

Announcements

Associated "Barbs" meet Monday at 10 a. m., in the chapel. Speeches. Edwin F. Myers, Pres.

I hereby announce myself as a candidate for student members of the Athletic Board,
JAMES L. VAN BURG.

I hereby announce that I am a candidate for election to the Athletic Board as student member.
LOUIS P. HEWITT.

I expect to be a student in the University next year and hereby announce myself as a candidate for student member of the Athletic Board.
CYRUS W. MASON.

I expect to be a student in the University next year and hereby announce myself as a candidate for student member of the Athletic Board.
ED HAGENSTICK.

I, J. R. Molony, expect to be in school next year, and hereby announce myself as a candidate for the Athletic Board, subject to the approval of the student body.
J. R. MOLONY.

The English club will meet Saturday evening, April 7, with Miss Streeter and Miss Stetter, at 1227 D street. Miss Constanter, Mr. Rice and Miss Birchall are on the program. Criticisms will be led by Mr. Brown, Miss Hopkins and Miss Green.

The museum has a favorable chance of securing a profitable addition to its stock. Monday four elephants belonging to Campbell Bros., circus were so unfortunate as to be cremated at Fairbury, and in consequence four excellent skeletons are available. A newspaper report said that these had already been granted to the University, but no assurance to this effect has been received as yet. Dr. Condra may go down today and investigate with a view to securing them for the museum.

Engineering Notes.

J. M. Rohrbaugh, civil engineering '98, is in Lincoln for a few days, and has been visiting the department.

Engineers observe with considerable satisfaction that their notable innovation in advertising is receiving the true praise of being copied.

O. H. Timmerman is assisting Mr. Stevens in his office work for the geological survey.

The classes in civil engineering 26 under the direction of Professor Chaburn, are making a number of tests of paving bricks which have been offered as paving material for Lincoln. Twenty bricks were placed in an iron cylinder, called the "rattler," which is then revolved about 1,800 times at the rate of one revolution in two seconds. The loss in weight through abrasion is the factor deciding as well as a mechanical test can their wearing qualities.

The much postponed game between the civil engineers and the electrical engineers will be played the first day the grounds are free and the weather permits. The boys are getting into practice at odd moments and a great game is expected.

Mr. Chas. E. Reed, who was president of the Engineering society last year, stopped in the city the past week to look over the old field. Mr. Reed is now a member of the firm of Kelsey & Co., of Salt Lake City, and from all indications is doing very well.

Lieut. Chas. Weeks, '98, now of Fort Crook, was a visitor in the electrical department Thursday.

It has been decided to run the excursion to Omaha the last three days of encampment week. This will interfere with the men who have to go to camp, but it seemed that no other time could be found which would interfere with so few.

Professor Bessey has received from a friend in Porto Rico a little packet of plants prepared by the school children of the island schools. They are mostly cultivated plants and are valuable as showing what kind of plants are the most common on the island. The work is as well done as it would have been in the schools of similar grade in the United States, and shows that the teachers are doing good work in the study of nature.

If you want your class picture framed in best style of workmanship and latest designs in moulding, the Lincoln Book Store is the place.

For Girls Commencement Gowns

There are many varieties of plain white goods, but none quite so popular as the Persian and French Lawns. Any of the goods mentioned will wash well except the French Organdies, which are used for fine gowns that must be dry cleaned. Most popular prices are 30c, 35c, 40c, and 50c.

- Persian Lawns, 32-inch, 20c, 25c, 30c, 35c, 40c, 50c, 60c.
- Silk Finished Persian Lawns, 32-inch, 40c, 50c, 60c.
- Scotch Organdies, 32-inch, 15c, 20c, 25c, 30c, 35c, 40c, 50c.
- French Organdies, 67-inch, 65c, 80c, \$1.00, \$1.25.
- Swiss Ululls, 32-inch, 25c, 30c, 35c, 40c, 50c, 60c, 75c.
- Wash Chiffons, 48-inch, 40c, 50c, 60c.
- French Lawns, 48-inch, 50c, 60c, 75c, 85c, \$1.00.
- French Lisse, 48-inch, 50c, 60c, 75c.

Silk-warp materials are much used. They have the appearance of all silk, and come plain or in neat little figures of silk, 28 to 30 inches wide, at 18c to 55c a yard. They have the same silken appearance after washing as before.

MILLER & PAINE
