NEBRASKA'S DEBATERS

Debating Board Finally Decides Who Shall Constitute the Two Teams.

THE WASHINGTON TEAM.
 John D. Ringer, '03, Law '05.
 Albert Melvin Levy, '07.
 Joseph Magnus Swenson, '08.
 Alternate—Merton Leroy Corey, Law '07.

THE IOWA TEAM.
 Charles Abobtt Sawyer, '06.
 Earl Morton Marvin, '06.
 Charles Algernon Sunderlin, '07.
 Alternate—Frank August Peterson, '05.

The 1905 Intercollegiate Debating team were appointed yesterday afternoon by the Debating Board. The eight men who have been awarded the honor of appointment to the team, and upon whom the responsibility rests of maintaining Nebraska's unparalleled record of success and of adding two more scalps to the seven already hanging in our trophy room are as given above.

The final selection of the team, as a result of two months' deliberation on the part of the faculty judges on the Debating Board, has been accompanied with an unusual amount of interest not only among the members of the squad, but among other students interested in debating. The contests for appointments waxed warmer than on any previous years and an unusual number of tryouts were necessary before the final selections could be made.

The members of the teams are for the most part new men.

C. A. Sawyer, the only old debater, was a member of the team which annihilated Kansas last spring in Memorial Hall upon the Monroe Doctrine. A. M. Levy was alternate on that team and C. A. Sunderlin was a member of the squad last year. The other speakers have never before tried for the squad.

Of our two opponents this year, Washington we thrashed at St. Louis last May but Iowa we have never met before. Both debates will be held in Lincoln, the contest with Iowa occurring Friday, April 14, and the debate

with Washington three days later, on Tuesday, April 18.

Both debates will be on the same question which is stated as follows: "Resolved, That the second sentence of the second section of the Fourteenth Amendment to the National Constitution should be repealed." This sentence reads as follows: "When the right to vote at any election..... is denied to any male inhabitants of a state being twenty-one years of age and citizens of the United States; or in any way abridged, except for the participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such a state."

The question is a live and up-to-date question, involving the problem of suffrage and negro franchise and is one which is before the National Congress and the American people today.

It is perhaps the most complex question ever debated by our debating team for years. The preparation under the supervision of Prof. M. M. Fogg has required four months of hard labor, and a great many facts which the squad have worked out through a thorough original research have been unearthed for the first time.

These huge hunks of facts backed by unimpeachable logic will be hurled at our opponents from the rostrum of Memorial Hall in the first battle occurring a week from tomorrow night and the second a week from next Tuesday.

Professor G. H. Morse of the Electrical Engineering Department, has received word from A. L. Rohrer, Electrical Superintendent of the General Electric Company's Works at Schenectady, New York, saying that he would be pleased to admit three graduates of the University Electrical Engineering courses in the Company's Testing Department. After six months' experience these young men will be advanced to responsible and well paying positions. He will also use one graduate from the Mechanical Engineering Department, putting him at once upon steam turbine work. Mr. Rohrer will visit the University early in May and give a stereopticon exhibition illustrating the General Electric Company's laboratories and shops after the style of the recent moving pictures illustrating the Westinghouse facilities.

CHEMICAL SOCIETY.

The fortieth regular meeting of the Nebraska section of the American Chemical Society will be held in the lecture room of the Chemical Laboratory

of the University today, at 8 p. m. The following program will be given:

Chemistry considered from the Domestic Science Viewpoint—Miss Rosa Bouton.

Hydrocyanic Acid—Miss Mary L. Fossler.

Recollections of Professor A. B. Prescott—Mr. Albert Jacobson.

Everyone is cordially invited to attend this meeting.

For Furs see Steele, 143 E. 12th St.

'VARSITY SHUT OUT.

Dort Does Good Work in the Box --Score, 5 to 0.

