Publishers, Springfield, Mass.

Campus Gleanings

The class in general Botany (2) is now studying the beautiful plants known as Desmids and Diatoms.

A meeting of the Medical Society of the University will be held tomorrow in M 301. Papers will be read by Ira J. Clarke and John Buis.

Kappa Alpha Theta will give a dancing party tomorrow night at Walsh hall. On Saturday evening the annual banquet of the sorority will be held.

Several important new books have been received recently by the Professor of Botany. One of the most notable is that by DeVries on the Origin of Species and Varieties of Mutation.

The Forest club will meet Saturday at 8 p. m. in N 102. M. A. Benedict will discuss the "Seasoning and Treatment of Timber," and B. R. H. d'Allemand will give a talk on the "Forest Reserves of Nebraska."

Up to the time the paper went to press last evening the meeting of the Board of Regents had not been called. The meeting was announced for 2:00 o'clock, but because of delay of trains only two regents had arrived.

A crowd of about sixty university and academy students participated in a roller skating party at the Auditorium skating rink yesterday morning. The sport of some of the beginners terminated in a Virginia "reel."

Professor Bessey has been asked to review De Vries' new book, "Species and Varieties," for the New York Independent. Some time ago he reviewed Professor Morgan's book on the "Evolution and Adaptation," for the same journal.

In the class in advanced Plant Pathology, one of the special subjects of study is the decay of timber, in and out of the tree. Mr. d'Allemand is the field collector in this work, since he has had much experience in the great lumber yards.

Phi Rho Sigma will open their new quarters in the Farmers' & Merchants' block tomorrow night. The new quarters are much better adapted to the needs of the society than were the old quarters in the Halter block from which they were driven by fire some two weeks ago.

The Junior caps have made their appearance on the campus. Their style is something new in the line of class caps, resembling that of a golf cap, brown with red lettering. The chairman of the cap committee has announced that all juniors who have ordered caps can receive them at the Armstrong Clothing Co.

St. Valentine's Day was fittingly observed in the Union Society last Friday night. The hall was beautifully decorated with artistic designs appropriate to the occasion.

The early part of the evening was spent in a guessing contest. The winner, Miss Mabel Pepon, was awarded a beautiful heart.

After the contest J. E. Bednar spoke briefly on the subject, "St. Valentine," treating of its origin, history and object.

The members of professor Smith's course in education 10 have been visiting the church secondary schools of the city for the purpose of comparison with the early church secondary schools. Mr. Heelan, an ex-University man, and a graduate of St. Jesuit School of Kansas, addressed the class yesterday on the "Jesuit School of Today," giving a good idea of the course corresponding to our high school course. Mr. Heelan is now a member of the staff of the Lincoln postoffice.

M. H. Swenk, assistant in the Department of Entomology, is making a number of addresses at farmers' institutes over the state this month. He spoke on the Hessian fly at the institutes held at Edgar and Sutton on Tuesday and Wednesday, respectively, of last week.

The university has been represented

To California

In less than three days from Lincoln—what an agreeable change! Why endure three more long months of winter weather, when you can leave it all and go to balmy California on a train like the

Colden State Limited

Every comfort and convenience—agorgeous hotel on wheels, if you please—expressly for you.

Daily via El Paso and the Southern Pacific through New Mexico. Most southerly course—quickest way to reach the realm of summer. Every mile is a mile away from winter.

Full information about this train and other service to California, with booklet "The Golden State," promptly on request.

F. H. BARNES

G. P. A.

at farmers' institutes the past week by C. W. Pugsley and Val Keyser. An unprecedented interest has been shown in farmers' institutes this year and the demand for lecturers from the department of agriculture is far beyond the supply.

Engineering Notes.

The Mechanical Engineering Department has recently purchased a complete Mahler's Bomb Colorimeter. This is a very valuable piece of apparatus in fuel and oil testing course. The department has bought considerable valuable apparatus for this course in the past two years. An addition of five more planimeters has been necessary to meet the increase of students in engine testing work. The department now has fifteen of these expensive instruments.

All engineering students and others having railroad or engineering friends should remember that Professor Goss will be here March 13th. Anyone having friends who would be interested should hand their names to an officer of the Engineering Society as they wish to send them a personal invitation. Professor Goss has a world-wide reputation in experimental locomotive work. Everyone is cordially invited to hear him.

Elliott's Sutorium, cleaning, dyeing and repairing. Prices reasonable. 1136 O street. Both phones.
