Applying Physics in a Street Car.

One of the fundamental theories you were taught in your high school physies will save you a lot of trouble every day if you apply it.

Straphangers in the street cars lurch forward when the car stops and backward when it starts. It's inconvenient, especially if a 200-pounder hits you. Remember that place in the physics text-"To every action there is an

opposite and equal reaction." Well, apply it. When the car stops, ean toward the rear. When it starts, ean toward the front.

You lurch because you're the opposite reaction to the car's movement.

Before Drinking Coffee, You Should Consider Whether Or Not It Is Harmful "There's a Reason" for Why Many Women Will Not Wed

By LAURA JEAN LIBBEY.

The majority of men believe that

tion of their life happiness or unhappiness. But. let me tell you. there are quite as many women who would not wed the best man ever stepped in shoe leather as those who are anxious to find heart mates. The ressons why some women won't wed are many. Not a few of those who are well-to-do look upon would-

be suitors as fortune hunters, heartless creatures who are not on love intent, but are only concerned in finding out how much a woman is worth. Though a man does fall in love with such a one, she is not inclined to give his honesty of purpose the benefit of the doubt.

Other women fall in love with ne'erdo-wells, but are wise enough not to marry. They solace themselves with courting over a long period of years. During that time, affection merges into friendship. But they do not realize

Some women are restrained from marrying because of the load which they are carrying on their shoulders, fearing that a husband would not care to relieve them from the support of aged parents or helpless younger brothers and sisters. Thus they go unwedded, martyrs to duty.

Convenient and Useful Article That May Be Provided at an Expense That Is Insignificant.

Get a good, strong packing box, 26 inches high, 32 inches long and 18 inches wide, have the carpenter saw a door 24 inches long and 20 inches wide on front of box, using three strong hinges on outside of box five inches from the floor. Fasten at top with a small closet catch, put inside one shelf six inches wide and full length of box on small cleats half the depth of your box. Now paint box with two or three coats of good paint, same color as your cooker; line the box (door also) with blue and white table oilcloth; cover shelf with oilcloth. This makes a sanitary, dust-proof, easily-cleaned cupboard to keep the fireless cooking utensils in and a bending over, keeps cooker cleaner.
