Entered at the postoffice at Lincoln, Nebraska, as second class matter under act of Congress March 3, 1879.

TUESDAY, APRIL 15, 1913

The regular staff took a vacation yesterday. This issue is perpetrated by the Engineering Society, Committee in charge: G. Thompson, Sjogren, Evans, Lyman, chairman. These men have gone into hiding for an indefinite period.

The committee takes this opportunity to thank the regular staff for the use of the paper and any inconvenience which may have resulted.

Many Nebraska engineers have made notable successes in their chosen profession since graduation. There are also a few who are what some might call complete failures. The reasons for the success, or the failure of these men is of vital interest to those who, in a few years, will be making, or making records of their own. Dean Stout's article, appearing elsewhere in this issue, is one of especial value to engineering students.

WE WANT TO KNOW.

Our initials are not C. E. R. but we want to know just the same.

What are the engineers going to do? Are they going to get together behind one big Engineering Society?

Or, are they going to split up into four departmental clubs?

Will there be a united Engineering College spirit?

Or, will there be four groups, each one knocking the other?

This is the issue before the engineers at present. A plan was submitted at the last Engineering Society meeting, which, if adopted, assures the continuance of the departmental clubs but makes them subordinate to the Engineering Society in matters which concern the whole college. This is as it should be.

It is claimed that the departmental clubs will lose some of their present power by this plan. We will not go into the merits of this argument, but we do say that it is of secondary importance. The Engineering College can not hope for its rightful share of

power and influence in school activities from the efforts of departmental clubs. It is in the Engineering Society that we can do the most good for the college. "United we stand, you know the rest of it."

We are in favor of departmental clubs. We are also in favor of an Engineering Society.

There were three departmental clubs in existence when the present engineering society was organized. The departmental clubs did not and could not from their nature fill the bill. They could not develop and maintain a healthy college spirit. Some of those in the departmental clubs at present, seem to have forgotten this fact.

If the term "Nebraska Engineer" is to mean anything it will be because the student body of the whole college is behind a well organized society and boosting Nebraska spirit and Engineering College spirit. What are you going to do about it?

WE WANT TO KNOW.

OUR FACULTY.

All the professors in the Engineer's College, are known far and wide for their practical knowledge.

Each professor has a subject befitting his name. So we put them together to make matter plain.

(Orifice) Velocity (high) Pressure Stout, Dean of the College, is in danger of the gout.

(Ohm) Juice Ferguson we can easily term, "A Departmental Head of Electrical Germs."

Now Good Roads Chatburn is quite fond of travel. So don't Cheat in A. M. or you'll have to scratch gravel.

(Toco Windmill) Chase, of the Agricultural school, makes ice cream and cake, and such things to keep one cool.

(Tonic) Dampert Hoffman who's the head of the Mechanics, Comes here from Purdue just to teach us Dynamics.
