LIFT YOUR CORNS OFF WITH FINGERS

How to loosen a tender corn or callus so it lifts out without pain.

Let folks step on your feet hereafter; wear shoes a size smaller if you like for corns will never again send electric sparks of pain through you...

He says that a few drops of a drug called freezeone, applied directly upon a tender, aching corn, instantly relieves soreness...

This drug dries at once and simply shrivels up the corn or callus without even irritating the surrounding skin.

A small bottle of freezeone obtained at any drug store will cost very little but will positively remove every hard or soft corn or callus from one's feet.

If your druggist hasn't stocked this new drug yet, tell him to get a small bottle of freezeone for you from his wholesale drug house...

Cynical Estimate. "Susan Smith sued for fifty dollars damages for alienation of her husband's affection."

Adversity has its uses; it gives our neighbors something to talk about.

MACMILLAN TRIP ARCTIC ROMANCE

American Explorer in Frozen North Makes Important Discoveries.

DIDN'T KNOW ABOUT THE WAR. Party Was Cut Off From Civilized World for Four Years—Rescue Ship Appeared When Food Ran Very Low.

New York.—The return to civilization of Daniel B. MacMillan, American explorer, brings to a successful close one of the most remarkable stays in the ice of the roof of the globe recorded in the annals of Arctic exploration.

Unusual good and unusual bad luck marked the expedition's history. No less than five ships were used to get the party into northern Greenland...

When rescued by Bartlett at Etah, MacMillan and the members of his party were living on dog biscuit and ducks' eggs, but were in good health.

MacMillan crossed Smith's sound once every year he spent in the North, and every time came through without a mishap, a remarkable feat in itself.

He found rich mineral-bearing rocks and extensive coal fields. The exact nature of these discoveries is not yet entirely disclosed.

ARCTIC ROMANCE

Dr. Edmund O. Hovey of the American museum then fitted out the Denmark, but this ship failed also, and is believed to be still frozen in the ice off the Greenland coast.

Many of the things MacMillan has accomplished in the far North will be appreciated only by the scientific world.

Three Rescue Attempts. In the second ship the party reached Etah, on the west Greenland coast, August 20.

Will Fly Over Ice. His next trip will be something entirely novel in Arctic exploration, for he proposes to use an airplane to widen his radius of action.

MacMillan was greatly pleased to learn of the progress in aviation which has taken place on account of the great war during his stay away from the world.

Helping Him.

A pharmacist who kept a drug store was holding forth recently on the difficulties which beset a young man in his first struggle with the world.

"I had a hard time when I first started in business for myself," he said, referring to a remark made by one of his hearers.

"The public has good intentions toward you, but it sometimes has strange ways of expressing them. An old lady used to come in to buy postage stamps. I observed to her one day that she was evidently a great letter writer."

"Oh," she said sweetly, "I don't really require all the stamps I buy here. It's only because I wish to help a young man like yourself, just beginning to build up a business, that I purchase them."

WISE CHOICE OF FOOD

By H. E. Barnard.

The housekeeper who plans her meals for two or three days in advance saves much time and thought.

Exactly the same method of planning should be followed in the kitchen. There is less likelihood that the same food will be often repeated or often cooked in the same way if the meals for several days are planned in advance.
