufficient for the expense of this addition, as well as for remodeling the building. A new entrance will be made at the west side of the building at about the middle of the completed structure.

The University will have practically four new buildings under course of construction, therefore, as soon as the weather permits, to say nothing of the temple. Yet notwithstanding these improvements we will be much cramped for room. The greatly increased demands of the law and medical departments make the construction of a building especially for them a mere matter of time. The regents foresaw the ultimate need of such a building last year, when they adopted a model of the campus as it will ultimately appear. This calls for a law and medical building just west of the library, and modeled after the style of that structure. It is possible that the next legislature may be asked for an appropriation for this building.

The demands for a new auditorium are also becoming insistent. As conditions exist at present, our chapel is in almost constant use as a lecture or recitation room, or as a gymnasium. It

is possible, however, that the need will be satisfied by the Temple building.

The plans for the Administration building will admit of an addition to the northern side of that structure when it becomes necessary. This, however, is too far in the future to require attention at present, since the new building will amply fulfill the uses to which it is to be put.

THE EDUCATIONAL EXHIBIT.

Material Coming Still and Shipments Will Soon Be Made.

The material accumulated for the Nebraska educational exhibit at the world's fair is gradually finding its way to St. Louis. The returns from the schools and various woman's clubs of the state have been most satisfying, as a large quantity of fine work has been received. Since the first of the year, and especially during the past few weeks, Dr. Barbour and his assistants have been greatly rushed in preparing material for shipment. The work of classifying, assorting and packing has required the taking of great pains and care, as well as much skill.

On February 20th, the first carload of material was shipped. An enormous furniture car was completely filled and still a part of the material then on hand was left over until the next shipment, when another carload of material gathered in both Lincoln and Omaha will be sent.

The Lincoln schools have promised an unusually fine art exhibit, and there is little doubt but that they will come up to expectations. It will be placed in the Nebraska booth in the Palace of Education. As a special feature Superintendent Stephens is endeavoring to have a phonograph record of singing done in each of the grades, to illustrate the vocal work done in the city schools here.

Miss Edna Bullock, who is connected with the circulating library at the capitol, is gathering statistics pertaining to all the libraries throughout the state. She is also making a complete collection of photographs of these, as far as it is possible to obtain them. These will include both internal and external views.

The state museum has been drawn on very liberally, yielding for temporary use the best of its treasures, which will be classified and apportioned among the Agricultural, Mines and Metallurgy, Education and Irrigation buildings. The attempt is being made to have all schools, both private and public well represented. Whatever space remains over when the exhibit is installed will be used for the University exhibit. Material is still coming in abundance; every inch of space will be in demand.

Mr. Kimball, a prominent Omaha architect, and formerly a student of this University, who designed the electrical palace, which is accounted one of the most beautiful buildings on the world's fair grounds, has finished the full designs for the educational booth and the Mines and Mining booth. These were forwarded Monday by the superintendent of the educational exhibit for the approval of the chiefs.

The design for the Nebraska building is to be in white like marble of very choice order, decorated with flambeaux, open book and scroll designs, with the great seal of the state of Nebraska, the seal of the University, and symbols of education in relief. Mr. Kimball also designed what is known as the Nebraska Agricultural Theatre, which has a capacity for seating several hundred people and is built in the main aisle of the Agricultural building, which covers twenty-two acres.

The following circular sent out by Dr. Barbour contains much important information, calling attention among other things to the fact that all of our exhibit must be installed by April 29th or a forfeit paid.

"All departments of the University

of Nebraska which are to be represented by exhibits of any kind at the St. Louis world's fair, are urged to take immediate action. In fact everything should be in hand now, and all are urged to send at once whatever they have to offer. The next shipment will be made about March 20. After April 1st, it will be difficult, if not impossible, to receive exhibits, since everything must be completely installed by April 29th, or a forfeit paid. You are particularly urged to send any and all published books and papers, or at least a list of them, including those written by the heads of departments, instructors or fellows, or students. Please give a concise history of your department and its growth. This history and any accompanying statistics may be written in lead pencil and we will transcribe it. Send any photographs of lecture rooms and laboratories, any original models, diagrams, etc., also students' work, etc.

"We are forced to call attention to the need for immediate action, as well as to the desirability of having the University of Nebraska well represented, standing as it does at the head of our educational system."

A JOINT PARTY.

Three Literary Societies to Give Party in Art Hall.

On Friday evening one of the largest annual affairs connected with the University will occur. The Palladian, Union and Delian societies will hold their annual joint party in the art gallery in the library building.

