Raise High Priced Wheat on Fertile Canadian Soil

Canada extends to you a hearty invitation to settle on her FREE Homestead lands of 160 acres each or secure some of the low priced lands in Manitoba, Saskatchewan and Alberta. This year wheat is higher but Canadian land just as cheap, so the opportunity is more attractive than ever. Canada wants you to help feed the world by tilling some of her fertile soil—land similar to that which during many years has averaged 20 to 45 bushels of wheat to the acre. Think of the money you can make with wheat around \$2 a bushel and land so easy to get. Wonderful yields also of Oats, Barley and Flax. Mixed farming in Western Canada is as profitable an industry as grain growing.

The Government this year is asking farmers to put increased acreage into grain. There is a great demand for farm labor to replace the many young men who have volunteered for service. The climate is healthful and agreeable, railway facilities excellent, good schools and churches convenient. Write for literature as to reduced railway rates to Supt. of Immigration, Ottawa, Can., or to

Topics of Interest on Home and Farm Building

William A. Radford tells the man who builds a medium priced home or farm building how to get the most in material value, convenience and architectural good looks for his money, in his articles which appear in the Northwestern weekly. He gives the latest ideas in construction and enables you to build without the expense of consulting an architect.

BUNGALOW WIDELY USED HOUSE TYPE

Everyone Likes Coziness That Is Easily Expressed in This Structure.

DISTINCTIVE MODEL SHOWN

Exterior Attracts Attention With Arrangement of Gable Roof—The Interior Plan Also Unusually Convenient.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the reader of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 187 Prairie avenue, Chicago, Ill., and only enclose two-cent stamp for reply.

By WILLIAM A. RADFORD.

There can be no denying the fact that the bungalow occupies an important place among the several types of buildings now being used for residence purposes. The number of homes which have been built after this type is a sufficient indication of its usefulness. Here we give the word, bungalow, a liberal meaning, since in its literal sense it would hardly apply to a modern American home, no matter how simple. If we take the word to mean a one-story house, modern in its design and appointments and so constructed that it will appear "close to the ground," the foregoing statement stands correct.

The bungalow, as we have broadly defined it, is perhaps the most widely used building type, with respect to the varying density of population, of all building types. The bungalow is found in the smallest of villages as well as in the outlying parts of the largest cities. Its appeal is universal because it is a type which may be made thoroughly expressive of a popular idea. Everyone likes the coziness which is best expressed in this style. Everyone likes the homelike atmosphere which is in the house itself even before the decorating is done. It is easy to make a home out of a bungalow.

The bungalow which is shown in the accompanying illustrations represents a novel treatment of exterior details and at the same time will serve to il-

lustrate several desirable features in interior arrangement. This little building is 31 feet by 44 feet in size, not including the porch projection. It contains five generous sized rooms, a reception hall, pantry and bath.

The exterior of the bungalow attracts attention because of the distinctive way in which the gable roof is arranged. There are two gables projecting toward the front of the house. The perspective view shows the method of finishing the gable ends, leaving the rough timbers exposed. This will be recognized as a decidedly artistic

feature. The entrance is into a reception hall that opens through a door into the living room and also into the back hall which connects up the bedrooms and the bath. This plan, with its reception hall and back hall, provides an arrangement that makes all the rooms readily accessible from all of the other rooms. Convenience is the object of this arrangement together with privacy between the different parts of the house.

The bedrooms are placed at the front and back corners of the house. This enables these rooms to have windows facing in two directions and insures a plentiful supply of air in the sleeping rooms. Such an arrangement makes these rooms almost as healthful for sleeping purposes as a sleeping porch and it also provides an abundance of freshening sunshine during the daytime. Each bedroom is furnished with ample closet space, which is always a good feature to incorporate in the house. These closets are especially desirable because of the windows.

The bath is placed between the two bedrooms, an ideal arrangement made possible by the back hall. It is seldom that the arrangement of this part of the house can be worked out in a more desirable manner than that which is shown here.

The living room is a bright, cheerful room, due to the arrangement of windows. There are three wide windows facing the porch and two more on the side—one on each side of the fireplace. The living room can be reached either through the reception hall or through a door opening from a side porch. It is connected to the dining room by a wide casement opening.

