#### 550 HORSES WITH YANKEE.

Big Circus Has the Finest Display of Horses Ever Assembled.

It has been said that one of the greatest assets of a circus is its hor ses. If this is true the Yankee Robin son three-ring wild animal circus is the Standard Oil of the show busiponies are carried by the big show Among them are the finest dapple grays and blacks in the country, most of them being purchased from the world, Dallas County, Iowa.

If you are a lover of good horses you should not fail to visit the stables of the Yankee Robinson shows. A majority of these horses are displayed the morning of the exhibition during

the street parade. With the big wild animal show this ear, sensation after sensation in the animal line will be shown. The wild animals are all actors with the Yan-

kee Robinson circus. The big circus will exhibit at Ra venna, Neb., Aug. 14. Tuesday.

During the hot weather of the sumner months some member of almost every family is likely to be troubled with an unnatural looseness of the portance that he be treated promptly. which can only be done when the medicine is kept at hand. Mrs. F. F. Scott. Scottsville, N. Y., states, "I first used Chamberlain's Colic and Diarrhoea Remedy as much as five years ago. At that time I had a severe attack of summer complaint and was suffering intense pain. One dose relieved me. Other members of my family have since used it with like results.

# SALT FOR CATTLE.

[National Crop Improvement Service.]
Professor Henry says that a cow requires three-quarters of an ounce per day per 1000 lbs. of weight and six-tenths of an ounce per day per 20 lbs. milk. Therefore, a cow which weighs 1200 lbs. and gives 30 lbs. milk should have 1.8 ounce salt. It must be remembered, however, that salt is generally included in high-grade dairy feeds: It is well to give cows access to extra salt. They will take what their roughage demands.

# THE PRICE OF FEED.

[National Crop Improvement Service.]
Feed is handled on a smaller margin than coal, ton for ton. The retail feed dealer who buys in carload lots can sell as cheap as the manufacturer can in less-than-carload lots, the difference in freight rates being the dealer's gross profit. In nearly every instance, a group of farmers can order their feed, through a dealer, in carloads and make a material saving. The difference in freight alone will show a good profit.

Take the chill off the drinking water in cold weather and cows will drink more and produce more.

Don't figure too fine on rations, Be liberal but don't overfeed. You can kill all of your profit by feeding more than the cow can assimilate.

[National Crop Improvement Service.]

The human element in dairy feed is line, and this department will be the important. Two men may have the place to show their skill. In addisame equipment, one make good tion this year are two premiums for money, the other fail, while both are best collection of canned fruits, and supposed to be feeding by the same canned vegetables, and the money

# Fat Cattle In Moderate Supply: Active and Strong

# 10-20c ADVANCE IN HOGS

Liberal Run of Sheep and Lambs-Fat Stock Slow to 15@25c Lower-Feeder Grades in Active Demand at Steady to Stronger Prices-Light Stuff at a Premium.

Union Stock Yards, South Omaha, Neb., August 7, 1917.—Cattle receipts The seed wheat boosters were here were of very moderate proportions Tuesday. A small but attentive audi for the opening day of the week, about 6,500 head, and fully 65 per cent of the offerings were western grass cattle. Corn fed beeves were steady to strong, best here bringing \$13.75. Desirable grass beeves were also strong, selling up to \$10.40. Cows. sons of Aaron Smith, went to Ravenna and heifers sold freely at steady to stronger prices and stock cattle and feeding steers were fully 50@75c stronger than at the low time the first

Quotations on cattle: Good to choice beeves, \$12.75@14.00; fair to Mrs. Patterson (nee Miss Dunkin) good beeves, \$11.50@12.50; common niece of Mrs. Fred Fuller, who has to fair beeves, \$9.50@11.00; good to choice yearlings, \$12.50@13.50; fair to good yearlings, \$11.00@12.00; common to fair yearlings, \$9.00@11.00; good to choice grass beeves, \$9.75@-Kan., arrived here to visit with the 11.50; fair to good grass steers, \$8.00 Ward family. Mr. Reed reports crops @9.50; common to fair grass steers, \$6.00@7.75; good to choice beeves \$8.00@9.50; good to choice cows, \$7.50 @8.50; fair to good cows, \$6.50@7.25; canners and cutters, \$5.00@6.50; veal calves, \$8.00@12.50; beef bulls, \$6.75 @8.50 bologna bulls, \$5.50@6.50; good to choice feeders, \$7.50@8.50; fair to good feeders, \$6.75@7.50; good to choice stockers, \$7.25@8.00; fair to good stockers, \$6.75@7.25; common to fair grades, \$6.00@6.50; stock heifers, \$6.00@7.25; stock cows; \$5.50@7.00; stock calves, \$6.50@9.00.

Hogs Sell 10@20c Higher. Receipts of hogs were comparative ly light for a Monday, 4,600 head, and with a keen demand from both packers and shippers the market ruled active and prices were 10@20c higher than Saturday. Tops brought \$16.15 as against \$15.65 last Monday, the bulk of the trading being around a week ago.