These parties have come to be a regular feature of the social life of the University and are greatly enjoyed by all who are privileged to attend.

Much attention was drawn to the party last year because dancing was left out. It was believed that it would be impossible to entertain such a large crowd without dancing, but all who were present last year will remember that it was adequately demonstrated that the absence of dancing did not in any way detract from the fun.

The party this year will be conducted upon the lines of last year's party, and no dancing will be indulged in. Ample entertainment has been provided, and it is expected that the party will be a great success. A short musical program will be rendered.

Members of the faculty who are members of the three societies will attend.

The committee having the party in charge is as follows:

Russell Moore, Palladian, chairman; Messrs. Doughters, Anderson, Town, DeCon, Waltman; Misses, Barnhart, Mathews and Hollingsworth.

Corporals Appointed.

The following orders were read at drill last evening:

Special Orders No. 15—
The following appointments are hereby made in the battalion to take effect this date:

Company E—Private F. T. Dayton, to be corporal, signal department.

Private A. L. Nye, to be corporal.

Private F. A. Stewart, to be corporal.

They will be obeyed and respected accordingly. By order of

CAPTAIN CHASE.

Earl J. Woodward, M. D., treats diseases of the eye, ear and throat. Rooms 207-08 Richards block, Phone 666.

Sam's Cafe. The only place in the city to get the famous "Little Gem Hot Waffles." Special service for ladies.

The Whitebreast Co., at 1106 O St., is the place to buy coal.

Lincoln Transfer Co. Baggage. Phone, 176.

Chapin Bros., Florists, 127 So. 13th.

FRESHMEN VICTORS

Run Over the Sophomores and Win the Championship.

The Sophomores were easy victims for the Freshmen in a game for the interclass basket ball championship last night that although fast from the first whistle, was too one-sided to arouse much enthusiasm in the small audience present. Miller began the ceremony with a goal on the second pass, and followed it with three more in as many minutes. After that he slowed up a little, but added two more field goals before the half ended. Mosher at center did not have any trouble in out-jumping his much shorter opponent, and also managed to get loose from him long enough to throw nine goals from the field. In this half Miller and Mosher were decidedly the stars, although Mathewson did some very excellent work for the Sophomores by throwing six goals. The half ended 37 to 17 in favor of the Freshmen.

The second half was much more interesting, since the Sophomore guards did better work, although the forwards could not locate the baskets. Swan, who had been unable to score before, threw three goals, and Mosher got the same number. Lott came up from guard to toss a couple also. In this half the score was 21 to 19 for the Freshmen, making the final score 57 to 27. This is the largest score made this year in basket ball, and there can be no room for the squabble that ensued from the closeness of the score in the final game last year.

The Freshmen were superior to their opponents in every respect. The goal throwing of Miller and Mosher was easily the feature of the evening, while in team work the Sophomores could not approach them. Mathewson and Krake did the only good work on the Soph side, but could not overcome the other team unaided. Kimmel, a regular forward, did not appear, and while his substitute, Corlett, did creditable work, the team as a whole suffered. The lineup of the teams was:

Sophomores.	Freshmen.
Mathewson forwards.....	Miller
Winchester	Swan
Krake center.....	Mosher
Clark guards.....	Lott
Corlett	Hammill
Swan 5, Lott 3, Krake 2, Mathewson 6, Winchester 2, Corlett 1.	

Goals from field—Miller 4, Krake 2, Mathewson 2, Winchester 1.

Officials—Hoar and Beers.
After the game the Sophomores elected L. S. Krake, of West Point, captain for next year.

Between the halves a very fierce game was played between the Freshman Laws and Senior Laws, which ended in a victory for the latter by the score of 19 to 9. The game was remarkable for the football tactics and horseplay indulged in by both teams. Mitek and Lightner did the best work for the Seniors, while Laird was the only Freshman who seemed to have an idea of what was wanted.

Junior Cap Committee Meets.

The Junior Cap committee met Tuesday, but no definite arrangements for securing the distinguishing headgear were reported. It is planned, however, to obtain some design, if possible, that will be suitable to the boys and girls of the class alike.

Special rate to students at Hendry's.

Drop in and see our stock of spring shoes. At Sanderson's.

All broken lots and sample shoes. Big Reduction.—Sanderson's Sale.

As spring approaches better brighten up your cadet suit by securing an extra pair of trousers. Splendid values.—Paine's Clothing Store.
