cities has not hurt the demand for PROTEIN IS VERY IMPORTANT FACTOR

Essential to Live Stock, Especially to Milk Producing or Growing Young Animals.

Protein is a very important element of food to every farmer who keeps any kind of live stock and especially those that produce milk or grow young ani-

It is an element of food that cannot be substituted since it is necessary in order to produce the muscle and nerves of the animal.

Protein may be used to a certain extent as a substitute for the carbohydrates or heat and fat-forming ele ments of food, but the carbohydrates cannot be used as substitutes for pro-

It is protein in the concentrates such as cotton seed meal and linueed meal tankage, that makes them such valuable feed stuffs.

So much has been written on the necessity of protein and the value of the concentrates as furnishers of this most valuable element of food, that they have raised in price so much that farmers will have to rely to a greater extent upon growing their own pro-

This may be done by growing more clover, alfalfa and cow peas. Alfalfa hay and cow pea hay are about equal in value as furnishers of protein if well handled and when well taken care of are worth about the same, ton for ton, as wheat bran.

A little calculation and comparison of prices and yields of alfalfa and cowpeas per acre will readily show the economy of growing protein on the loads, watch your horse's breathing. farm rather than buying it in the concentrates.

This is not all: the soil is improved by the growing of crops so far as the nitrogen content is concerned. There is much more nitrogen left to the soll after a crop of clover, cowpeas of alfalfa is harvested than there was be-

fore the crop was grown. The crop harvested is as profitable for work performed as most any o? the cereals. With most farmers it will soon be a matter of necessity to grow more protein on the farm in order to

make a success of the business.

Retain Color and Leaves. Clover and alfalfa, cured in the cock, retain their color and their leaves. The first adds to the selling value, and the latter to the feeding worth of the crop.

Seed Corn Profitable. The acre can be made highly profitable if devoted to the growing of seed corn of the most productive variety for

Detect Robber Cow. The only way to detect the robber cow is by the Babcock test and to spot the drone hen is by the trap

Touch Up Thin Places. Touch up the thin places in the neadow by applying a thin top dressing of well-rotted manure.

Dock the Lambs Early. Dock the lambs early. A sharp chisel should be used, and tar put on the wound at once.

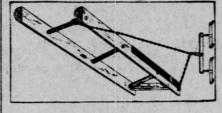

Undesirable Man The man who is downed by one crop failure has no place on the farm.

MAKING A SPLIT-LOG DRAG

Every Farmer Should Possess One of These Implements for Use on Roads After a Rainfall.

The halves of the drag should be framed together by wooden braces so that the split surfaces of the log shall be in front. The face of the drag should lie at an angle of 45 degrees with the lines of the road, thus drawing the earth toward the center. The rear log should follow in the track of the first. Drags should be used after rains, or continued wet weather to smooth the earth's surface and prevent ruts from forming to hold water.

Split-Log Drag.

The drag not only smooths the road, but crowns it and puddles the mud so that it is hard when dry.

These drags have been used with great success on clay or water-holding soils. Many stretches of black gumbo roads in the West are maintained by the use of this implement alone.

Every farmer should own one, and after a rain he should spend a few hours on the road adjacent to his farm. If there are many depressions to fill, the drag should be used when the road is wet.

After it has been used long enough to make the road fairly smooth, the drag gives the best results if used when the earth begins to dry.

GRAVEL TO SURFACE ROADS

With Good Material and a Little Atten tion Highways Should Last for Several Years.

(By E. B. HOUSE, Colorado Experiment Station.)

There has been much agitation during the past year concerning the surfacing of our principal roads and as in many parts of the state we find deposits of gravel it seems that this is her head to the south and her tail to the material which may be economical the north, but no matter how many ly used. A few words concerning the times he set her properly in her stall construction of these roads may not she always turned around. Finally be out of place.

First of all the construction should the stall to suit the cow Somewhat If you wish beautiful, clear, white be such that the gravel is confined and later war came and the poor tiller of clothes, use Red Cross Ball Blue. At all held in position on the road. This is accomplished by so grading the earth foundation that shoulders are formed at the sides. The earth forming the shoulders should be well compact and solid, otherwise they will fail in the function required of them. Loose earth thrown up from the ditch at the sides of the road will not answer the purpose unless moistened and rolled with a seven or ten-ton roller.

The whole surface of the earth foundation should be graded to the required form and compact with the roller and the gravel then spread in a layer about four inches thick, in the center and two and one-half inches at the side. Enough sand or loam is then added to make the gravel "bind" well, this is mixed with the gravel with a harrow and the layer is then sprinkled and rolled until solid. Another layer of gravel is then spread over the first and treated in the same way. The result is a graveled surface 15 feet wide and six inches thick at the center and three and one-half inches thick at the sides, and if the gravel is of a good quality this road with a little attention should last for years.

Why a Country Road Unit. A stretch of road of the utmost importance to a locality may be of little concern to a particular township involved (the people using another road), and hence there is no opportunity to have the entire stretch of the road improved as it should be. And we conclude that no system of roads that will answer present needs can be built under township units, because they are too small to carry on the work. Moreover, the cost would fall wholly on the township, whereas the center toward which the road goes the main roads would be better; the ahead. law could let each county vote for or against county centrol.-A. N.

A Land of Beauty.

