Millard of Omaha, composing the committee designated to secure the services of a competent engineer and landscape architect to examine and report on the various locations suggested for the Omaha exposition, report that they have secured two Chicago experts, who will arrive the first of this week and begin at once their surveys of the sites proposed. The engineer is A. C. Schrader, who is engineer of the entire West Side park system of Chicago comprising Garfield, Humbolt, Union and other parks. Superintendent Alexander of Lincoln park is the landscape architect selected. Both of the experts have been connected with the Chicago park system for many years. They were recommended by Director General Davis of the World's fair and others. They will complete their surveys as rapidly as possible and it is now expected that the exposition directory will be in a position to act on the question of site at an early date.

CAUGHT STEALING.
Two Shoplifters at Nebraska City Landed in Jail.
Saturday afternoon two strangers entered H. H. Faas' clothing store at Nebraska City and while one asked to see a valise the other proceeded to stow away a number of pairs of pants under the large overcoat he wore, but John Mickelson, the clerk, had his eyes open and discovered the theft and getting his revolver stopped the man and made him disgorge. An officer was called and the men are both in jail on the charge of shoplifting. The men are quite well dressed and had a small amount of money.

Valuable Team Stolen.
At Auburn Monday night an employee of J. W. Lash, owner of Pat Lash's, drove into town with a team of "Tallaver's" and hitched near the court house. About half an hour later the man who drove the team went to get them and return home, but the team had disappeared, together with harness and buggy. At this time no trace of them has been found and Mr. Lash is convinced they have been stolen. In a very similar manner a horse belonging to County Clerk H. E. Perry was stolen about two months ago from a hitch rack on one of the principal streets, also at early twilight. The horse is a bay, weigh about 950 pounds each, and the buggy and harness are also new.

Misfortunes of a Veteran.
Jesse Morton, a soldier with but one leg, fell on the icy pavement at Table Rock Saturday, and throwing his hand back to catch himself, fell on one of his fingers, which was broken, the bone protruding through the flesh. Mr. Morton has been peculiarly unfortunate. He has accidentally shot himself twice in the leg since losing the other one, and has been thrown from a horse, and once jumped from a buggy during a runaway, breaking his sound leg both times. He is now wondering what will happen next.

The main part of the house was log and one of the oldest buildings in the county. Mr. Johnson, who was living alone, had started dinner cooking and gone about a half a mile away to water his horses. The origin of the fire is unknown. The loss is \$800, covered by insurance in the Home of New York.

HE WAS TAKEN UP BY KITES.

FIRST SUCCESSFUL ASCENSION IN AMERICA.
LIEUT. WISE MAKES IT.
Hoisted Forty-Two Feet in the Air at Governor's Island by the Pulling of Four Kites, Representing a Force Estimated at 400 Lbs.
—Kites Demonstrated to Be Useful in a Gale.

New York, Jan. 23.—Lieutenant Hugh D. Wise of the Ninth infantry, U. S. A., on Governor's Island, has for six months been studying and experimenting with kites as a means of assisting armies in warfare. His kites are cellular, with rectangular frames of spruce and cotton string and cotton cloth in strips stretched around the ends of the frames, leaving both ends of the rectangular framework open, and also an open strip in the center. Thus four lifting surfaces and four guiding surfaces are presented to the wind. Yesterday, when the breeze freshened to a fifteen mile an hour gale, he was hoisted forty-two feet into the air by his kites so that he could see over the eaves of the officers' quarters and down the bay. The force represented by the pulling of the four kites is estimated at 400 pounds.
"I have studied the systems of Professor Langley of the Smithsonian institution, Professor Marvin of the weather bureau and Civil Engineer Chanute of Chicago, who are making special experiments in aerial locomotion, with aeroplanes," said Lieutenant Wise. "The success of my experiment demonstrates that kites are serviceable in a gale which would tear a balloon to pieces, where it is desired to observe the surrounding country and inspect the maneuvers of an enemy. I attribute my success to a close following of the methods of those who have studied the subject rather than to my own efforts."
Captain T. H. Baden-Powell ascended nearly 100 feet in England, but he took a parachute with him. Lawrence Hargrave was hoisted by kites forty feet in Australia in 1865. These are the only instances of aeroplane ascensions on record.

Foreign corporations are to be punished through their officers, who are to be subjected to a penitentiary sentence limited to five years for intimidation or bribery, threats of discharge or promises to employ. It is a misdemeanor punishable by fine for them to distribute literature.

Mr. Eckels Will Not Remain.
WASHINGTON, Jan. 23.—Although Mr. Eckels' term of office will not expire until after the change in administration, he will not remain controller of the currency. It is said to-day that Charles Gates Dawes will be the next controller of the currency, which is entirely probable, if he wants that office, but his friends here understand that he prefers to be treasurer of the United States.