A double acting door leads back from the dining room to the kitchen. This room is fitted with all of the latest improvements for making convenience the dominating characteristic. Attention should be called to the pantry. A work table is placed directly under the larger of the two windows in this room. The refrigerator may be placed on one side of this table and the cupboard is built in on the other side. In a little recess in the opposite wall, the opening to the clothes chute is placed. This feature will save space usually required for soiled linen and makes it possible to do so without tedious steps up and downstairs.

There is sometimes doubt as to just how the surroundings should be arranged around a house of this kind. Of course, one of the fundamental requirements is that the house appear true to the bungalow type, close to the ground. The lines of the roof have been specially designed so that this ap-

pearance will be inherent in the house. It would, therefore, defeat the purpose of the design to build such a house on land considerably higher than the surrounding ground. On the other extreme, no house, not even a bungalow, looks well when it is given a squatty appearance by its surroundings. Aside from the appearance, there is also the danger of poor drainage when the ground upon which the house is built has no slope whatever.

The house under consideration, then when built upon the average 50-foot lot, should have grade at the house established not more than two feet above the street sidewalk level, if the lawn is to be sloped down from the house to the sidewalk. By the use of a terraced lawn it is possible to obtain the desired appearance when the house grade is considerably above this distance with respect to the street sidewalk. The bungalow does not look well too near the street. The nearer the back of the lot the better, unless the houses already built on the street make this location undesirable.

Boy Locked Cop Up.

In the outlying districts of New York there are little block houses connected by telephone to summon the policeman stationed there. When protection is needed the cop will go to those who call him as fast as his motorcycle will take him, and frequently the officer is commended for his speed, valor, common sense and kindness. Under the circumstances it is but natural that he came to regard himself as one of the best cops that ever wore the uniform. Pride, it will be recalled, cometh just previous to the fall. There is a hap lock on the door of the police blockhouse, and as the policeman stood within champing at the delay between calls, a boy of four walked along and locked the door on him. The windows of the block house are about a foot in diameter, and as the policeman called frantically after the little desperado he saw him disappear with all the speed his legs could muster. For two hours the mighty one waited in the deserted section for the call that would spoil his wonderful record of efficiency. It did not come, fortunately, until a little girl had wandered along, caught the policeman's keys and released him. He did not speak frankly until his young savior was well out of sight.

lustrate several desirable features in interior arrangement. This little building is 31 feet by 44 feet in size, not including the porch projection. It contains five generous sized rooms, a reception hall, pantry and bath.

method of handling one of the favorite features of the bungalow type. The porch is built under the main roof of the house, which has a wide overhang to cover it. The construction of the brick and concrete porch pillars is decidedly unusual. The attention which has been paid all of the various details such as these is plainly evident and the effect which has been brought about is altogether pleasing.

The walls are constructed of siding that is laid in alternate wide and narrow courses. Plain rough siding is used, which gives a rustic appearance to the bungalow. This siding can be stained dark, which adds still further to the rustic idea. The window casings are made in the same color and

CANADA'S IMMIGRATION

increased by About Sixty Per Cent in Past Six Months.

That Canada is at war is now more fully appreciated on this side of the boundary line, now that the United States has stepped alongside its northern neighbor and linked hands in the great struggle for a freer democracy throughout the civilized world. As a result of this a greater interest than ever is seen in the mutual effort to develop both the United States and Canada. Recently, just before the time that the United States declared its intention to enter the contest and contribute of its resources to the defeat of the autocracy, whose design was to permeate the world, Western Canada made an appeal for farm labor to till the fields and prepare the soil for the crops of grain that were necessary to feed the fighting forces and keep up the requirements necessary for the Allies. The responses were so great that before half the time limit expired, over six thousand laborers were secured. This was not sufficient, but once the United States was declared to be in a condition of war, and farm labor required here to meet any exigency as to short rations that might arise, the sister to the north, withdrew from attempts, which might mean a restriction of the farm labor supply in the United States. But even with this it is thought Canada will now be fairly well supplied.