The second game with Omaha's western league team, played yesterday afternoon, was finished within the time limit and, therefore, was not entangled with "Chaseology" or any other "malicious science" maneuvers. This feature of the game was indeed refreshing to the "fans," who dislike to have the after-smack of a good game soured by a dose of "bayonet pills." The game brought out the good points of Nebraska's men and showed the influence of the game played on the day before.

The visitors realized that they were not playing marbles and changed pitchers twice; once in the second half of the fourth and again in the second of the seventh inning.

Dort stuck it out for Nebraska and put the ball over as well in the last as in the first inning. With an occasional exception his support was excellent. The first inning was fruitless on both sides, leaving a man on second for Omaha and one on third for the Uni. But in the second inning two leaguers slipped around the diamond. The home team worked hard, played good, consistent ball, but the long hard training of the opponents showed itself again in the fourth inning when Goding crossed home plate, making the score 3 to 0.

Two sensational plays in the seventh brought out great bursts of enthusiasm from the grandstand. Rine, at second, made the first one when he stopped a buzzer, which he reached with great difficulty after turning around completely, and landed it on first with only a few seconds to spare. The second one was a single handed catch out near the fence by left fielder Fenlon.

The only home run of the afternoon was made in the ninth, when Howard, of Omaha brought Welch in with him for two scores. The game resulted in a score of 5 to 0 in favor of the visiting team.

Five men walked to first. Two 'Varsity men reached first on balls and one was hit by the pitcher. The Uni, pitcher hit one Omaha man and allowed one man his base on balls.

Professor Bessey received a telegram yesterday from Washington requesting him to send Messrs. E. O. Sleske and B. R. d'Allemand to the forest reserve within a few days. Both of the men are seniors in the Forestry Department and are well equipped to take up the work which they have secured.

BIG EVENT FRIDAY

Greatest Gym. Exhibition Ever Given Here.

Nine Stunts of Exceptional Merit to Be Given.

The management of the Gymnastic Exhibition have about completed preparations for this big event. This promises to be one of the greatest athletic events ever held in the University of Nebraska. Never before has the Physical Training Department attempted to put a similar exhibition before the public. The first thing on the program will be a drill by one hundred and twenty-five men taken from the different classes registered for the class in Physical Training 14. This drill will constitute the elementary exercises given to the men just entering gym. work.

Other events will be pulled off in which the second year men will take part. The advanced men will also give the pyramids and other highly interesting stunts. The leading feature of the evening will be advanced horizontal bar work by Dr. Clapp and Mr. Lane.

The committee given in last issue are already assured of a large crowd and a very successful evening. The tickets are being disposed of very rapidly and all that remains is for every student to give this their best support.

The events to be given are as follows:

1. Light gymnastic; first year classes; 125 men in drill.
2. Class apparatus work; 4 pieces of apparatus used at same time, parallel bars, long bars, side horse, low horizontal bars; 10 men selected from first year classes on each piece.
3. Double tumbling work by Lane, Graves, Copeland and Johnson.
4. Hamburg drill by second year class.
5. Games and contests by first year classes (new feature).
6. Apparatus work by gymnastic team on parallel bars, flying rings and long horse.
7. Pyramids.
8. Exhibition of advanced horizontal bar work by Dr. Clapp and Mr. Lane.
9. Relay races for inter-class championship; 3 teams from first year classes.
10. Advanced work by second year class.

Tickets are on sale at the Co-op. and Porter's book stores. Admission 25c and 35c.

Greene's } Palace, 109 N. 11th Street.
 Barber }
 Shops } Mogul, 1144 O Street.

Chris' Bath House, corner 11th and P streets.

L. W. Pomerene, Plumber, 238 S. 11th street.

Lincoln Transfer Co.; baggage. Phone 176.

Oyster stew 25 cents at Cameron's new Restaurant, 119 South 12th.

Gymnastic Exhibition

Armory, Friday, April 7th

8 P. M.

Admission 25 and 35 Cents.
