

Maxwell The "Wonder Car"

Demountable Rims

The 1916 Maxwell is equipped with demountable rims, and has the same size tire on all four wheels. Two vitally important features.

To replace a tire on the road it is only necessary to loosen five bolts; slip off the flat tire; slip on spare rim and tire; tighten three bolts, and proceed.

We are waiting to take you for a test ride in the car that has broken all low "First-Cost" records, and is breaking all low "After-Cost" records.

WHY PEOPLE LOVED HIM SO.

His past, while not an open book, had bitter lessons taught; the one diploma that he took in suffering was wrought; in Life's exacting school he'd learned how weak a man can be; he understood the hearts that yearned for love and sympathy; no pious saint himself, he knew the sorrow and the woe of others—he had suffered, too—and ah! we loved him so.

He freely gave, not asking why; no lecture throwing in; into no details would he give; no sermon would be given; he sought no evils to correct; he gave because it pleased; he injured no one's self-respect—enough that want was eased. His was the simple, modest creed, "Let not your right hand know;" we knew him as a friend in need, and, ah! we loved him so.

Of his own failings conscious, he no judgment sought to give; he strove, unlike the Pharisee, to live, and to let live; unlike those "Holler than thou," who sheltered lives had led, his gentleness would not allow, a harsh word to be said; not without sin, he undertook never the stone to throw; his past was not an open book—but, ah! we loved him so.