Apart, however, from the farm labor proposition, it is gratifying from both the United States and Canadian point of view that the immigration of farmers to take up homestead lands and to purchase improved and unimproved land in Canada, has shown such a wonderful increase in the past three months. The great struggle for increasing the food supply has a broader and greater significance than ever. The food must come into existence, whether the rich soils of the United States or those of Canada be the factor.

It is altogether probable that the action of the Canadian Government in taking the duty off wheat going into Canada, thus automatically lifting the duty off that coming into the United States, may not be responsible for an increased immigration to Canada. Canada's reputation for growing larger average yields and a better quality of grain, and on lands, many of which are free, as well as those that range from \$15 to \$35 an acre, is an appeal that is being responded to by farmers who are now renting high-priced lands, is another reason for expecting an increasing number of farmers from the United States.

Mr. W. D. Scott, Superintendent of Immigration at Ottawa, Canada, recently gave out figures concerning immigration from the United States, which shows that the increase in the past three or four months was 60 per cent over the same period last year, and Mr. Scott forecasts that during the calendar year of 1917 there will be over one hundred per cent increase and be much heavier than for many years past. Mr. Scott declares that already this spring more settlers' effects have entered Canada than crossed during the whole of last year, and the movement has just merely started.

The new settlers are coming from numerous states through the ports of Emerson, North Portal and Coutts, as well as from Oregon and Washington, through Kingsgate and Vancouver.

There arrived in Saskatchewan during the year ending December 31, 1916, a total of 8,136 persons as compared with 5,812 during the twelve months previous. At the same time nearly twice as many immigrants passed through the immigration department at Edmonton, Alberta, in the last twelve months as for the same period of the year before.

The number of settlers from Eastern Canada migrating to the west also increased. From January 1 to March 31, 1917, the number of cars of stock that passed through the Winnipeg yards was 750, as compared with 361 last year. A fair estimate of the value of each car would be about \$2,000, which means that the west has secured additional live stock to the value of \$1,500,000 or more, during the first three months of 1917, not taking into account that brought in by immigrants from the United States.—Advertisement.

YES! LIFT A CORN OFF WITHOUT PAIN!

Cincinnati man tells how to dry up a corn or callus so it lifts off with fingers.

You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezeone applied directly on a tender, aching corn or callus, stops soreness at once and soon the corn or hardened callus loosens so it can be lifted off, root and all, without pain.

A small bottle of freezeone costs very little at any drug store, but will positively take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to irritate the surrounding skin.

If your druggist hasn't any freezeone tell him to get a small bottle for you from his wholesale drug house.—adv.

Women of Middle Age

Many distressing ailments experienced by them are Alleviated by Lydia E. Pinkham's Vegetable Compound.

Here is Proof by Women who Know.

Lowell, Mass.—"For the last three years I have been troubled with the Change of Life and the bad feelings common at that time. I was in a very nervous condition, with headaches and pain a good deal of the time so I was unfit to do my work. A friend asked me to try Lydia E. Pinkham's Vegetable Compound, which I did, and it has helped me in every way. I am not nearly so nervous, no headache or pain. I must say that Lydia E. Pinkham's Vegetable Compound is the best remedy any sick woman can take."—Mrs. MARGARET QUINN, Rear 259 Worthen St., Lowell, Mass.

She Tells Her Friends to Take Lydia E. Pinkham's Remedies.

North Haven, Conn.—"When I was 45 I had the Change of Life which is a trouble all women have. At first it didn't bother me but after a while I got bearing down pains. I called in doctors who told me to try different things but they did not cure my pains. One day my husband came home and said, 'Why don't you try Lydia E. Pinkham's Vegetable Compound and Sanative Wash?' Well, I got them and took about 10 bottles of Vegetable Compound and could feel myself regaining my health. I also used Lydia E. Pinkham's Sanative Wash and it has done me a great deal of good. Any one coming to my house who suffers from female troubles or Change of Life, I tell them to take the Pinkham remedies. There are about 20 of us here who think the world of them."—Mrs. FLORENCE ISELLA, Box 197, North Haven, Conn.
