

TO MAKE APPOINTMENTS SOON.

(Continued from Page 1)

portant appointment in the company. Third sergeant leads to first lieutenant and fourth sergeant to second lieutenant, besides which a fifth and possibly a sixth sergeant will be appointed from each company.

The appointments this year, it is said, will be made strictly on merit and pulls of no sort will have an influence in getting an office, as the man who gets the highest average in drilling efficiency and test grade will get the appointment. Another change from the usual method of last year is that men may be appointed to commands in different companies than their own. If one company has two men of second sergeant efficiency and another company has no man to compare with these, one man will be drafted into the other company, and no promotion will be made from its ranks to that position.
