

A SUMMER OUTING.

The Pleasures and Benefits to Be Derived in the Mountains of Colorado.

The days are here, when one begins to make plans for his summer outing, and studies railway maps and questions friends to learn of the best spots, and where the most varied amusements may be had for the least outlay.

Where the most varied amusements may be had for the least outlay. Kansas people the Rocky mountains are the most convenient and afford opportunity for the enjoyment of tastes of all shades.

We know of no greater advantage to health, than may be gained by a sojourn away from the cares of business and daily duties of the routine of living.

His Choice. At a village wedding in Worcester-shire recently the clergyman asked the bridegroom the usual question whether he was willing to take the woman to be his wedded wife, and the rustic, scratching his head for a moment or two replied, "Ay, I'm willing, but I'd rather have her sister."

Public Lands in Oklahoma. A careful investigation of the public records discloses the fact that there are yet several millions of acres of public lands in Oklahoma yet subject to homestead entry and settlement.

It has generally been understood that all the lands in Oklahoma fit for agricultural purposes are already occupied, but such is not the fact.

Household Marketing. In the matter of purchasing food, the housekeeper must use good judgment, going to market and not trusting the selection of her meats and vegetables to an ignorant order boy.

BIG DAY FOR BEETS.

NEBRASKA'S PROMISING INDUSTRY ENDORSED.

The State Convention Starts With Much Promise and a Fine Array of Delegates—Addresses by Congressman Meikeljohn, Governor Holcomb, Prof. Nicholson and Other Prominent Gentlemen.

The State Sugar Beet Convention. The sugar beet convention at Fremont drew a large attendance from all sections of Nebraska.

Congressman Meikeljohn was then introduced and spoke in part as follows:

Mr. President and Gentlemen of the Convention: You have been convened under a call to consider a special subject of agriculture—the encouragement of the cultivation and production of the sugar beet.

We see today in the west a people cultivating and producing this same product, which was cultivated and produced by the Egyptians centuries before the Christian era.

There is a growing tendency in this generation among our young men to forsake the field and gravitate to the cities to engage in commercial or other industrial pursuits.

The farmer today is confronted with a depression of prices for farm products, which discourages and disheartens, but he should remember that he is not alone in his suffering from existing conditions.

The consideration of the subject of diversification of farm products leads us to the inquiry of what crops can be introduced and successfully cultivated.

Germany and France found these elements combined in the cultivation and production of the sugar beet, and for more than a century has protected, nurtured and encouraged it until it has reached the importance of any other industry in the continent.

and consumption of other farm products and an increment to individual and national wealth.

The beet sugar is especially adapted to the soil and climate of Nebraska, the continuous warm, dry weather producing its saccharine strength, may yet be overtaken by the rains from heaven, to cause it to take on new growth, decreasing its purity or strength for sugar, and such a season we have just experienced here and in continental Europe.

The earth is the commissary of God for his children. She gives food to the hungry, raiment to the naked and protection to the unsheltered.

Humanity draws upon her for sustenance, commerce turns to her for aid and support and manufacture invites her products to the door of a great industrial system, where sinew and brawn of toiling masses are exchanged for the bread of life.

Governor Holcomb was introduced and delivered an interesting address. He said he came to the meeting to learn more than to instruct.

Prof. H. H. Nicholson of the state university gave a very interesting talk upon the scientific treatment, agriculturally considered, of sugar beets.
