UNIVERSITY OF NEBRASKA, LINCOLN, SATURDAY, MARCH 18, 1905.

Price 5 Cents

## THE FIRST GAME

Nebraska Plays Wesleyan This Afternoon on Campus.

The Dates for the Gymnastic Contest and Exhibition Have Been Set.

The first baseball game of the season will be played this afternoon on the University campus. This game will be between Wesleyan and the 'varsity and as it is a practice game it would not be safe to make any predictions. The men have been practicing every afternoon of the past week and many candidates have been working hard for the different positions.

It is Captain Bender's intention to give all the candidates a trial on this afternoon at the position for which they are trying. This will mean that about twenty-five men will play in the game for the 'varsity. The baseball enthusiasts will have an opportunity to get a line on the different men and study their style of play. If the indications count for anything there is little doubt but that Nebraska will have a championship team this year. The game will commence this afternoon at 2:30.

The date for the second gymnastic contest has been set for March 29. This will be the last contest and the one which will decide who represents Nebraska at the Western Intercollegiate Gymnasium meet in Chicago the last of April. At the first of these contests some time ago Johnson won first with Copeland and Pipal second and third respectively.

The contest held March 29, will be on three pieces of apparatus, long horse, side horse and flying rings. The same men that took part in the previous contest will enter this one.

The exhibition arranged for by the Physical Training Department is to take place on April 7. The gym classes have been divided into three squads, each squad is doing work on the horizontal bar, long and side horses. Besides this work will be presented as it is done at every recitation of the class. Men from the advanced courses have been secured to do some specially difficult work and in all about two hundred men will participate in the exhibition.

Supt. W. L. Stephens of Lincoln will address the Pedagogical Club at its next meeting Wednesday evening, March 22. The subject of his address will be, "Personal Characteristics that Influence the Employment and Success of Teachers." An invitation is extended to all persons interested in pedagogy. Supt. Stephens has had many years of experience in public education and his address will doubtless prove very interesting and valuable to pedagogical students. The meeting will begin at 7:30 p. m. in U 212.

Elliott's Sultorium, cleaning, dyeing and repairing. Prices reasonable. 1136 O street. Both phones.

Erle B. Woodward, M. D., diseases of eye, ear and throat. 207-8 Richards block. Phone 666.

Uni, Pennants at the Co-op.

## Junior-Senior Reception.

TICKETS \$1.00.

EVERYBODY INVITED.

APRIL 8, 1905.

### Track Men Meet.

The track men are requested to be out for practice this afternoon. The sprinters will practice in the gym owing to the dampness of the weather. The long distance men will continue their long runs outside and the jumpers and pole vaulters will practice in the gym. On next Tuesday at chapel time Dr. Clapp has arranged a mass meeting of all the men desiring to enter track work this spring. The object of this meeting is to find out the number of men who intend to do track work and the events which they are going to enter. In this way Dr. Clapp will get the work into a systematic order so that the most may be accomplished for the good of the men in the events.

All men are urged to be out to this meeting as some very important directions will be given to all the men by those having this work in charge.

### Secretary Bailey Sunday.

J. B. Bailey of Omaha, state secretary of Y. M. C. A., will address the men's mass meeting at the Oliver at 4 o'clock tomorrow afternoon. Mr. Bailey has been connected with the Y. M. C. A. for several years and his helpful influence has been felt by every organization in the state. Not only is Mr. Bailey a very popular man but he is an excellent and entertaining speaker. The subject of his address will be "Who is Master?" This meeting will be the last but one of the meetings of the Y. M. C. A. this year. Every student will be well repaid for attending tomorrow's meeting.

### Miss Archibald Recital.

Miss Alleyne Archibald, instructor in the University School of Music, will give a very interesting and artistic piano recital, next Thursday evening, March 23rd in Memorial hall, at 8:00 o'clock. The public is invited. Program as follows:

Beethoven, Sonate, F minor, Op. 57. Allegro assai. Andante con moto. Allegro ha non troppo.

Schelling, Romance, C sharp minor. Heymann, Elfenspiel. (Concert study).

Schelling, Gavotte, C sharp minor. Schumann, Des Abends, Op. 12. Warum, Op. 12. Romanza, F sharp Major, Op. 28.