The table shows that the leading departments at the various ranges were as follows: Two hundred yards, with rifles, department of Missouri; with carbines, department of the Platte; 300 yards, rifles, department of Columbia; carbines, department of the Platte; 500 yards, rifles, department of Columbia; carbines, department of Texas; 600 yards, rifles, department of the Columbia; carbines, department of the Columbia; 800 yards, rifles, department of the Columbia; carbines, department of the Platte; 1,000 yards, rifles, department of the Platte; carbines, department of the Platte. In revolver shooting the Seventh cavalry took the palm.

VENEZUELA'S CASE.

Chief Justice Fuller Will Act as the Republic's Representative.
WASHINGTON, Jan. 23.—The only objection raised by the Venezuelan government to the treaty between the United States and Great Britain for the settlement of the Guiana boundary was that it would have no representation upon the proposed arbitration tribunal, while England, the other party to the controversy, would be represented equally with the United States. President Crespo declined to accept the treaty unless Venezuela was represented by at least one member of the tribunal. Great Britain objected, and insisted upon dealing entirely with the United States. By a little diplomacy Venezuela was persuaded to name Chief Justice Fuller as its representative, provided Great Britain would withdraw its opposition to her representation on the tribunal. The chief justice will accept, but will stand as the representative of Venezuela and not of the United States.

STATE POULTRY SHOW

THIRTEENTH ANNUAL EXHIBITION.

Proud Fowls with Ancestry—Over 1,500 Handsome Birds—Exhibits From all Parts of the State—Resident of Phelps County Charged with Crime—Other News
The thirteenth annual show of the Nebraska poultry association commenced Tuesday in the building on N street next to Herpolzheimer's, Lincoln. The large double room is filled with coops of chickens, over 1,500 handsome birds occupying places there. The coops are arranged in classes, so that spectators may pass along the aisles formed and inspect them at their leisure. There are some of the handsomest birds ever seen at a chicken show and the exhibitors feel a just pride in showing them off. The exhibitors come from all parts of the state, Missouri, Kansas and Iowa being also represented. All varieties of chickens from the pure White Plymouth Rocks in front to the jet Black Langshans in the rear are to be seen. The constant crowing of the cocks makes music for the poultrymen, because they find more enjoyment in listening to the clarion tones of their pets than they would perhaps in a good band.
Tuesday evening the poultrymen held a meeting in the chemical building of the state university. Interesting papers were read pertaining to the poultry industry.
Wednesday the poultrymen will visit the state farm and in the evening will listen to a lecture by Chancellor MacLean, and a paper on "Parasites," by Prof. H. B. Ward.

MASON WINS.

Nominated for Senator in Illinois After a Bitter Struggle.
SPRINGFIELD, Ill., Jan. 21.—Ex-Congressman William E. Mason was nominated for United States Senator at the Republican joint caucus last night, after one of the most bitterly fought battles in the history of the Republican party in Illinois. Although he had been canvassing the state as a senatorial candidate for two years, Mr. Mason's selection was regarded by "machine" politicians as an impossibility up to within two hours of the time of his triumphant and unanimous nomination, the choice being the result of the sudden withdrawal from the race of Congressman William Lorimer, who had held the almost solid vote of Chicago and Cook county. The contest has been so long drawn out and the battle so fierce that the legislators were in a mood to be stamped at any moment as the hour for the caucus drew near and the sudden shifting of the Cook county forces to Mason carried the delegates of their feet. Mr. Mason's selection was a distinct defeat for the combination of politicians known as the "machine," and a clear victory for the McKinley forces of the state.

PATENT LAW PRACTICE.

THE SUCCESS OF ANTON WENZL.
Anton Wenzl settled in Pawnee county, Neb., in 1867, he was compelled to work out by the month to support his family. Today he owns 1,640 acres of the finest farm land, valued at \$30 per acre, together with stock and other property valued at \$10,000. Every dollar of it was made on the farm. Mr. Wenzl is one of seven brothers whose aggregate land holding amounts to over 5,000 acres.
In our "NEBRASKA BOOK" (40 pages with maps and illustrations) are dozens of statements like that of Mr. Thorrell. They are made by farmers who have made a success of farming. They show that Nebraska is as good a state as any in the Union.
The book in which they appear is as different from the ordinary agricultural pamphlet as day is from night. It is interesting, practical and truthful. It tells you everything you need to know about Nebraska—its climate, people, schools, churches, railroads, markets, soil and crops. It explains why the Nebraska farmer makes money in spite of low prices and hard times. Why land is cheap. And how it is as easy for an intelligent and industrious man to BUY a Nebraska farm as it is to rent one in any state east of the Missouri river.
Every farm renter who wants to become a farm owner; every farm owner who is tired of trying to make money off high-priced land; every father who wants to give his sons a start on the high road to independence, should write for a copy. Free.
