Who puts on one of the strongest acts in existence, being locked in a strong box and the box roped with 200 feet of rope. After the box has been examined by a committee taken from the audience and pronounced by them to be sound and solid, committee takes charge of the keys, he then makes his escape in one minute. The committee seals up all keyholes to the box when they examine the box and after Mysterious De Castro has made his escape they will find no seals broken and everything just as they left it, he leaving no trace of escape.
