

You don't want a slow remedy when your stomach is bad-or an uncertain one-or a harmful one-your stomach is too valuable; you mustn't injure it. Pape's Diapepsin is noted for its speed in giving relief; its harmlessness; its certain unfailing action in regulating sick, sour, gassy stomachs. Its millions of cures in indigestion, dyspepsia, gastritis and other stomach troubles has made it famous the world over.

Keep this perfect stomach doctor in your home-keep it handy-get a large fifty-cent case from any dealer and then if anyone should eat something and continued at the rate we have which doesn't agree with them; if what they eat lays like lead, ferments and sours and forms gas; causes headache, dizziness and nausea; eructations of acid and undigested foodremember as soon as Pape's Diapepsin comes in contact with the stomach all such distress vanishes. Its promptness, certainty and ease in overcoming the worst stomach disorders is a revelation to those who try it.-Adv.

CONCRETE CULVERT IS BEST

Flat-Top Style Being Built in Kansas Is Shown in Illustration-Good Roads Save Money.

Had we begun not more than fifteen years ago to build concrete culverts and bridges in this township, been building them the last three years, we would now have no place to put another one. Besides our expenses would not have been much more than they have been in building the wooden ones, writes J. T. King, trustee of Lincoln township, Lebo, Kan., in Farmers' Mail and Breeze. We began with the full-arch style of concrete culverts. That was before we knew the good of the flat-top kind. We now use the full arch only where there are high banks on both sides, so we can grade up to the top of the arch and make the prefer the flat top. We build them from 2 by 16 feet, to 20 by 16 feet. All concrete work must be well reenforced with iron wire. We use any kind of bar iron in the tops, laid hit and miss lengthwise with the road. Heavy woven hog wire is laid cross-

wise of the top and in the wings, intermingled, so as to unite the whole culvert into one piece. The tops have

TO SECURE SOUND SLUMBER

Conditions Must Be Right, Especially to Man Who Must Quiet Activity of Brain.

Many men and women, especially those past their first youth, find difficulty in procuring the sound, restful sleep so necessary to keep mind and body fit. Although, physically, the body is tired out, the brain is as alert as ever, and perfect oblivion is impossible.

A well-known physician gives some interesting advice on the matter. "Insomnia." he states, "is one of the penalties of the increasing strain modern life throws upon our brains. The man who works with his muscles True cholera infantum, too, is rarely and lives in the open air is rarely a victim of sleeplessness.

"The essentials for a good night's rest are mental repose, a requisite amount of muscular fatigue, comfortabel body heat and plenty of ventilation.

"The most difficult to secure in les-Yeast-L see a new step-ladder that sened brain activity. An excellent | a cupful of warm milk and a biscuit

One Sentence in Discussion of Concrete Construction Worthy of Being Printed in Big Type.

By E. B. HOUSE, Colorado Agricultural In the engineering record of recent issue is an interesting article concerning a meeting for the purpose of instruction to road builders, by experts in that line of work.

Speaking of the meeting the Record comments as follows: "One sentence in the discussion of concrete road building would have been worth putting in black type. It is this: 'You cannot design a concrete pavement four miles long and assume that you can use the same cross-section throughout; you will have to design it the same as foundations for a building, depending on the bearing power of the soil, etc.""

This is undoubtedly true, and yet it states a fact that is almost universally disregarded.

ROAD DRAG IS INEXPENSIVE

Constant Attention Is Price of Good Roads-Objection That Too Much Money is Spent on Grader.

(By C. SCHULTZ.)

I have watched the use of the road drag and the grader past my house this summer. The drag leaves the road in better shape-the grader piling roughage in the middle while the drag smoothes it off nicely. But the greatest objection is that the drag is that good roads by its use are obtainable, or would be if the money were way the money goes.

Permanency of Bridges.

The Bumper

Wheat Crop

means nourishment to millions. But, did you know that a large percent of what are known as the vital phosphates of this wheat will be wasted, so far as human needs are concerned? That's unfortunate, but true.

Many so-called breakfast foods and all white flour products lack these mineral elements-phosphorus, iron, lime, etc.-because they are thrown out of the wheat in the milling process, just to make the flour look white and pretty. And yet these elements are absolutely necessary-all of themfor health.

There's one food, however, that does not lack these mineral elements.

That food is-

Grape-Nuts

Made of wheat and barley, this sturdy food contains all the nutriment of the grain, including their rich phosphates, so essential for body, brain and nerve building. The long baking of Grape-Nuts food makes it easily digestible, with highly concentrated food-values.

Comes ready to eat; fresh, crisp, economical, and wonderfully appetizing.