### Fat Lambs Sell Lower.

The run of sheep and lambs was liberal, 13,500 head, and while feeder at stronger figures the packers were bearish on the fat grades and bids were 15@25c lower than last week. Best fat lambs brought \$13.75 and feeder lambs sold at \$14.00@14.65.

Quotations on sheep and lambs: Lambs, fair to good, \$13.75@14.00; lambs, culls, \$12.00@13.75; lambs feeders, \$13.50@14.75; yearlings, fair to choice, \$9.50@10.50; yeariings. feeders, \$10.00@10.50; wethers, fair to choice, \$9.00@10.25; ewes, fair to choice, \$8.00@9.00; ewes, culls and feeders, \$3.00@7.25; ewes, breeders, all ages, \$8.00@15.00.

# HOME MIXED FEEDS.

[National Crop Improvement Service.] When a man undertakes to mix his own rations, what does he do? He buys straight feeds. Take cottonseed meal as a common example. There are a great many different grades of cottonseed meal, and the man who is looking for a low-priced feed is sure to get a low grade. The demand for cheap feeding ingredients has caused the quality to be gradually whittled down. Consequently the farmer nearly always works with feeds which

are poorer than he believes them to He does not get adequate state hard to get a complete chain of evi-

A farmer has no facilities for having his feed analyzed and he doesn't Sunday at Jenner's Park. About fifty analyses of mixed feeds costs about ten cents per ton, and if every farmer will read the various bulletins from the agricultural colleges he will soon know those brands which can be depended upon. There is no doubt that at the present prices of grain any farmer can save money by selling his cereal crops and buying mixed feed. Cornmeal, oil meal and cottonseed meal are all high, but the by-products of barley and rye are all more reasonable in price.

Corn has become costly largely due to the demand for pork and beef. Americans will have those meats at almost any price. This puts corn on a meat basis, and the dairy business will have to fall back on the by-products of grains.

# GIVE COWS PLENTY OF WATER.

[National Crop Improvement Service.] When cows are in full milk they require plenty of water. It is stated authoritatively that cows in full flow of milk will consume 50 per cent more water than when dry.

Poor feed sells to poor feeders.

#### **Big Domestic Products** Display department, which is

known as Class "H," and under the

supervision of Mrs. E. E. Brown of Central City, there is every reason to believe that additional space will Walter Law and an all cast of Fox have to be allotted to this exhibit, players in From inquiries coming to the secretary's office, it is sufficient evidence the housewives of Nebraska are going to can and preserve every-ther should witness.

Farmers have commenced to make

Monday afternoon Deer Creek was refreshed by a three-eighths of an inch af rain which saved the corn crops. We wish to have another one like it to be enough for plowing.

Sunday the Ashton second team journeyed to Deer Creek with well spiked men and crossed bats with our boys. At the end of the game the score was 5 to 6 in favor of Ashton. They were too much for our boys but we hope next time we meet them it will

The Plow Pushers threshing company while threshing for Ignatz S hard luck by losing their machine by fire. When they had got started good only threshing 85 bushels of oats, few sparks flew from the smoke stack heart of the best horse county in the \$15,25@15.65 as against \$14.55@14.75 and set a stack of grain afire. The wind was blowing hard and the fire gained great headway, burning the machine and eight stacks of grain. This is hard luck for Mr. Kalkowski. The buyers took the thin grades eagerly company has ordered a new machine which will be delivered this week or

## DOUBLE DUTY

A Dairy Ration Has Two Main Uses-Life and Product.

A ration is disided into two parts: 1. The part useded to mein in or keep the animal alive 2. The para needed to make

stored up material like wool, fat, meat or milk. Milk is roughly in solids, one-third each casein (protein), fat and sugar.

The casein in milk can only be furnished by the protein in the food. The fat and sugar may be derived from either protein, fat or carbo-If a cow has the ability to give 50

ounds of milk containing two pounds of casein, and only gets enough protein to make one pound of casein, then she will only give 25 pounds of

A balanced ration is one that has just the exact amount of protein, fat and carbohydrates that the cow needs. Just what this is we cannot ever say exactly, because the amounts vary from week to week and no two cows are alike, nor are feeds alike. A practical ration is one that has

sufficient protein and enough total food to make the greatest amount of milk without the cow losing weight. A commercially successful ration is the one that makes the most milk or profit, keeps the cow healthy and en-

ables the use of the most roughage. All the hay and ensilage .. cow can eat will keep her alive and make about 15 pounds of milk. Any more milk has to come from grain or grain

The farm can usually raise carbo hydrates cheap in the form of hay and ensilage, and, outside of clover, peas, etc., protein can usually be bought cheaper than it can be raised.

.The average price of protein feeds with 20 per cent digestible protein was about \$25 to \$35 per ton before the war, but the prices are much higher now, while hay (clover) with 51/2 per cent digestible protein has been rated at \$10 per ton, so the protein feed at \$40 would furnish protein about the same as clover at \$10.
