Last Sunday the Happy Hollow base ball team had a matched game with Clear Creek, but the Clear Creekers were unable to be present so consequently we had to play Cole Creek. The Cole Crekeers did not come up with the intentions of playing and they did not have more than half of their regular players but never the less they played a good game, the score being 11 to 8 in our favor. It seems as though when we have our bunch lined up they can't get their bunch together and "vise versa" but if nothing happens we will both be full handed next Sunday and as this is for the championship it is expected that everybody will play for blood. A certain individual wishes "ye scribe" to give him a description of our three pitchers that we used last Sunday, and so here goes. The first one was a "south paw" and his arm was so sore that he would make a face that would scare "Kaiser Wilhelm" at each delivery and he only lasted two innings. The second one was a very young man that weighs about 75 pounds and it was the first game he had ever tried to pitch and the last one was an old "has been" who had not worked on the mound for nearly seven years. He is fair sized and "Swede", good natured, chews "flat" tobacco and wears store boughten clothes.

240 POUND PIGS.
With corn above 50 cents hogs eat their heads off very quickly. The hog that takes two or three months to get on full feed never brings you a profit.
When you are ready to put your shoats on feed, begin with the B. A. Thomas Hog Medicine. Use regularly and watch your shoats round out into fat hogs in nine months—hogs going well over 200 pounds and as high as 240 pounds. Figure the average feeding and you will see why the B. A. Thomas medicine is a good investment. Try feeding out your hogs on this plan and if you are not more than pleased, we will refund the cost of the medicine.—J. J. Slosinski.

SUBMARINE FIGHT IS SHOWN IN WAR FILMS.
Have you ever seen a submarine in action? How would you like—from some safe vantage point—to watch this dread terror of the seas engaged in its deadly work? To see the death-dealing torpedo emerge from its tube and shoot through the seas, leaving a bubbling wake?
Such a thing seems impossible. The Mutual Film Corporation has proved the contrary, by placing it before you in the official French war pictures. These remarkable films, taken by soldier-operators, are being shown at the Opera House, Saturday, June 17.
They show war as it actually is, both on land and at sea.
These pictures show the huge French submarine Vendemiaire pass unobstructively out of a harbor somewhere in France and put out to sea. They show this undersea craft "porpoising"—playing hide and go seek with the waves.
Suddenly, without warning, they show a huge bubble form at its bows. The next moment there is a dark object, dimly outlined, speeding through the water, a mass of bubbles following in its path. It is a torpedo, the deadliest of all engines of war.
Two shows at night, at 7:30 and 9:00. Afternoon show at 3:30, Saturday, June 17.
It is again rumored that England, Germany and France are considering the appointment of a joint commission for the consideration of peace in Europe. If there is any one thing under the sun that the rest of the world ardently desires, it is that this rumor may be founded upon fact and not conceived in the fertile brain of some lying foreign correspondent. The world is satisfied with the unspeakable horrors of this war. It wants peace, and it wants it to continue unshattered until the crack of doom.
You can generally gauge the quality of a man's kindness by the affection of his dog.
