UNIVERSITY OF NEBRASKA, LINCOLN, SATURDAY, FEB. 8, 1913

Price 5 Cents

## RANGE OPEN TO ALL

LIEUTENANT BOWMAN EXTENDS INVITATION TO CADETS TO USE RIFLES.

## URGES MEN TO JOIN CLUB

Members Eligible to Compete in Intercollegiate Rifle Competition—Composed of Colleges All Over United States.

To the Faculty and the Students of the University of Nebraska:

In order to accord an opportunity to those interested in rifle firing, a cordial invitation is extended to all to use the rifles and gallery equipment. Also an invitation is extended for all to join the University of Nebraska Rifle Club.

Student members of this club are eligible to compete for the rifle team which represents the university in the intercollegiate rifle competition, in which most of the large universities participate. No initiation fee is required.

The universities of the country are divided into two leagues, as follows: Eastern League:

North Georgia Agriculture college, University of Maine, Harvard university, Massachusetts Institute of Technology, Massachusetts Agriculture college, Dartmouth college, Princeton university, Columbia university, Cornell university, Lehigh university, Rhode Island state college, Clemson agriculture college, University of Vermont, Norwich university.

Western League:

University of California, U. S. College of Veterinary Surgeons, Iowa state university, Perdue university, Kansas university, Louisiana state university, Michigan agricultural college, Minnesota university, University of Missouri, Oklahoma Agricultural and Mechanical college, Washington state college, West Virginia university, University of Wisconsin, University of Nebraska.

Iowa won first place last year for the Western League and lost to Massachusetts by a few points for the championship of the United States.

Below is the schedule for this year:

January 11, Minnesota; January 18, Missouri; January 25, U. S. Veterinary; February 1, Oklahoma; February 8, Washington; February 15, West Virginia; February 22, Wisconsin; March 1, California; March 8, Iowa; March 15, Perdue; March 22, Kansas; March 29, Louisiana; April 5, Michigan.

For the present ammunition will be furnished free to those who care to take advantage of this offer. The range is located in the basement of the mechanical engineering laboratory and is open from 10 a. m. to 12 and from 1 p. m. to 5 p. m., an ex-army sergeant is in charge, who will arrange for rifles and ammunition, and

## Wesleyan Holds Nebraska to 28 to 20 Score

In a fast and exceedingly rough game the Nebraska basketball team proved their supremacy over the Wesleyan ball tossers by a score of 28 to 20. Wesleyan was outclassed at every stage of the game and in the last half of the game they had to resort to rough playing to keep from being snowed under. The play by Wesleyan grew so rough at times that the Nebraska rooters threatened to create a riot several times.

Les Hyde was the particular star of the game. He was in every play and it was his hard fighting that saved Nebraska many a basket. "Ros" Haskell, the midjet forward for the Huskers was the individual point winner of the game, making 12 of Nebraska's 28 points. Ros played a brilliant game considering the number of hard knocks he received. Hawkins, the wiry little guard played a fast game from start to finish and threw two beautiful baskets. For Wesleyan Gary played a good game, making most of their points.

The team work of Nebraska was perfect and the score of the game

does not indicate the remarkably good showing made. The main trouble seemed to be that of shooting baskets. The ball was in the varsity's possession most of the time, but they could not seem to find the basket even after repeated trials.

The first half started very fast and was a rush and a scramble all the way through and ended with Wesleyan showing signs of weakness. Score 13-12 Nebraska's favor. The second half had hardly opened before Stryker threw a basket, giving Nebraska the lead that she held till time was called. In this half Underwood was substituted for Hyde who took Carrier's place at left guard. Score end of second half, 15-8.

Summary of game, lineup, Stryker ..... c. Hyde, McCandless Underwood, Hyde, rt. Kester, Vifquain Myers, Haskell, lf. .... Kline Hyde, Carrier, lg. .... Gary Hawkins ..... rg. .... Johnson Referee, Sam Waugh. Goals from field: Haskell, 6; Stryker, 2; Hawkins, 2; Carrier, 2. Free throws: Haskell, 4.

