

ENGINEERING SOCIETY GROWS

AIM IS TO MAKE EVERY STUDENT
IN DEPARTMENT MEMBER
OF ORGANIZATION.

The Engineering society was organized in the year 1900 and originated in the brain of Bruce Benedict, M. E. '01, now director of the shop laboratories at the University of Illinois.

Prior to 1900 there was in the industrial college a flourishing electrical engineers' society and a mediocre civil engineers' club. There was no mechanical engineers' organization.

Mr. Benedict, being a mechanical engineer, was left out, as it were, and so he set about the work of effecting the union of the various engineering clubs. Needless to say, he was successful and the Engineering society has been prosperous ever since.

The aim of the society is to bring before its members prominent engineers, and also to keep the men in the various departments in closer touch with each other.

The membership now includes about two-thirds of the entire enrollment of the engineering college and it is hoped that before Engineers' Week is over many more names will be added to the list. The present aim of the society is to make every engineer a member, thus marking it the strongest organization in the University.

BLUE PRINT OUT TOMORROW.

Printers Working Night and Day on
Engineers' Publication.

The first issue of the Blue Print will make its appearance tomorrow afternoon. The engravings arrived last week, after a month's delay. Since then the printers have been working overtime to get the Blue Print out during Engineers' Week. The second issue will come out in May.

The publication of the engineering college has been changed from an annual to a semi-annual, because there is enough material for two issues, and also because all of the universities the size of Nebraska or larger support more than one copy a year of the engineering publication. The University of Minnesota supports a quarterly, Michigan a semi-annual and Wisconsin a monthly.

The Blue Print sells for 50 cents a copy and with each one is given a copy of the similar publications of Colorado, Minnesota and Michigan. Every year exchanges are made with the schools mentioned above.

Posters will be put up either this afternoon or tomorrow announcing where the Blue Print can be obtained.

All students should visit the "College Inn Barber Shop at 127 North 12th. S. L. Chaplin, Prop.

Field Geology.

All men registered in courses 21 and 22 are requested to meet in U. 5 this evening at 7:00 o'clock sharp. Conference will last about one hour. Important. N. A. BENGTON.

TO HOLD MILITARY INFORMAL.

Colonel Smith Chosen Chairman,
Letton Master of Ceremonies.

At a meeting of the Officers' club yesterday, Colonel Smith was chosen chairman and Captain Letton master of ceremonies to take charge of the military ball informal, which will be held some time this spring. One of the innovations decided upon by the officers was to the effect that posi-

Some masks emphasize rather than conceal.

Our Kensington clothes wear a mask of distinction that only emphasizes their strong qualities.

Kensingtons are ready-to-wear, but they are not "made" as other ready-made clothes are made.

They are "built"—and built with all the care and skill that the most expert designers and tailors can instill into them.

We want you to stop and see the new models for spring—\$20 to \$40.

tively no complimentary tickets will be issued, and that, furthermore, the dance will be strictly limited. Each officer is required to sell a prescribed number of tickets. This dance is being given to pay off the deficit left from the military ball.

Thesis Work.

In connection with thesis work in the electrical department, C. J. Mowry is making some extensive tests in electric sign illumination. Many of the downtown electric signs have been inspected to determine the voltage and current that the signs actually receive. The sign letters have been measured and the watts per square foot of illuminated surface ascertained.

Borrowman Writes Article.

An illustrated article on the disintegration of cinder concrete, by Professor Borrowman, has been accepted by the "Journal of Industrial and Engineering Chemistry," and will probably appear in one of the spring issues. It is the result of some successful research on this subject, dealing with the causes and prevention of the decay of this structural material.

Cotton Becomes Captain.

First Lieutenant Harry Cotton was promoted to the captaincy of Company C to fill the vacancy caused by the serious illness of L. A. Welch.

CLASSIFIED COLUMN

LOST

LOST—Delta Gamma bar pin. Return to "Rag" office.
