## REDSKINS ON WAR PATH

HASKELL INDIANS DESCEND ON LINCOLN WITH BAND AND ROOTERS.

## MODERN FOOTBALL WILL FEATURE

Cornhuskers Are In Fighting Trim, Have Their War Bonnets on and Opine They Can Scalp the Aborigines.

(By H. V. HARLAN.)

Sound the alarm! The redskins are coming! They are hot on the trail of the paleface Cornhuskers with blood in their eyes and revenge in their hearts. They are after scalps. Watch out!

The Haskell Indian football team, with coaches, a bunch of rooters and a band arrived here this morning. They are all full of redskin pep and are determined to wipe out the memory of the awful beating they received at the hands of the said paleface Cornhuskers in 1910 when they were swamped by the score of 119 to 0.

What the Coaches Say:

Coach "Jumbo" Stiehm, the wonder worker, rises in the council of war and discourses thusly: "I consider this game one of the hardest on the schedule. It will be one of the greatest exhibitions of modern football that the west has ever witnessed."

Coach Kennedy, the mentor of the swarthy aborigines chants this battle cry: "My men have won every game this season by large scores. The defeat of Minnesota by Nebraska gives us a chance to be Western Champions. Game Will Be Some Pow-Wow."

The game today on Cornhusker field will be a heap big pow-wow. The Indians use the open style of playing and are counting on victory because of this. Inasmuch as the Cornhuskers won over Minnesota by using the modern, open style mode of playing it can be safely said that the game will be a great exposition of up-to-date football. It will be a game of speed and fast snappy open field playing.

Haskell Indians' Strength.

The Indians have been reinforced by five Carlisle players. They do not play under conference rules hence a man is played as long as he makes good, be that one, two, four or five years. The redskins are a decidedly unknown quantity. They have won all their games so far this season and that by large scores, beating Emporia college 60 to 0 and Baker 18 to 0. But the teams they were playing were not what might be called strong. Then too, the aborigines fluctuate from year to year. One year they are a tribe of howling good players and another year they are a bunch of squaws. Witness the game in 1909 when they beat the Nebraskans 16 to 5 and the next year the Cornhuskers ground them in to the dust by the score of 119 to 0.

They are said to have an exceptionally good team this year and are bound to put up a game fight. Unless the Cornhuskers are carrying an overload of confidence resulting from the

## PROGRAM OFFERED UNI MEN AT OLIVER SUNDAY

Haskell Football Men Will Talk and Band Will Furnish Music at Meeting for Men.

On Sunday afternoon at 3:15 p. m., the doors of the Oliver Theater will be open to those wishing to listen to a musical program by the University band at 3:30 followed by speeches by Captain William Williams of the Haskell Indian team as well as by the Director of Athletics at Haskell, A. M. Verne.

This program is under the auspices of the University and City Y. M. C. A. associations. The student body will no doubt be glad to take advantage of the opportunity to hear the leaders of the team that will have played us today.

Turn out fellows, this is for you.

## Minnesota Spirit Not Dampened by Defeat-- Just Grin and Bear It

The fine spirit displayed by the official publications of the University of Minnesota is seldom excelled in any university. Following what must have been a severe set-back to the Minnesota expectations, the papers have rallied to the support of the team. Unqualified confidence in the ability of the Gophers to "come back" fills the daily columns. And what is more, they accept their defeat in the manner of true sportsmen, allotting to Nebraska the honor which is due a team defeating that of Coach Williams.

The following paragraphs were clipped at random from the Minnesota Alumni Weekly, and they hold out a school spirit which explains in part the strength of the northern campus.

Nebraska 7—Minnesota 0.

"How did it happen? This question has been asked thousands of times since the game last Saturday. The simplest and truest answer is that Minnesota met a team that played a more effective brand of football. We have won for so many years that we have come to think that the Nebraska game is to come to us as a foregone conclusion. We forget that Nebraska has a large student body to draw from and that they have had good coaching and that there is no reason why they should not win their fair share of the games with Minnesota.

"Doubtless many excuses will be offered. We shall offer none. Minnesota was up against the real thing in football and was not able to make good. To be twice inside the 5-yard line and fail to get the ball over either time does not look good.

