UNIVERSITY EXTENSION.

With election but two weeks off students should overlook national politics a bit and take notice of the state campaign. The next Legislature is expected to decide on a definite policy in regard to campus extension, but judging from past experiences it is not impossible that that question will again be left undecided. It is almost certain that appropriations will be made for a new State Capitol, and it is already being argued that the state can not afford to undertake two such expensive undertakings at the same time.

Immediate extension, as everyone knows, is imperative, and further delay would be injurious to the future of the University. Not only must the campus be extended or moved, as may be decided to be best, but a more liberal policy in regard to better salaries for the faculty must be decided on. The low salaries paid Nebraska professors is notorious, though there is no good reason why neighboring states should pay more than we do.

Are the University students going to stand by and see men elected to the Legislature who are not in favor of a bigger and better state university? If the students are not interested in that movement then they ought not expect others to work for it. University activity in politics is not looked on with favor, but there should be no objection to the students voting and working for those who are favorable to the University and its extension.

Irrespective of party, each candidate to the Legislature should be questioned in regard to his attitude. The larger part of the candidates are not hostile to the University, but if they express themselves as favorable to its extension before election it will then be more easy to get action from them after election.

Every student should make it a point