## DISGUSTED LEGISLATORS DO NOT LINGER ON CAMPUS

Trip of Investigating Committee From Legislature Ends With Much Smaller Party Than Made a Start.

That Nebraska's legislators either have their decisions already made on the question of campus removal or they find the campus a place so disagreeable that they try to make their presence there as short as possible was apparent from the brevity that characterized the recent visit of the senatorial investigating committee.

The committee entered the campus fourteen strong and were shown about the campus by Chancellor Avery and Regent Coupland. Just what is the significance of the fact that the number commenced to drop off immediately, until there remained but four to hear the explanations of the regent and the chancellor and to be shown why the present campus is insufficient for the needs of the institution, cannot yet be determined, but one might almost infer that the minds of the senators were so made up that in their opinion investigation was either useless or unpleasant.

also give instruction in the position, aiming and firing of the rifle.

Those interested please speak either to Sergeant Gullion, G. A. Graham, captain rifle club or to the undersigned.

E. N. BOWMAN,  
Commandant.

## KOMENSKY CLUB TO GIVE THREE ACT COMEDY SOON

Play Dealing with Co-Education in European Universities to Be Given This Spring.

A three-act comedy, Cop (The Braid) by Bozena Kuneticka, a well known authoress and member of the Bohemian diet, will be presented before the public by the Komensky club shortly before the spring vacation. Although called a comedy, the play, in a humorous manner, deals with co-education, a problem of keen importance in Europe at the present time, and throughout the play ridicule of the present system of segregation at the universities of Europe is manifest.

This is the club's first serious undertaking in dramatics. Hitherto several one act comedies have been presented during the year at regular meetings of the society and because of their great success, Komensky has felt justified in attempting a work of a deeper nature. . . .

The selection of the cast will be completed today and the first rehearsal held tonight. At the next meeting a popular playlet, "Studenti Meznazick" will be presented.

At the request of several who were unable to secure numbers for the Kosmet opera tryouts Tuesday and Wednesday nights, the club will hold a special tryout at the Temple theatre this afternoon at 2 o'clock.

## IN FULL OPERATION

ENGINEERING DEPARTMENT TO BE OPEN TO RECEIVE VISITORS THIS EVENING.

## MANY OUT TOWN PEOPLE HERE

Heat to Be Run in the Foundry—All Laboratories and Workshops to Be Ready for Inquisitive Visitor.

Tonight the engineering department holds its first open house. Extensive preparations have been made and a good showing is expected. A number of out of town visitors are here for the day and Nebraska will receive much good advertising from the display of the inside operation of a university.

Laboratories and engine rooms will be running in full operation and there will be competent men about to show the fine points of the equipment and work to interested. A number of students will be busy at the lathes and other machines and every possible detail will be kept going all evening.

One of the most interesting features of the evening will be a heat run by casting rings in the foundry room. As Nebraska is a far western state very few people have been afforded the opportunity of seeing iron cast as it is the iron and steel mills of Pennsylvania. This exhibit ought to be worthy of close observation on the part of many visitors. The parts of the mammoth telescope cast by the engineering department last year will in all probability be out for the public to gaze upon and wonder at. These have been seen by many experts during the past year and they are pronounced to be very high class in both the making of the patterns and the actual casting.

Unique souvenirs have been prepared by the committee in charge and visitors will not go away disappointed by the class of the articles which will be very novel in their line. As they are somewhat of a surprise the management does not want to disclose their identity until tonight.

Plenty of men are in readiness to man all the laboratories and work-rooms except the materials laboratory and the force room. Engineers who can do this work are requested to see some one on the committee or Professor Grennan who is in charge of the evening's entertainment. The assistance of a few more men in these departments will be appreciated by the committee.

Professor G. A. Loveland will address the Agricultural club in U 5 at 8 p. m. Saturday evening. All members of the Agricultural club meet at Townsend's at 1 p. m. Saturday to have Cornhusker picture taken.