Chopin, Scherzo, B minor, Op. 20. Tschalhowsky, Concerto, B minor, Op. 23. Andante non troppo e molto maestoso. Andantino semplice. Allegro con fuoso.

Orchestral parts on second piano, Mr. Eames.

Oyster stew 25 cents at Cameron's new Restaurant, 119 South 12th.

### Engineering Notes.

Mr. Godfrey F. Rhodes, Division Superintendent of the B. & M. Lines west of Lincoln has just presented to the University Library, a collection of books and pamphlets on Engineering and railroad subjects. These are books that Mr. Rhodes has accumulated during his many years of connections with the Motive Power Department of the Burlington and other roads. Mr. Rhodes also presented to the library 10 large portfolios of reproduction of Famous Paintings. These reproductions were executed in England and secured there by Mr. Rhodes some years ago. They constitute a valuable addition to the teaching apparatus of the University Art School and add noticeably to the art treasures of the library.

The recent publication of the list of Engineering graduates from the University who are now holding good positions has brought to the University much additional information in regard to other graduates not mentioned and students who left the institution before receiving their diploma. It develops that a large number of students who left the University before graduating have also won responsible positions. A notable instance of this is Clark H. Pool of Lincoln who entered the Electrical Engineering course at the University in September 1895 from an eleven grade school. After studying four and one-half years he obtained a position with the New York Telephone Co. as an engineer. On March 1st he completed his fifth year of service with that company.

Professor George H. Morse of the Department of Electrical Engineering has recently received a letter from Charles E. Downton, foreman of apprentices for the Westinghouse Electric and Manufacturing Company of Pittsburg, Pa., stating that arrangements had been made to have the shop interiors which were shown by moving pictures in the Palace of Machinery at St. Louis Exposition reproduced at the University on the evening of March 21st. These pictures were shown to thousands of persons in the beautiful Westinghouse Theatre in the Palace of Machinery at the Fair and will be given at the University just as shown at St. Louis. Students and friends will thus have an opportunity to visit without expense the Westinghouse Company's works at Pittsburg, Pa.

Manifolding and typewriting. See Ed. Affolter, check room, basement Uni hall. University rates.

Get a pennant at the Co-op.

## A "FRAT" LEAGUE

Robertson Will Learn Position of Fraternities and Fix Schedule.

Fraternity Representatives Meet and Form Baseball League.

Representatives of most of the fraternities in the University met Thursday evening at the Sigma Chi house and laid plans for an inter-fraternity baseball league. A good deal of enthusiasm was shown and after considerable discussion Claude Robertson was appointed to ascertain the position of all the fraternities and to arrange a schedule of games. Whether the schedule, when completed, will mean that every fraternity will play every other and that the one with the highest percentage will win the pennant, or whether there will be a division into two groups and the winners of the two groups play for the honor has not yet been decided upon. The schedule will be made out today. In past years the inter-fraternity games have aroused a great deal of interest and have resulted in the development of some good baseball material.

The games will be played off on Saturday mornings or at any other time when the first team is not using the field.

### Convocation.

Professor G. T. Sweezy, of the University Department of Astronomy, will give his third lecture on Astronomy at Convocation Monday. This is the third of a series of lectures that Professor Sweezy has been giving on this subject at different times this year. The lectures are interesting and instructive and no student should neglect the opportunity to enjoy a half hour's recreation from the grind of study and to hear this excellent lecture.

The Convocation period Wednesday will be occupied by a talk given by Rev. J. E. Tuttle on a subject to be announced later.

Some new and improved "apparatus" has been added to the law laboratory. Dr. Pound has recently procured a complete set of practice blanks, including summons, subpoena, and replevin blanks for practice courts. Heretofore the law school has been supplied with printed conveyancing blanks but the practice blanks have been laboriously written by hand. The new printed blanks will not only save a great deal of time and labor but will familiarize the law students with the methods used in actual practice.

The Auditorium skating rink seems to retain its popularity with the students, for a crowd of them are to be found there every afternoon and evening. Get into the game and come along.

Chris' Bath House, corner 11th and P streets.

L. W. Pomerene, Plumber, 238 S. 11th street.

The Co-op has just received a fine lot of pennants which are certainly the finest lot seen in the city this year. They will surely please the taste of even their most fastidious customers.

For Furs see Steele, 143 S. 12th St.