"We might get a lot of cold comfort by quoting to give her the credit of winning the game last Saturday because she had the better team."

## PROFESSOR HOWARD TALKS ON STUDENT DEMOCRACY

Freedom and Equality Better for Students as Well as Institution— Favors Faculty Control.

Professor Howard of the Sociology department gave a very instructive talk on the question, "Democracy in the American University yesterday." The student body, Professor Howard thinks, would do more and better work if given more freedom but at the same made responsible in certain ways. In their organizations the students should manage to get in only responsible young people and then give them the privilege to carry out their policies in their own most efficient way.

Professor Howard expressed an earnest desire to see the faculty control method tried in this school as it is in some of the prominent schools of the country. A Faculty Board for the purpose of planning and prescribing a curriculum is a method which according to the speaker should be entitled to consideration.

That Nebraska has no sex line or color line is a great point in favor of the democracy we claim for our school.

## IF SIXTY GIRLS BUY TICKETS CLASS IN SWIMMING ASSURED

Prof. Ina Gittings Announces Final Preparations—On Sale Thursday and Friday.

Final arrangements have been made for the girls' swimming classes to be given by Prof. Ina Gittings at the City Y. M. C. A. beginning October 30. The course will consist of twelve lessons and will end February 12.

The final pre-requisite to the giving of the class is the signing of sixty girls for its pursuance. If more than this number desire training of this sort, additional classes will be added to the course. Tickets will be on sale in the women's gymnasium from 9 to 12 and from 2 to 3 Thursday and Friday of this week. Price \$2. Arrangements as to suits and details will be announced after sixty tickets have been sold.

Miss Gittings desires that at least sixty buy these tickets, as that number is absolutely necessary for the class.

## UNIVERSITY NOTICES.

Applications for student manager of the Glee Club will be received by the registrar until noon, Saturday, November 1.

Sophomore football men report for try-out promptly at 3:30 Monday, at the Armory. Practice will start at that time.

United Agricultural Society will meet Saturday evening at the judging pavilion at the State Farm at 7:30. This will be the first meeting of the year and all first-year men and women are urged to attend in order to become acquainted with their older classmates. A good program is promised and a good time with refreshments.

## ENGINEERS PLAN A TRIP

ANNUAL INSPECTION JAUNT MAY BE TO KEOKUK DAM ACROSS MISSISSIPPI.

## WILL GO THRU MAMMOTH PLANT

Success of Trip Depends On Number Desiring to Go — Rates and Schedules Are Arranged.

If present plans are carried into execution the annual inspection trip for the students of the engineering college will be one through the newly constructed dam across the Mississippi river at Keokuk. As many students as care to go—in other words, the more the merrier—will be eligible to take the trip, and special rates and schedules have been procured.

The Keokuk dam is the biggest engineering feat of its kind in the world, stretching for more than a mile across the Mississippi. Enormous power is developed, and a plant has been constructed which will furnish electricity to cities for miles around. The latest ideas in all the branches of engineering have gone into the making of the dam and powerhouse, and it will be a valuable trip for students in these subjects.

The trip will depend upon the number signifying their intention of going. Should a sufficient number so express themselves, definite arrangements will be made concerning the trip in detail.

## OTHERS HAVE "BIG NINE" BUG

Marquette University a Runner-Up On Schedule of the Conference This Fall.

It is interesting to note, at this time when many Nebraska students are figuring on the chances of getting into the Big Nine, that other universities have this same hope. Marquette University, counting on its past efforts against the northwestern teams, is said to have applied this fall. Nebraska will be content to get away with the Missouri Valley luck and the elements continuing to shine favorably,—before going further along the ladder of football promotion.

## WOODRUFF DELIVERS LECTURES

Former Nebraska Man Now High in Geological Survey Work, visits Campus.

Mr. E. G. Woodruff, who has had charge of geologic field parties for the United States Geological Survey in the far west, stopped at the University and delivered lectures Tuesday and Wednesday to the classes in mining geology, field geology, and geology I. He left for Washington on the noon train Wednesday.

Mr. Woodruff was a former student in the University, was later an assistant and instructor, then professor of geology and mineralogy in the University of Oklahoma; a fellow in Harvard University, and for the past six years a member of the United States Geological Survey.
