

Reconstruction, of course! When the great war is over, shattered Europe must be rebuilt. Mediaeval architecture, crumbled by cannon, will be replaced by well-lighted, well-ventilated, convenient and sanitary buildings of the present day. In this tremendous rebuilding,

Certain-teed Roofing

will play a leading role; for CERTAIN-TEED is the twentieth century answer to the demand for roofing that is economical to buy, easy to lay and inexpensive

CERTAIN-TEED Roofing is made in rolls; also in slate-surfaced shingles. There is a type of CERTAIN-TEED for every kind of building, with flat or pitched roof, from the largest sky-scraper down to the smallest residence or out-building.

It makes a clean, sanitary, attractive roof, with a very low cost per year of life. It is guaranteed for 5, 10 or 15 years, according to ply (1, 2 or 3). Experience proves that it outlasts the period of guarantee.

If you are interested in roofs, investigate CERTAIN-TEED before you decide upon the type to buy. You will find CERTAIN-TEED for sale by responsible dealers all over the world.

The long life of CERTAIN-TEED is due to the quality of the roofing felt and the character of the asphalt saturation. This is a blend of soft asphalts prepared by the General's board of expert chemists. The highest quality roofing felt is thoroughly saturated with this soft blend, and is then coated with a blend of harder asphalts, which prevents the drying-out process so destructive to ordinary roofing.