Maryland appropriates \$4,000,000 for road improvements, a part of which must be spent for planting trees along the highways. Maryland is naturally a land of beauty; with good roads her rural districts will be doubly attrac-

Italian Regulations, Italy is drafting and will enforce series of regulations covering the width of wheel rims to be allowed on

Demand Fertile Soile Both currants and gooseberries thrive in limestone soils, provided the climate is not too warm. Both of these small fruits are cool-weather crops and demand fertile soils. There is an increasing demand among canneries for these fruits.

Estimating Wheat Crop. They're all guessing on the wheat yield in Kansas. The government says 148,000,000 bushels; the secretary, 180,000,000 bushels. Some estimates run to 200,000,000 bushels.

5 Women Avoid Operations

For years we have been stating in the newspapers of the country that a great many women have escaped serious operations by taking Lydia E. Pinkham's Vegetable Compound, and it is true.

We are permitted to publish in this announcement extracts from the letters of five women. All have been recently received unsolicited. Could any evidence be more convincing?

Hodgon, Me.-"I had pains in both sides and such a soreness 1. I could scarcely straighten up at times. My back ached and I was so nervous I could not sleep, and I thought I never would be any better until I submitted to an operation, but I commenced taking Lydia E. Pinkham's Vegetable Compound and soon felt like a new woman."-Mrs. HAYWARD Sowers, Hodgdon, Me. CHARLOTTE, N. C.-"I was in bad health for two years, with

2. Charlotte, N. C.—"I was in bad health for two years, with pains in both sides and was very nervous. I had a growth which the doctor said was a tumor, and I never would get well unless I had an operation. A friend advised me to take Lydia E. Pinkham's Vegetable Compound, and I gladly say that I am now enjoying fine health."—Mrs. Rosa Sims, 16 Winona St., Charlotte, N. C. HANOVER, PA .- "The doctor advised a severe operation, but my 3. Hanover, Pa.—"The doctor advised a severe operation, but my nusband got me Lydia E. Pinkham's Vegetable Compound and I experienced great relief in a short time. Now I feel like a new person

and can do a hard day's work and not mind it."-Mrs. ADA WILT, 196 Stock St., Hanover, Pa. 4. DECATUR, ILL.—"I was sick in bed and three of the best physicians said I would have to be taken to the hospital for an operation as I had something growing in my left side. I refused to submit to the operation and took Lydia E. Pinkham's Vegetable Com-

pound—and it worked a miracle in my case, and I tell other women what it has done for me."—Mrs. LAURA A. GRISWOLD, 2300 Blk. East William Street, Decatur, Ill. 5. CLEVELAND, OHIO. —"I was very irregular and for several years my side pained me so that I expected to have to undergo an op-

eration. Doctors said they knew of nothing that would help me. I took Lydia E. Pinkham's Vegetable Compound and I became regular and free from pain. I am thankful for such a good medicine and will always give it the highest praise."—Mrs. C. H. Griffith, 7305 Madison Av., Cleveland, O.

Write to LYDIA E.PINKHAM MEDICINE CO. (CONFIDENTIAL) LYNN, MASS., for advice. Your letter will be opened, read and answered by a woman and held in strict confidence.

Cow Followed Compass.

A poor tiller of the soil had owned for a number of years a valuable cow Of a sudden he began to find that the beast always stood in her stall with her tail toward the south where the argument. manger was, her head toward the north. He tried various means of making the cow stand the other way, there was nothing to do but rebuild First of all the construction should the stall to suit the cow Somewhat go and fight for the fatherland. His wife and children, reduced to dire poverty, were forced to sell the cow to the butcher, who slaughtered her and sold her meat at famine prices to his fellow townsmen. At the same time, however; the mystery of the animal's unaccountable behavior was cleared up. In the body of the cow was found

a small compass which the poor man,

her owner, had lost some months be-

fore from his watch chain. Evidently

it had fallen among the hay and been

LEARNING THINGS

We Are All in the Apprentice Class. When a simple change of diet brings back health and happiness the story is briefly told. A lady of Springfield, Ill.,

says: "After being afflicted for years with nervousness and heart trouble, I received a shock four years ago that left me in such a condition that my life

was despaired of. "I got no relief from doctors nor from the numberless heart and nerve remedies I tried, because I didn't know is as much benefited, but may be in a that coffee was daily putting me back different township. County control of more than the doctors could put me

> "Finally at the suggestion of a friend I left off coffee and began the use of Postum, and against my expectations I gradually improved in health until for the past 6 or 8 months I have been entirely free from nervousness and those terrible sinking, weakening spells of heart trouble. "My troubles all came from the use

> of coffee which I had drunk from childhood and yet they disappeared when I quit coffee and took up the use of Postum." Name given by Postum Co., Battle Creek, Mich. Many people marvel at the effects of

leaving off coffee and drinking Postum, but there is nothing marvelous about it-only common sense. Coffee is a destroyer-Postum is a

rebuilder. That's the reason. Look in pkgs. for the famous nttle book, "The Road to Wellville." Postum comes in two forms: Regular Postum-must be well boil-

Instant Postum-is a soluble pow der. A teaspoonful dissolves quickly in a cup of hot water and, with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.

ed. 15c and 25c packages.

The cost per cup of both kinds is about the same. "There's a Reason" for Postum.
