

# DO YOU KNOW

That in Kansas, men are sent to the penitentiary for the same crimes for which in Nebraska men go to the county jail?

That the parole system in Kansas is much stricter than that in Nebraska?

That in April, 1916, there were 365 inhabitants in the Kansas reformatory—122 were from Kansas, the rest from neighboring wet states?

How can the criminal records of Nebraska and Kansas be compared without taking these facts into consideration?

## FOR SALE 24 HEAD OF POLAND CHINA BOARS.

ANNOUNCEMENT.  
Beginning Tuesday, October 3, we will run William Fox features Tuesday night during the entire month of October. These are all good. Come and see the first one and you will see the others.—Garland Theatre.

MR. RENTER AND MR. SPECULATOR  
Did you know that Deuel County had the highest average yield of wheat per acre of any county in the state in 1915? Also that now is your best chance to see for yourself what our country has been producing.

One field of 300 acres averaged 38 and 1-3 bushels per acre this year, and another of 120 acres averaged 42 bushels per acre. We have land we can sell you that is fully as good as these fields for \$30 to \$45 per acre. Figure it out for yourself, then make a trip with me and let me prove my statements. Come in and see me or call me up at The Frederick Hotel.

**F. H. GIBSON,**

## The national guard

For defense against invasion, our real national guard is the millions of stalwart, young Americans in all walks of life, who must respond to their country's call for training and service in the ranks of our army and navy. For defense against invasion of the elements CERTAIN-TEED Roofing is the real "national guard".

## Certain-teed Roofing

protects our buildings from the violence of storms; successfully resists the attacks of rain, hail, sleet and snow; is unaffected by the sharp assaults of frost, and the withering fire of mid-summer sun. It even withstands the ravages of time, for CERTAIN-TEED Roofing is guaranteed for 5, 10 or 15 years, according to ply (1, 2 or 3). Experience proves that it will out-last the period of guarantee.

The long life of CERTAIN-TEED is due to the fact that it does not dry out, as ordinary roofing does. This is because it is made of the best quality roofing felt, thoroughly saturated with a blend of soft asphalt—the formula of the General's Board of Expert Chemists. This soft saturation is then covered with a coating of a harder blend of asphalt, which prevents the drying-out process, and keeps CERTAIN-TEED impervious to the elements for years after the harder, drier kinds of roofing have dried out and gone.

CERTAIN-TEED is made in rolls; also in slate-surfaced shingles. There is a type of CERTAIN-TEED Roofing for every kind of building, with flat or pitched roofs, from the largest sky-scraper to the smallest residence or out-building. CERTAIN-TEED is sold by responsible dealers all over the world, at reasonable prices. Investigate it before you decide on any type of roof.
