Last Tuesday night was the regular annual installation night for the Modern Woodmen and the Royal Neighbors of America, in this city, and to say that it was a joy to the occasion would be putting it light. This was the most successful occasion of the kind they have held. A joint installation was announced, and as soon as the doors were opened a crowd that could scarcely be accommodated walked in. In due time the Woodmen team in full uniform marched in and stationing a guard at each officers position lined up and awaited the orders of the installing officer. The English Smart Set. To what a condition has "smart society" fallen! Any one may become a leading light in it, provided that he or she is ready to pay the footing. He or she can at any moment find a person to bid guests for their feasts and any number of guests, guaranteed to be "smart people," will accept the invitations. A year or two ago an American lady intent on fashion took a large house, and an introducer sent out her invitations. At her first party there were many of her own friends present. The introducer explained to her that the right set of people would not come if they were exposed to this promiscuity with those who were not in it. Finally it was agreed that the hostess might invite ten friends to each party, but not more. What I have never understood is where the pleasure comes in of going to several parties the same evening. Yet there are many apparently sane persons who do this every evening during the season. At each party they probably have to wait at least half an hour before getting out in their carriage and getting back into it when they want to go away. They struggle up stairs, show themselves, stay perhaps half an hour and then hurry off to the next party. Why they should like this mode of spending their evenings no one except themselves can imagine. There is no costermonger's donkey so over-worked as a woman bent on society.—London Truth.

Sung Them to Liberty. In Marches and Music, the famous singing teacher tells this anecdote to illustrate the nobility of heart of a Russian woman, one of her pupils, and a native of Nijni-Novgorod, where the great fair is held every year. Mile. Nadine Boulitchoff created a great sensation with her beautiful voice and dramatic power, at Moscow, St. Petersburg and Madrid. In the summer of 1880 she sang at Rio Janeiro. Brazil was then the entrepot for the cruel slave trade. At her benefit, Nadine learned that she was to be presented with valuable gifts. She begged that the money, instead of being spent on her, should be used to buy the liberty of several female slaves. Her deed of charity released seven poor slaves, one of whom had been recently whipped in public by order of her mistress. On the benefit night, after Nadine had sung, the seven negroes went upon the stage to thank the artists for their freedom. The crowded house applauded for several minutes; the national hymn was played; the emperor, Dom Pedro, rose, and with him the whole audience, and the songstress knew a moment of thrilling joy such as seldom comes to women.

Usually the Case. There was once a poor boy who while walking along saw a pin on the pavement before him. Quickly the little lad stuck his steps and picking up the pin stuck it carefully and securely in his coat. A rich man chancing to pass at that time saw the action, and was much impressed by it, so much so that he took the boy into his back and finally adopted him. Thirty years have passed and the erstwhile poor boy is a South African millionaire. The other day he drew a check for £2,000 and gave it to a former schoolmate who had not prospered in the race of life. "All that I am now I owe to you, John," said the millionaire. "But I don't understand," stammered the beneficiary. "Simple enough. If I hadn't hated you so at school, I should never have picked up that pin to put on your seat."—Pearson's Weekly.

Wanted—A Patent. Among the strange applications which reach the patent office one, filed some years ago, was most extraordinary, it being a petition for a patent for an anti-guard which consisted in merely drawing a chalk mark around a table or other place by which it was claimed the approach of ants was stopped. It seems that chalk makes an ant's legs slip as it runs starting. The petition was novel and caused considerable amusement. The application, however, was refused on the ground that there was nothing new in the invention, that chalk had been used for such purposes before and that such ideas were not patentable.

Have You Heard Of It? You may have heard about SCOTT'S EMULSION and have a vague notion that it is cod-liver oil with its bad taste and smell and all its other repulsive features. It is cod-liver oil, the purest and the best in the world, but made so palatable that almost everybody can take it. Nearly all children like it and ask for more.

SCOTT'S EMULSION looks like cream; it nourishes the wasted body of the baby, child or adult better than cream or any other food in existence, it bears about the same relation to other emulsions that cream does to milk. If you have had any experience with other so-called "just as good" preparations, you will find that this is a fact. The hypophosphites that are combined with the cod-liver oil give additional value to it because they tone up the nervous system and impart strength to the whole body.
