A REPORT SHOWING THAT IT IS DECREASING.

Auditor Cornell Puts the Reduction at \$500,000 for the Year-Nearly Half of the Decrease Is in the Bonded Debt Which Became Due During the Year.

#### Nebraska is All Right.

Auditor Cornell has issued a statement for the fiscal year ending November 30, 1897, showing that the sate debt has been reduced over \$500,000 during the year. Nearly half of this reduction was due to the fact that state bonds became due and had to be provided for. The statement of Auditor Cornell shows that during the year ending November 30, 11,917 claims amounting to \$1,791,636.63, divided as follows, were adjusted in the auditor's

Cobb & Harvey, attorneys of Lincoln, have been employed the friends of Milis and an attempt will be made to secure the release of the ex-banker on habeas corpus proceedings. The grounds upon which the application is to be filed will be that the supreme court handed down its decision in the case at an "adjourned term" and a test case will be made on this point.

Moreer Opposes Free Seeds. Washington dispatch: Representative Mercer today made an earnest speech in the house against the provision in the agricultural appropriation bill for the distribution of free seeds. He urged that it was a needless expenditure of money, because the object of the law as first passed, was to benefit the farming community by giving to farmers for experiment rare and uncommon varieties of seed, instead of sending thousands of bushels of ordinary and common farm and garden seeds for planting. Mr. Morcer 'advocates the sending to experimental stations by the agricultural department of rare varieties, there to be tested, and if found suitable for cultivation to be afterward distributed from the experimental stations to farmers who would make reports as to the result of their cultivation.

## IS EBRIGHT SHORT?

The Committee of Investigation Cou-Concludes that He Is.

The investigating committee is about to submit a report in which a shortage of about \$2,000 will be charged against Willam Ebright, former superintendent of the institute for the bind at Nebraska City The report will show that after Mrs. Ebright had been promoted from matron to assistant superintendent of the institution a young woman who was an inmate was carried on the rolls as matron, and the vouchers at the rate of \$50 per month were drawn in her favor for about eight months. The committee has discovered that the young woman did not receive the money, athough the vouchers are indorsed by her.

Another instance is that of a boy inmate who was on the pay roll as a teacher, and whose vouchers were at the rate of \$25 per month. The boy testifies that he was not employed as a teacher and did not receive this money; that he was during that time employed as a bell boy and received 2,065.00 \$5 per month.

Two girls reported as teachers, and 594,184.33 for whom warants were drawn at the 10,879.00 rate of \$30 per month each for two or three months, testify that they did 1,040,046.90 not receive the money.

These items foot up to about \$1,000. According to the committee other \$1,000 shortage comes from the padded bills made out by a man named Shuman, who operated a drug store at Nebraska City at the time who furnished the drugs for the institution. Schuman made up his bill at the end of each month, giving the numbers of the prescriptions and making a total charge without itemizing each account. His bills were

audited and paid. It has been ascertained from the books turned over to the committee by the successor of Schuman in the drug business that all the prescripions made out for private individuals during each month were again charged against the state, the numbers of the prescriptions in the bills rendered at the end of each month being in a majority of cases, as those which had been ordered and paid for by private parties. The overcharge in the drug item is found to amount to about \$1,000.

#### Sheriffs' Fees Reduced.

Auditor Cornell has decided that there is no law for the payment of 75 cents a day for the board of convicts who are kept by sheriffs after sentence, so he will reduce the pay-ment to 50 cents a day except for the first six days. It has been the custom of sheriffs to keep convicts as long as thirty days after sentence is prononunced before taking them to the penitentiary and to draw 75 cents a day from the state as pay for the board of such convicts. Auditor Cor-nell consulted the attorney general, who gave it as his opinion that the only law governing the matter was section 5, chapter 28, laws of 1895, which provide that 75 cents a day may be drawn for a period of six days, or if longer than that period, then only 50 cents a day. The auditor will enforce this rule hereafter. Under this ruling if a sheriff keeps a prisoner six days he may draw \$4.50, but if he keeps a prisoner eight days

he will get only \$4. The attorney general gave an opin-ion also in regard to mileage of sher-He had decided that the old mieage act, under which sehriffs drew 10 cents a mile each way and \$3 a day, was repealed by the act of the Friends of Whitney and Mills, the late legislature. # Bloodhounds in Demand.

Beatrice dispatch: Dr. Fulton's bloodhounds were returned from Liberty today, where they succeeded in locating goods to the value of several hundred dollars which were stolen Thursday night from the store of O. C. Aspinwall by several young men of the place. No arrests were made and an effort was made to hush the matter, it being claimed the offense was the first the young fellows had ever been implicated in and being sons of prominent people. It is said that among the stolen property were forty-two watches. Soon after reaching home the dogs were taken on a trip to Lincoln. During the past eight days these dogs have detected eight persons, fugitives from justice. About ten days ago a magnificent female English bloodhound whom Mr. Fulton had purchased in Michigan escaped from the office of the express company here and was not captured until today, when she was brought in by a man from Holmesville, to whose place she had wandered. Dr. Fu..on values her at \$500. She is a handsome specimen of the breed and is perfectly trained.

A special state fair train on the Burlington struck a tie that had been placed on the track between St. Paul and Palmer one morning before daylight, but was not derailed. The company's detectives claimed that they had sufficient evidence to convict two boys living near the scene of the attempted crime. Ben Brown and Sylvester Lawson were placed under ar-rest. The acquittal of Prown will probably result in the action against Lawson being dropped, as the evidence is said to be identical in both cases.

THE CANADIAN GOLD FIELDS. They Do Not All Lie in the Yukon.

ple to the Yukon in the search for gold, and has diverted the attention of many others. But in order to get there it is necessary that a man should be possessed of the best of health, strong powers of endu-rance and considerable means. He leaves his wife and his family for a considerable period, and the hardships he has to endure are all unknown to him.

Canada has other gold fields, though. They are the fields that produce her golden grain. This year the crop of Manitoba, lying directly north of North Dakota, yielded 21,000,000 bushels of wheat alone. The current price averages 76 cents, which, as a local paper puts it, "makes the product in gold this year, for wheat alone, equal to a value of \$15,960,000." Twenty thousand farmers did this, or an average to each producer of about \$798.

"But these same farmers are not living by wheat alone. This is only one source of revenue to them out of many. They have also beef, butter, potatoes, oats, barley and poultry to sell, and sometimes other things, so that it may be fairly estimated that their incomes will average at least \$1,000 per farmer. Thus Manitoba's fields have yielded this year fully \$20,000,000 in gold, divided among 20,000 actual producers, and a general population of about 200,-

After counting the cost of stamp mills, expenses of men, etc., rich as is the Klondike, such vast wealth as is being taken out of the soil in raising wheat in this one province, cannot possibly be secured in any mining district. Of course mining development assists agricultural development, and that is why the Government of Canada feels so much assurance in predicting prosperity to all who take up farms in Can-ada. Western Canada today promises more than any other known field that is open to immigration. Farms of 160 acres, capable of producing the best No. 1 hard wheat, yielding thirty to forty bushels to the acre, are given away free. Railways, markets, schools, churches—all are convenient. The Canadian form of government is one of the most liberal known, and a hearty welcome is given to settlers of all na-tionalities. Already there are many set-tlers gone in from the states, and the reports from them are highly favorable. Those desiring information as to free homestead laws, low transportation rates, etc., will have pamphlets, etc., sent free on application to the Department of the Interior, Ottawa, or to any agent of the Government.
